Islam And Liberal Citizenship The Search For An Overlapping Consensus:

Islam and Liberal Citizenship Andrew F. March, 2009-03-27 Some argue that Muslims have no tradition of separation of church and state and therefore can't participate in secular pluralist society. At the other extreme, some Muslims argue that it is the duty of all believers to resist Western forms of government and to impose Islamic law. In *Islam and Liberal Citizenship*, Andrew F. March is seeking to find a middle way between these poles. *Islam, Liberalism, and Ontology* Joseph J. Kaminski, 2021-03-31 This book offers comparative ontologies of both Islam and liberalism as discourses more broadly construed. The author argues that despite recent efforts to speak of overlapping consensus and discursive congruence, the fundamental categories that constitute Islam and Liberalism remain very different and that these differences should be taken seriously. Thus far, no recent scholarly works have explicitly or meticulously broken down where these differences lie. The author rigorously explores questions related to rights, moral epistemologies, the role of religion in the public sphere, and more general approaches to legal discourse via primary and canonical sources constitutive of both Islam and liberalism. He then goes on to articulate why communitarian modes of thought are better suited for engaging with Islam and contemporary socio-political modes of organization than liberalism is. This book will be of great interest to students and scholars of politics and international relations, Islam, liberalism, and communitarianism. *The Rule of Law and the Rule of God* S. Ilesanmi, W. Lee, J. Parker, 2014-10-09 This book examines the competing regimes of law and religion and offers a multidisciplinary approach to demonstrate the global scope of their influence. It argues that the tension between these two institutions results from their disagreements about the kinds of rule that should govern human life and society and from where they should be derived.

Liberalism's Religion Cécile Laborde, 2017-09-25 Cécile Laborde argues that religion is more than a statement of belief or a moral code. It refers to comprehensive ways of life, theories of justice, modes of association, and vulnerable collective identities. By disaggregating these dimensions, she addresses questions about whether Western secularism and religion can be applied more universally. *Democracy and Ontology* Irena Rosenthal, 2018-01-25 This book investigates the relationship between liberal democracies and ontology, that is, philosophical claims about the constitution of agents and the social world. Many philosophers argue that ontology needs to be avoided in political and legal philosophy. In fact, political liberalism, a highly influential paradigm founded by the philosopher John Rawls, makes the avoidance of ontology a core ambition of its political non-metaphysical programme. In contrast to political liberalism, this book argues that attending to ontological disputes is essential to political and legal philosophy. Illuminating, criticising, and developing ontological arguments does not only enhance our understanding of justice but also highlights key features of democratic citizenship. The argument is built up by bringing together three traditions of thought that have so far not been confronted with one another: political liberalism, the work of Michel Foucault, and the psychoanalytic theories of Sigmund Freud and Donald Winnicott. The book also investigates more concrete implications of ontological disputes by drawing on several case studies, a Dutch political legal debate about

greeting rituals an American conflict about the legalisation of religious freedom and the struggles for resilience of two American social movement groups

Geoeconomics and Geosecurities in the Indian Ocean Region Timothy Doyle, 2018-04-19 There are important changes in regional and global demographics ahead of us A profound rise in the number of citizens in the Indian Ocean Region in the next fifty years will have significant impacts on the state on the nature and operation of markets and the neo liberal framework they operate in and raise new challenges for regional security This book considers the insufficient dialogue between ever increasing and closer connections between geo economics and geo securities in the Indian Ocean Region and highlights some of the challenges This book takes a broader understanding of security than what is usually meant in more traditional security frameworks in politics and international relations Economic and politics are integrally and obviously related This book considers regional themes such as discourses around strategic competition models of regional cooperative security Indian Ocean Region domestic economies contexts and the military industrial complex and regional models of identity and cultural belonging Regions and regionalisms are increasingly being used to challenge power and the existence of any uniform model of macro politics and macro economics whether it be neo liberalism or otherwise Most importantly these discussions of region enable us to celebrate the similarities that we share as neighbours in a real geographical sense and to comprehend and respect these differences in these rich regional communities of markets cultures and securities This book was previously published as a special issue of the Journal of the Indian Ocean Region

The Kuyper Center Review, Volume 2 John Bowlin, 2011 Includes papers presented at conferences sponsored by the Abraham Kuyper Center for Public Theology at Princeton Theological Seminary over the last two years Introduction

Post-Islamist Political Theory Meysam Badamchi, 2017-06-22 This book deals with the concept of post Islamism from a mainly philosophical perspective using political liberalism as elaborated by John Rawls as the key interpretive tool What distinguishes this book from most scholarship in Iranian studies is that it primarily deals with the projects of Iranian intellectuals from a normative perspective as the concept is understood by analytical philosophers The volume includes analyses of the strengths and weakness of the arguments underlying each thinker s ideas rather than looking for their historical and sociological origins genealogy etc Each chapter develops a particular conjectural argument for the possibility of an overlapping consensus between Islam and political liberalism though the arguments presented draw upon different Islamic particularly Shia resources Thus while Shabestari and Soroush primarily reason from a modernist theological or kalami perspective M H Tabatabai and Mehdi Haeri Yazdi s arguments are mainly based on traditional Islamic philosophy and Quranic exegesis While Kadivar An Naim and Fanaei are post Islamist in the exact sense of the term Malekian goes beyond typical post Islamism by proposing a theory for spirituality that constrains religion within the boundaries of enlightenment thought Throughout the book specific attention is given to Ferrara and March s readings of political liberalism Although the book s chapters constitute a whole they can also be read independently if the reader is only curious about

particular intellectuals whose political theories are discussed Identity and the Difficulty of Emancipation Volker Kaul, 2020-08-25 This book provides a comprehensive account of the phenomenon of identity in politics featuring for the first time the question of individual emancipation It addresses the burning questions of our times viz nationalism populism Islamic fundamentalism multiculturalism postsecularism and postcolonialism The volume repudiates an easy reconciliation between identity and emancipation such as it occurs in contemporary liberal and multicultural political theories It shows that we cannot achieve emancipation without Kant's help whereas identity relentlessly draws us back to collective values and the community The book urges for a new understanding of identity and a politics that instead of accommodating identities seeks to govern them Identity is the buzzword in the humanities and social sciences but also the most contentious and least conceptualized term This book intends to bring theoretical clarity into the debate on how identity plays out in politics

Routledge Handbook of Islam in the West Roberto Tottoli, 2022-02-21 With new topics and contributions this updated second edition discusses the history and contemporary presence of Islam in Europe and America The book debates the relevance and multi faceted participation of Muslims in the dynamics of Western societies challenging the changing perception on both sides Collating over 30 chapters written by experts from around the world the volume presents a wide range of perspectives Case studies from the Muslim presence in the Iberian Peninsula between the Middle Ages and the modern age set off the Handbook along with an outline of Muslims in America up to the twentieth century The second part covers concepts around new conditions in terms of consolidating identities the emergence of new Muslim actors the appearance of institutions and institutional attitudes the effects of Islamic presence on the arts and landscapes of the West and the relational dynamics like ethics and gender Exploring the influence of Islam particularly its impact on society culture and politics this interdisciplinary volume is a key resource for policymakers academics and students interested in the history of Islam religion and the contemporary relationship between Islam and the West *Blasphemy, Islam and the State* Stewart Fenwick, 2016-10-04 This book draws on the work of Rawls to explore the interaction between faith law and the right to religious freedom in post Soeharto Indonesia the world's largest democracy after India and the United States It argues that enforcement of Islamic principles by the state is inconsistent with religious diversity and the country's liberal constitution The book thus contributes to understanding the role of religion in the development of democracy in the world's largest Muslim nation A key objective is to test the argument that Rawls thinking about public reason cannot apply to the case of Indonesia and Muslim states more broadly The book therefore contributes to emerging scholarship that considers Rawls in a Muslim context In addition to examining public reason in detail and considering critiques of the concept the work highlights the fact that the theory was created to deal with value pluralism and is therefore relevant in any religious setting including an Islamic one In doing so it emphasises that Islam is multifaceted and demonstrates the difficulties and negative consequences of integrating faith and law in a liberal state **Philosophizing the Indefensible** Shmuel Nili, 2023-09-25

Philosophizing the indefensible asks what distinctive contributions political philosophers might make when reflecting on blatant moral failures in public policy the kinds of failures that philosophers usually dismiss as theoretically uninteresting even if practically important This book argues that political philosophers can and should craft strategic arguments for public policy reforms showing how morally urgent reforms can be grounded for the sake of discussion even in problematic premises associated with their opponents The book starts by developing the general contours of this approach defending its general moral value in a democratic society and examining how far one might go in strategically deploying dubious or even repugnant premises in debating public affairs The book then applies strategic theorizing to a set of diverse policy issues These range from the abortion debate and financial regulation in the United States through controversies surrounding the participation of Arab parties in Israel s political process to global issues such as commercial ties with oil rich dictatorships and the bearing of such ties on global climate change

Entangled Domains Rabi'at Akande, 2023-06 This book provides the first account of the sustained entanglement of law religion and empire in Northern Nigeria

Islamic Doctrines and Political Liberalism Gozde Hussain, 2024-11-13 This book delves into the compatibility of Islam with liberal values engaging in a comparative analysis of Islamic moral language and John Rawls s liberal democratic ideas Rawls a prominent modern liberal political philosopher posits that diverse moral and religious doctrines in a pluralistic society should align with the principles of a liberal democratic political culture The author shares Rawls s assumptions and maps out a spectrum of Islamic orthodoxy positions to assess the plausibility of reconciling Islamic doctrines with a liberal political order While acknowledging that such compatibility is not the mainstream outlook the book argues that it s feasible through reasonable interpretations of Islamic sources The central question addressed is the realism of observant Muslims endorsing a liberal democratic state from within their doctrinal tradition By examining a range of Islamic orthodoxy positions the book demonstrates that Muslims can theoretically find Islamic reasons rooted in acceptable interpretations of divine sources to justify their commitment to a liberal state Furthermore it provides moral reasons and strategies for the liberal state to address incompatible Islamic doctrines ensuring Muslims can maintain religious practices without an Islamic political authority This theoretical framework offers insights for future empirical and theoretical studies on Muslims navigating pluralistic liberal societies making it a vital contribution to the discourse on Islam and liberalism

The Oxford Handbook of Comparative Political Theory Leigh K. Jenko, Murad Idris, Megan C. The Democratic Horizon Alessandro Ferrara, 2014-03-24 Alessandro Ferrara explains what he terms the democratic horizon the idea that democracy is no longer simply one form of government among others but is instead almost universally

regarded as the only legitimate form of government the horizon to which most of us look Professor Ferrara reviews the challenges under which democracies must operate focusing on hyperpluralism and impresses a new twist onto the framework of political liberalism He shows that distinguishing real democracies from imitations can be difficult responding to this predicament by enriching readers understanding of the spirit of democracy clearing readers views of pluralism from residues of ethnocentrism and conceiving multiple versions of democratic culture rooted in the diversity of civilizational contexts
