Islam Modernity And The Human Sciences:

Islam, Modernity, and the Human Sciences A. Zaidi, 2011-05-09 Ali Zaidi discloses a largely unnoticed dialogue between Muslim and Western social thought on the search for meaning and transcendence in the human sciences This disclosure is accomplished by a comparative reading of Muslim debates on secular knowledge on the one hand and of Western debates on the putative death of metaphysics in the human sciences on the other hand The analysis is grounded in dialogical hermeneutics that is a hermeneutic approach to texts and cultural traditions that draws upon the work of Hans Georg Gadamer and upon the insights of inter religious dialogue

Islam, Modernity and a New Millennium Ali Paya, 2018-02-02 As the world becomes increasingly globalised Islam faces some important choices Does it seek to modernise in line with the cultures in which it is practised or does it retain its traditions even if they are at odds with the surrounding society This book utilizes a critical rationalist viewpoint to illuminate many of the hotly contended issues in modern Islam and to offer a fresh analysis A variety of issues within Islam are discussed in this book including Muslims and modernity Islam Christianity and Judaism approaches to the understanding of the Quran Muslim identity and civil society doctrinal certainty and violent radicalism In each case the author makes use of Karl Popper s theory of critical rationalism to uncover new aspects of these issues and to challenge post modern relativist literalist and justificationist readings of Islam This is a unique perspective on contemporary Islam and as such will be of significant interest to scholars of Religious Studies Islamic Studies and the Philosophy of Religion

Science and the Decolonization of Social Theory Gennaro Ascione, 2016-08-12 This book addresses the ideological figure of modernity its presumed historical significance as an era and its theoretical adequacy as a frame It shows how science is evoked to prevent the sociological imagination from elaborating non Eurocentric categories and terminologies that are more adequate for a global age The idea of modernity should not only be contested but radically unthought in its foundational assumptions These assumptions inform concepts such as secularization emancipation the global and accumulation of capital This book frees these concepts from ethnocentrism and discloses a path toward a new non Eurocentric global social theory Gennaro Ascione explores the transformative potential of decolonizing knowledge through a radical reconsideration of the historical and epistemological role that the intellectual reference to science plays in the construction of concepts This ground breaking work challenges social theorists to think globally beyond modernity bringing together social theory and science in an unprecedented way Importantly it makes accessible a new space of missing theorization for further developments and inquiries in the field

Teaching Educational Leadership in Muslim Countries Eugenie A. Samier, Eman S. ElKaleh, 2019-04-10 This book explores the Islamic tradition and Muslim contexts for educational administration and leadership. It addresses the teaching of educational administration and leadership from an Islamic perspective by raising issues of globalised educational administration and leadership teaching as it applies in Muslim contexts that vary by culture and social institutions. The book proposes alternative approaches and demonstrates that Islamic traditions have a strong foundation upon which to build in the field and are compatible with many aspects of Western theory and practices provided that sufficient modifications and adaptations are made. The book focuses on postgraduate curricula and pedagogy drawing on a range of theoretical foundations and approaches that are culturally and jurisdictionally appropriate in a number of Muslim countries. As such it contributes to an emerging specialisation in international and comparative educational administration and leadership that is oriented towards a broader and more diverse set of perspectives particularly from the non-Western world.

Discipline, Devotion, and Dissent Graham P. McDonough, Nadeem A. Memon, Avi I. Mintz, 2013-09-03 The education provided by Canada s faith based schools is a subject of public political and scholarly controversy As the population becomes more religiously diverse the continued establishment and support of faith based schools has reignited debates about whether they should be funded publicly and to what extent they threaten social cohesion These discussions tend to occur without considering a fundamental question How do faith based schools envision and enact their educational missions Discipline Devotion and Dissent offers responses to that question by examining a selection of Canada s Jewish Catholic and Islamic schools The daily reality of these schools is illuminated through essays that address the aims and practices that characterize these schools how they prepare their students to become citizens of a multicultural Canada and how they respond to dissent in the classroom The essays in this book reveal that Canada s faith based schools sometimes succeed and sometimes struggle in bridging the demands of the faith and the need to create participating citizens of a multicultural society Discussion surrounding faith based schools in Canada would be enriched by a better understanding of the aims and practices of these schools and this book provides a gateway to the subject

An Illusion of Harmony Taner Edis, 2010-03-05 Current discussions in the West on the relation of science and religion focus mainly on science s uneasy relationship with the traditional Judeo Christian view of life But a parallel controversy exists in the Muslim world regarding ways to integrate science with Islam As physicist Taner Edis shows in this fascinating glimpse into contemporary Muslim culture a good deal of popular writing in Muslim societies attempts to address such perplexing questions as Is Islam a scientific religion Were the discoveries of modern science foreshadowed in the Quran Are intelligent design conjectures more appealing to the Muslim perspective than Darwinian explanations Edis examines the range of Muslim thinking about science and Islam from blatantly pseudoscientific fantasies to comparatively sophisticated efforts to Islamize science From the world s strongest creationist

movements to bizarre science in the Quran apologetics popular Muslim approaches promote a view of natural science as a mere fact collecting activity that coexists in near perfect harmony with literal minded faith Since Muslims are keenly aware that science and technology have been the keys to Western success they are eager to harness technology to achieve a Muslim version of modernity Yet at the same time they are reluctant to allow science to become independent of religion and are suspicious of Western secularization Edis examines all of these conflicting trends revealing the difficulties facing Muslim societies trying to adapt to the modern technological world His discussions of both the parallels and the differences between Western and Muslim attempts to harmonize science and religion make for a unique and intriguing contribution to this continuing debate
