**Islamic Perspectives on Science and Technology** Mohammad Hashim Kamali, Osman Bakar, Daud Abdul-Fattah Batchelor, Rugayah Hashim, 2016-04-25 This book presents 25 selected papers from the International Conference on Developing Synergies between Islam Science and Technology for Mankind's Benefit held at the International Institute for Advanced Islamic Studies Malaysia Kuala Lumpur in October 2014. The papers cover a broad range of issues reflecting the main conference themes: Cosmology and the Universe; Philosophy of Science and the Emergence of Biological Systems; Principles and Applications of Tawhidic Science; Medical Applications of Tawhidic Science and Bioethics; and the History and Teaching of Science from an Islamic Perspective. Highlighting the relationships between the Islamic religious worldview and the physical sciences, the book challenges secularist paradigms on the study of Science and Technology. Integrating metaphysical perspectives of Science, topics include Islamic approaches to S/T such as an Islamic epistemology of the philosophy of science, a new quantum theory, environmental care, avoiding wasteful consumption using Islamic teachings, and emotional/psychological therapy. Eminent contributing scholars include Osman Bakar, Mohammad Hashim Kamali, Mehdi Golshani, Mohd Kamal Hassan, Adi Setia, and Malik Badri. The book is essential reading for a broad group of academics and practitioners from Islamic scholars and social scientists to physical scientists and engineers.

**Islam's Encounter with Modern Science** Taner Edis, 2023-12-07 Within Muslim populations, debates about the compatibility between science and religion tend to be framed by the long-standing competition between modernizing reformers (particularly westernizers) and theological conservatives. Much like their liberal Christian counterparts, reformers propose to embrace technical knowledge and reinterpret traditional beliefs undermined by modern science. Conservatives are more open to challenging the content of science, especially when science appears to support materialist views. Islamists promote an alternative non-western style of modernity, nurturing a more pious professional class that contrasts with westernized elites. By scientific standards, westernizers appear to have the upper hand, especially as conservative apologetics is drawn toward distortions of science such as creationism or fruitless attempts to Islamize science. But conservatives can also point to some success in defusing tensions between scientific and religious institutions without adopting the full secularization of science seen in post-Christian countries.

Handbook of Ethics of Islamic Economics and Finance Abbas Mirakhor, Zamir Iqbal, Seyed Kazem Sadr, 2020-04-20 Since the financial crisis of 2007-2008, a renewed discussion on the ethics and finance is being examined from different dimensions: finance for good, society, responsible finance, ethical finance, financial crimes, and financial repression. The principal objective of this Handbook on Ethics of Islamic Economics and Finance is to provide a deeper understanding of the ethical underpinning of Islamic economics and finance. The reader will notice that the Handbook reflects a diversity of views on the subject of economic and business ethics in Islam across the intellectual spectrum of Muslim thought over the globe. Handbook attempts to find answers to some questions concerning the definition and

characteristics of the ethical system in Islam What is its goal and how do its rules and practices ensure welfare for individuals and society Are the moral principles universal and invariable or do they change and adapt with the social changes of communities and progress in science and technology Is the present generation accountable for the welfare of future generations Where is the boundary between law and ethics and who guarantees their adoption and implementation

Global Governance and Muslim Organizations Leslie A. Pal,M. Evren Tok,2018-07-31 There are 1 6 billion Muslims in the world represented on the world stage by 57 states as well as a host of international organizations and associations This book critically examines the engagement of these states in systems of global governance and with a variety of policy regimes including climate change energy migration humanitarian aid international financial institutions research and education Chapters explore the dynamics of this engagement the contributions to global order the interests pursued and some of the contradictions and tensions within the Islamic world and between that world and the West An in depth perspective is provided about the traditional and new forms of multilateralism and the policy spaces formed which provide new opportunities for the Muslim and non Muslim world alike

Islam and Environmental Ethics Muhammad Yaseen Gada,2024-05-09 This Element explores environmental ethics in Islam Its core argument is that Islamic culture and civilization are rich in environmental concerns Islam has unique considerations and directions about what sort of human nature relationship there should be Muslim environmental commentators have explored basic environmental or eco ethical principles that are deeply embedded in the Qur an and Sunnah Protecting and conserving the environment are not only moral duties but also an obligation in Islam The Islamic environmental ethical system offers both conceptual paradigms and operational components to realize environmental justice and sustainable development

**Islam and Evolution** Shoaib Ahmed Malik,2021-05-03 This book attempts to equip the reader with a holistic and accessible account of Islam and evolution It guides the reader through the different variables that have played a part in the ongoing dialogue between Muslim creationists and evolutionists This work views the discussion through the lens of al Ghaz l 1058 1111 a widely known and well respected Islamic intellectual from the medieval period By understanding al Ghaz l as an Ash arite theologian a particular strand of Sunni theology his metaphysical and hermeneutic ideas are taken to explore if and how much Neo Darwinian evolution can be accepted It is shown that his ideas can be used to reach an alignment between Islam and Neo Darwinian evolution This book offers a detailed examination that seeks to offer clarity if not agreement in the midst of an intense intellectual conflict and polarity amongst Muslims As such it will be of great interest to scholars of Science and Religion Theology Philosophy of Religion Islamic Studies and Religious Studies more generally Winner of the International Society for Science Religion ISSR book prize 2022 academic category

**Islamic Bioethics: Problems and Perspectives** DARIUSCH ATIGHETCHI,2006-12-02 This book presents a critical analysis of the debate at the religious legal and political level sparked off by the introduction of new biomedical technologies cloning genetics organ transplants IVF etc in Muslim

countries It compares the positions of classic Muslim law and contemporary religious authorities laws in Muslim countries the attitudes and concrete behaviour of populations families and individuals as well as the regulations of medical associations bioethics committees etc The result is a mosaic of positions which are often different including from the point of view of ethics but all in pursuit of legitimisation according to the Koran and the Shari a The work has an interdisciplinary approach drawing on law sociology anthropology politics and the history of science For this reason it will be of interest to scholars and operators in a wide variety of disciplines and fields
