Eloquence Embodied Céline Carayon, 2019-08-29 Taking a fresh look at the first two centuries of French colonialism in the Americas this book answers the long standing question of how and how well Indigenous Americans and the Europeans who arrived on their shores communicated with each other French explorers and colonists in the sixteenth century noticed that Indigenous peoples from Brazil to Canada used signs to communicate The French in response quickly embraced the nonverbal as a means to overcome cultural and language barriers C line Carayon s close examination of their accounts enables her to recover these sophisticated Native practices of embodied expressions In a colonial world where communication and trust were essential but complicated by a multitude of languages intimate and sensory expressions ensured that French colonists and Indigenous peoples understood each other well Understanding in turn bred both genuine personal bonds and violent antagonisms As Carayon demonstrates nonverbal communication shaped Indigenous responses and resistance to colonial pressures across the Americas just as it fueled the imperial French imagination Challenging the notion of colonial America as a site of misunderstandings and insurmountable cultural clashes Carayon shows that Natives and newcomers used nonverbal means to build relationships before the rise of linguistic fluency and crucially well afterward

linguistic and visual analyses of archival fragments images and texts in languages as diverse as Spanish and Quechua also allow her to reconstruct the processes that led to the silencing of these voices in European print culture

Space and Time in Mediterranean Prehistory Stella Souvatzi,Athena Hadji,2013-10-15 Space and Time in Mediterranean Prehistory addresses these two concepts as interrelated rather than as separate categories and as a means for understanding past social relations at different scales The need for this volume was realised through four main observations the ever growing interest in space and spatiality across the social sciences the comparative theoretical and methodological neglect of time and temporality the lack in the existing literature of an explicit and balanced focus on both space and time and the large amount of new information coming from prehistoric Mediterranean It focuses on the active and interactive role of space and time in the production of any social environment drawing equally on contemporary theory and on case studies from Mediterranean prehistory Space and Time in Mediterranean Prehistory seeks to break down the space time continuum often assumed rather than inferred into space time units and to uncover the varying and variable interrelations of space and time in prehistoric societies across the Mediterranean The volume is a response to the dissatisfaction with traditional views of space and time in prehistory and revisits these concepts to develop a timely integrative conceptual and analytical framework for the study of space and time in archaeology
