Isles Amnesia Geography Restoration Forgotten:

Isles of Amnesia Mark J. Rauzon, 2016-01-31 For over a quarter century biologist Mark J Rauzon worked in the field of island restoration traveling throughout the American Insular Pacific to eradicate invasive plants and animals introduced by humans The region spans from Hawai i to Samoa to Guam and their neighbors small obscure tropical islands that are hundreds if not thousands of nautical miles from each other These little known US possessions and territories include various islands and atolls Jarvis Howland Baker the Northern Marianas Wake Palmyra Johnston and Rose Atoll among others They anchor a vast National Marine Monument program created in 2009 and expanded in 2014 to protect the largest area in the world from exploitation In Isles of Amnesia Rauzon chronicles the ecological and human history of these islands enlivened with his first hand experiences of eradication efforts to restore atoll ecosystems and maximize native biodiversity Each chapter focuses on an individual island or island group revealing how each location has its own particular story secret past or ecological lesson to be shared Taken as a whole the region has played a unique role in American history with the remoteness of the islands having served the needs of whalers and guano miners in the 1800s and in later years that of military secret projects missile launching chemical weapon incinerations and air bases Rauzon further explores the creation of the National Marine Monuments and what their protection means to a changing ocean and presents original research about the US military s Pacific Project and germ warfare testing Illustrated with over seventy historical photographs and original drawings this much needed work tells the fascinating story of America s forgotten Pacific islands **Restoring Nature** Lary M.

Dilsaver, Timothy J. Babalis, 2023 Off the coast of California running from Santa Barbara to La Jolla lies an archipelago of eight islands known as the California Channel Islands The northern five were designated as Channel Islands National Park in 1980 to protect and restore the rich habitat of the islands and surrounding waters In the years since that mission intensified as scientists discovered the extent of damage to the delicate habitats of these small fragments of land and to the surprisingly threatened sea around them In Restoring Nature Lary M Dilsaver and Timothy J Babalis examine how the National Park Service has attempted to reestablish native wildlife and vegetation to the five islands through restorative ecology and public land management The Channel Islands staff were innovators of the inventory and monitoring program whereby the resource problems were exposed This program became a blueprint for management throughout the U S park system Dilsaver and Babalis present an innovative regional and environmental history of a little known corner of the Pacific West as well as a larger national narrative about how the Park Service developed its approach to restoration ecology which became a template for broader Park Service policies that shaped the next generation of environmental conservation **Borderwaters** Brian Russell Roberts, 2021-04-05 Conventional narratives describe the United States as a continental country bordered by Canada and Mexico Yet since the late twentieth century the United States has claimed more water space than land space and more water space than perhaps any other country in the world This watery version of the United States borders some twenty one

countries particularly in the archipelagoes of the Pacific and the Caribbean In *Borderwaters* Brian Russell Roberts dispels continental national mythologies to advance an alternative image of the United States as an archipelagic nation Drawing on literature visual art and other expressive forms that range from novels by Mark Twain and Zora Neale Hurston to Indigenous testimonies against nuclear testing and Miguel Covarrubias's visual representations of Indonesia and the Caribbean Roberts remaps both the fundamentals of US geography and the foundations of how we discuss US culture *Science, Secrecy, and the Smithsonian* Edward Regis, 2023-01-17 In the fall of 1962 at the height of the Cold War officers representing the three main military services the Army the Navy and the Air Force arrived at the Smithsonian Institution in Washington The officers were from the Desert Test Center a new military installation in Fort Douglas Utah The chapter describes how these officers outlined a biological survey of various Pacific islands that they wanted to be undertaken They were not forthcoming with their motives in wanting the survey but Smithsonian officials volunteered to perform the survey using their own scientists and others to be hired as needed Uncovering Pacific Pasts Hilary Howes, Tristen Jones, Matthew Spriggs, 2022-06-21 Objects have many stories to tell The stories of their makers and their uses Stories of exchange acquisition display and interpretation This book is a collection of essays highlighting some of the collections and their object biographies that were displayed in the Uncovering Pacific Pasts Histories of Archaeology in Oceania UPP exhibition The exhibition which opened on 1 March 2020 sought to bring together both notable and relatively unknown Pacific material culture and archival collections from around the globe displaying them simultaneously in their home institutions and linked online at www.uncoveringpacificpasts.org Thirty eight collecting institutions participated in UPP including major collecting institutions in the United Kingdom continental Europe and the Americas as well as collecting institutions from across the Pacific

The Wide Wide Sea Hampton Sides, 2025-05-27 NEW YORK TIMES BESTSELLER A thrilling and superbly crafted The Wall Street Journal account of the most momentous voyage of the Age of Exploration which culminated in Captain James Cook's death in Hawaii and left a complex and controversial legacy still debated to this day One of The New York Times Book Review's 10 Best Books of the Year A BEST BOOK OF THE YEAR THE NEW YORK TIMES TIME THE ECONOMIST NPR THE NEW YORKER THE SMITHSONIAN AND KIRKUS REVIEWS In this masterly history Sides tracks the 18th century English naval officer James Cook's third and final voyage across the globe painting a vivid and propulsive portrait The New York Times Book Review On July 12th 1776 Captain James Cook already lionized as the greatest explorer in British history set off on his third voyage in his ship the HMS Resolution Two and a half years later on a beach on the island of Hawaii Cook was killed in a conflict with native Hawaiians How did Cook who was unique among captains for his respect for Indigenous peoples and cultures come to that fatal moment Hampton Sides' bravura account of Cook's last journey both wrestles with Cook's legacy and provides a thrilling narrative of the titanic efforts and continual danger that characterized exploration in the 1700s Cook was renowned for his peerless seamanship his humane leadership and his dedication to science On previous expeditions Cook mapped huge swaths of the Pacific including the east coast of Australia and initiated first European contact with numerous peoples He treated his crew well and endeavored to learn about the societies he encountered with curiosity and without judgment Yet something was different on this last voyage Cook became mercurial resorting to the lash to enforce discipline and led his two vessels into danger time and again Uncharacteristically he ordered violent retaliation for perceived theft on the part of native peoples This may have had something to do with his secret orders which were to chart and claim lands before Britain's imperial rivals could and to discover the fabled Northwest Passage Whatever Cook's intentions his scientific efforts were the sharp edge of the colonial sword and the ultimate effects of first contact were catastrophic for Indigenous people around the world The tensions between Cook's overt and covert missions came to a head on the shores of Hawaii His first landing there was harmonious but when Cook returned after mapping the coast of the Pacific Northwest and Alaska his exploitative treatment of the Hawaiians led to the fatal encounter

At once a ferociously paced story of adventure on the high seas and a searching examination of the complexities and consequences of the Age of Exploration *THE WIDE WIDE SEA* is a major work from one of our finest narrative nonfiction writers

Pacific Futures Warwick Anderson, Miranda Johnson, Barbara Brookes, 2018-11-30 How when and why has the Pacific been a locus for imagining different futures by those living there as well as passing through What does that tell us about the distinctiveness or otherwise of this sea of islands Foregrounding the work of leading and emerging scholars of Oceania *Pacific Futures* brings together a diverse set of approaches to and examples of how futures are being conceived in the region and have been imagined in the past Individual chapters engage the various and sometimes contested futures yearned for unrealized and even lost or forgotten that are particular to the Pacific as a region ocean island network destination and home Contributors recuperate the futures hoped for and dreamed up by a vast array of islanders and outlanders from Indigenous federalists to Lutheran improvers to Cantonese small business owners making these histories of the future visible In so doing the collection intervenes in debates about globalization in the Pacific and how the region is acted on by outside forces and postcolonial debates that emphasize the agency and resistance of Pacific peoples in the context of centuries of colonial endeavor With a view to the effects of the slow violence of climate change the volume also challenges scholars to think about the conditions of possibility for future thinking at all in the midst of a global crisis that promises cataclysmic effects for the region *Pacific Futures* highlights futures conceived in the context of a modernity coproduced by diverse Pacific peoples taking resistance to categorization as a starting point rather than a conclusion With its hospitable approach to thinking about history making and future thinking one that is open to a wide range of methodological epistemological and political interests and commitments the volume will encourage the writing of new histories of the Pacific and new ways of talking about history in this field the region and beyond

Securitizing Marine Protected Areas Elizabeth M. De Santo, 2024-07-10 This book presents a novel examination of Marine Protected Areas within a security context bridging science policy and geopolitics and addressing the often under emphasized aspect of environmental justice The book argues that Marine Protected Areas MPAs are not only a critical tool for protecting marine biodiversity in a changing climate but they also play an important role at the intersection of geopolitics and environmental justice and they provide a case study of environmental governance at the science policy interface The book takes an interdisciplinary and critical approach and builds on the author's two decades of experience working in this field Geopolitically it explores the ways in which MPAs provide footprints for influence and access to resources far from home for nations with overseas territories MPAs also raise important issues connected to equity environmental justice and social justice including access to resources and participation in environmental decision making processes key aspects for achieving long term conservation goals The book also demonstrates how MPAs are a critical lens for understanding how policy makers cope with scientific uncertainty and the necessity of well designed and precautionary science advisory processes While the ecological contribution of MPAs is paramount social issues

and geopolitical considerations are often less obvious in the discourse underpinning MPAs and the resulting tensions can undermine long term conservation objectives By applying the three lenses of geopolitics environmental justice and science this book provides key insights to help the international community moving past the 2030 biodiversity targets and beyond towards a future of meaningful equitable and effective conservation approaches This book will be of great interest to students and scholars of biodiversity conservation marine studies political geography environmental governance and science policy studies It will also be of interest to marine conservation governance professionals and policymakers
