

MLC VS ISM

MLC 2006	ISM Code version 2013
Established in 2006 Entry in force 2013/14	Established in 92 but final implementation in 2002
Policy and health/safety at work programme including risk assessment and the corresponding training of the seafarers: Reg 4.3	The safety and environmental protection policy is the base of the code. The evaluation of the risks assessment and "safe working environment" are objectives only. As the ISM code remains vague on the corresponding training required, it was necessary to issue IMO circulars CMI to specify the necessary training of CPA and crews.
"Reasonable" precautions to prevent industrial accidents, wounds and occupational diseases on board and in a non mandatory part B 4.3: Taking into account of ILO guidelines (16) on the prevention of the accidents on board ships at sea or in port.	The ISM code is very general on this and requires only the insurance of application of mandatory rules and regulations (international or national) and taking into account the other existing recommendations concerning, inter alia, the prevention of the accidents and the possible diseases due to the carriage and handling of dangerous goods for example.
Onboard program for prevention with the participation of the crew These crewmembers can be elected or named at the ship's health and safety committee of the ship. Other interested people of the crew can apply to be part of it	The code being voluntarily general, it can be so precise that a circular or resolution is not necessary. The entry in force of MLC 2006 prevented that this aspect of the seafarers participation entered in ISM code amendments 2014

SEGRAGATED AS PER SURVEYORS DATES FUNCTIONS **Human Factors in Design, Engineering, and Computing**

Waldemar Karwowski, Tareq Ahram, 2024-11-08 Proceedings of the AHFE International Conference on Human Factors in Design Engineering and Computing AHFE 2024 Hawaii Edition Honolulu Hawaii USA 8 10 December 2024 **LNG**

Offshore Production and Regasification Stuart Beadnall, John Simpson, Max Lemanski, 2025-04-23 This is the first book to focus on the law and practice relating to the production and delivery of liquified natural gas LNG using offshore floating facilities This segment of the offshore oil and gas industry has been growing over recent years and has now assumed special importance in the wake of interruption to international gas supplies with a number of countries turning to importing LNG through floating offshore regasification units in order to protect their energy security The reader will gain a thorough

understanding of the operational risks as far as these are relevant to contractual obligations and potential liabilities The book draws on the relevant maritime and commercial law applying this with specific focus on the requirements of offshore facilities liquefying carrying and storing a cargo at 162 C then regasifying and transferring the same onshore The contracts relating to the operation of these facilities mirror some aspects of conventional LNG vessel charters but include important additional features specific to offshore LNG operations The discharge of LNG from a sea going vessel into a receiving floating storage and regasification unit FSRU and the storage and regasification of LNG into the receiving pipeline may be problematic and lead to significant commercial consequences if there is underperformance The allocation of related risks as between the LNG owner and the FSRU operator and other interested parties is analysed in this book The authors also consider the specific legal issues pertaining to production of LNG offshore in a floating facility FLNG and the role of LNG as a transition fuel used to meet current low carbon targets This book will be invaluable to legal practitioners advising clients engaged in developing and operating offshore LNG projects project managers and related insurers financiers and commercial parties It will also be of direct relevance to gas production distribution and utility companies and to maritime commercial centres

Maritime Skills on Vessels & Shore - The STCW Convention's Relevance & Recommendations Dr.

(Capt.) Vivek Jain, 2023-07-11 This Book is of the seafarers by the seafarers for the seafarers Seafarers are the core of all maritime trade and their expectations perspectives alone should be at the centre of all solutions for maritime skills Taking this standpoint the editor has explored the issues of maritime skills with critical gaps following a framework of research methodology The issue of critical gaps in maritime skills is further exacerbated due to the impact on seafarers caused by changes in the ecosystem status relationship with stakeholders technology focus on renewable energy anxiety levels and so forth Furthermore stakeholders can no longer ignore the fact that seafarers are leaving a seagoing career after working for only a few years Therefore the editor has also explored the need to prepare seafarers for transition into maritime shore jobs to preserve their maritime skills within the maritime industry This exhaustive book can be used as a guide for further revisions or a revamp of the current STCW Convention The editor thereafter divided the researched critical gaps in maritime skills into four groups Jain's Model for Maritime Skills Panoptic Social Intelligence Upskilling Reskilling for onboard vessels skills and Portable Skills for future shore jobs Panoptic and Social Skills are core skills required for both on board vessels as well for maritime shore jobs Thereafter the editor embarked on a voyage to discover persuade collaborate with a number of exceptionally experienced subject matter experts over many months to collaboratively pursue many mini research projects across all selected maritime skills adopting specific methodology to plug these critical gaps These experts were drawn 1 from countries such as India the Philippines Romania South Korea Malaysia UAE the UK and Singapore 2 from both genders 3 from deck engine professionals settled ashore 4 with current experience in the industry and or at sea at a fundamental level and 5 from seafaring supplying nations recognising experiencing the relevant socio economic circumstances of seafarers

From this book seafarers will not only find ideas on how to plug gaps in their maritime skills but also how they can transition with their existing skills to other maritime jobs such as marine superintendents marine managers designated persons ashore managers supervising new build second hand vessels IT managers in the maritime domain marine surveyors marine experts investigators marine pilots in ports maritime arbitrators managers in shipyards and so forth The solutions in this book will also resolve the issue of the shortage and retention of seafarers

Ship's Officer's Guide to Port State Control Alexander Arnfinn Olsen, Fidaa Karkori, 2025-02-24 This book is a comprehensive guide to Port State Control PSC responsibilities and procedures offering invaluable insights for maritime professionals Through this book readers will learn the intricacies of PSC inspections contraventions and detentions as well as discharge requirements under MARPOL The chapters cover topics such as the Port State Control regime conduct of PSC officers detention of vessels and detailed inspections for vessel structural and equipment requirements The authors provide an expert analysis of investigations and inspections under MARPOL Annexes I and II control of operational requirements and certification of seafarers Particular attention is given to the ISM Code and PSC procedures related to LRIT This essential resource is designed for engineers maritime professionals and students in merchant ship operations maritime law and port procedures It offers a clear and unambiguous structure central to safety in safety critical industries Whether you are an academic or a practitioner in the field this book will enhance your understanding of PSC responsibilities and procedures
