Crimes That Changed Our World Paul H. Robinson,Sarah M. Robinson,2018-06-15 Can crime make our world safer Crimes are the worst of humanity s wrongs but oddly they sometimes trigger improvement in our lives Crimes That Changed Our World explores some of the most important trigger cases of the past century revealing much about how change comes to our modern world The exact nature of the crime outrage reform dynamic can take many forms and Paul and Sarah Robinson explore those differences in the cases they present Each case is in some ways unique but there are repeating patterns that can offer important insights about what produces change and how in the future we might best manage it Sometimes reform comes as a society wrestles with a new and intolerable problem Sometimes it comes because an old problem from which we have long suffered suddenly has an apparent solution provided by technology or some other social or economic advance Or sometimes the engine of reform kicks into gear simply because we decide as a society that we are no longer willing to tolerate a long standing problem and are now willing to do something about it As the amazing and often touching stories that the Robinsons present make clear the path of progress is not just a long series of course corrections sometimes it is a quick turn or an unexpected lurch In a flash we can suddenly feel different about present circumstances seeing a need for change and can often just as suddenly do something about it Every trigger

crime that appears in Crimes That Changed Our World highlights a societal problem that America has chosen to deal with each in a unique way But what these extraordinary and sometime unexpected cases have in common is that all of them describe crimes that changed our world **UnSelfie** Michele Borba,2017-05-23 Includes a Touchstone reading group guide in unnumbered pages at end of work Understanding Police Interrogation William Douglas Woody,Krista D. Forrest,2020-03-03 Uses techniques from psychological science and legal theory to explore police interrogation in the United States Understanding Police Interrogation provides a single comprehensive source for understanding issues relating to police interrogation and confession It sheds light on the range of factors that may influence the outcome of the interrogation of a suspect which ones make it more likely that a person will confess and which may also inadvertently lead to false confessions There is a significant psychological component to police interrogations as interrogators may try to build rapport with the suspect or trick them into thinking there is evidence against them that does not exist Also important is the extent to which the interrogator is convinced of the suspect s guilt a factor that has clear ramifications for today s debates over treatment of black suspects and other people of color in the criminal justice system The volume employs a totality of the circumstances approach arguing that a number of integrated factors such as the characteristics of the suspect the characteristics of the interrogators interrogation techniques and location community perceptions of law enforcement and expectations for jurors and judges all contribute to the nature of interrogations and the outcomes and perceptions of the criminal justice system The authors argue that by drawing on this approach we can better explain the likelihood of interrogation outcomes including true and false confessions and provide both scholars and practitioners with a greater understanding of best practices going forward *The Crisis-Prone Society: A Brief Guide to Managing the Beliefs that Drive Risk in Business* I. Mitroff,C. Alpaslan,2014-07-08 The Crisis Prone Society offers preventative measures that can be taken by business professionals and scholars alike to alleviate the growing potential for crises today These measures are distilled by close analysis of our recent social history of disasters **Here/There** Kris Paulsen,2017-02-17 An examination of telepresence technologies through the lens of contemporary artistic experiments from early video art through current drone vision works Telepresence allows us to feel present through vision hearing and even touch at a remote location by means of real time communication technology Networked devices such as video cameras and telerobots extend our corporeal agency into distant spaces In Here There Kris Paulsen examines telepresence technologies through the lens of contemporary artistic experiments from early video art through current drone vision works Paulsen traces an arc of increasing interactivity as video screens became spaces for communication and physical tactile intervention She explores the work of artists who took up these technological tools and questioned the aesthetic social and ethical stakes of media that allow us to manipulate and affect far off environments and other people to touch metaphorically and literally those who cannot touch us back Paulsen examines 1970s video artworks by Vito Acconci and Joan Jonas live satellite performance projects by Kit Galloway and Sherrie Rabinowitz and CCTV

installations by Chris Burden These early works she argues can help us make sense of the expansion of our senses by technologies that privilege real time over real space and model strategies for engagement and interaction with mediated others They establish a political aesthetic and technological history for later works using cable TV infrastructures and the World Wide Web including telerebotic works by Ken Goldberg and Wafaa Bilal and artworks about military drones by Trevor Paglen Omar Fast Hito Steyerl and others These works become a meeting place for here and there
