Organizational Models and Enterprise Strategies Boughzala, Imed, Duede, Aurelie, 2011-09-30 In the last few years knowledge management practices have evolved in organizations The introduction of Web 2.0 technologies has encouraged new methods of information usage and knowledge sharing which are frequently used by employees who already rely on these Web 2.0 technologies in their personal lives Knowledge Management 2.0 Organizational Models and Enterprise Strategies provides an overview of theoretical and empirical research on knowledge management generation in the Web 2.0 age Research in this book highlights knowledge management evolution with a global focus and investigates the impact knowledge management 2.0 has on business models enterprise governance and strategies human resources and IT design implementation and appropriation in organizations *Knowledge Management and Innovation* Pierre Barbaroux, Amel Attour, Erik Schenk, 2016-07-14 This book explores the relationships between knowledge management KM processes and innovation management The geographical extension of markets and intensification of competition have led firms to experiment with novel approaches to innovation New organizational forms emerged in which firms collaborate with various stakeholders to create absorb integrate and protect knowledge This book explores how knowledge management processes evolve with firms implementation of interactive collaborative and open innovation models and it identifies the various knowledge types and processes involved throughout the different phases of the innovation process The authors provide operational typologies for understanding innovative firms capabilities and knowledge management practices and also discuss the main properties of four models of interactive innovation namely open innovation user centric innovation community based innovation and crowdsourcing *Information Systems for Knowledge Management* Inès Saad, Camille

Rosenthal-Sabroux, Faiez Gargouri, 2014-03-06 More and more organizations are becoming aware of the importance of tacit and explicit knowledge owned by their members which corresponds to their experience and accumulated knowledge about the firm activities. However, considering the large amount of knowledge created and used in the organization especially with the evolution of information and communications technologies, the firm must first determine the specific knowledge on which it is necessary to focus. Creating activities to enhance identification, preservation, and use of this knowledge is a powerful mean to improve the level of economical performance of the organization. Thus, companies invest on knowledge management programs in order to develop a knowledge sharing and collaboration culture to amplify individual and organizational learning to make easier accessing and transferring knowledge and to insure knowledge preservation. Several researches can be considered to develop knowledge management programs supported by information and knowledge systems according to their context, their culture, and the stakeholders viewpoints.

Knowledge Management Jean-Louis Ermine, 2018-07-01 Le Knowledge Management ou gestion des connaissances est un enjeu stratégique pour les entreprises privées et publiques ainsi que pour les organismes de normalisation tels que l'Organisation internationale de normalisation ISO et l'Agence internationale de l'énergie atomique AIEA qui l'ont reconnu dans leurs exigences. Cependant, le Knowledge Management reste un concept mal défini et les processus mettre en œuvre dans les entreprises ne sont pas tous bien connus. Cet ouvrage fournit un guide conceptuel et méthodologique sur le sujet. Il est le résultat de plus de vingt années de recherche dans différents laboratoires et de retour d'expérience d'applications réalisées dans un large ventail d'entreprises publiques et privées travers le monde. Avec des sections dédiées aux points de vue théoriques et pratiques, il présente une vision globale et cohérente des principaux concepts sur lesquels doit s'appuyer le Knowledge Management.

ECKM2014-Proceedings of the 15th European conference on Knowledge Management Carla Vivas, 2014-10-01 The world economy in which we are living poses challenges that lead to a realization that more of the same will be difficult to sustain. This provides an illustration that in order to create new or modified knowledge practices, strengthen customer relationships, and thus positively influence customer satisfaction, organizations must be flexible in configuring, combining knowledge and knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus, unlearning/forgetting becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge

work that leverages the ECKM community's in depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning and knowledge management. How can organizations tailor use and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management, KM and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business management and organization science as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight i.e. do not place considerable additional burden on users and KM experts, allow an incremental adoption i.e. do not require large up front investment before any return of investment is at least visible and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge intensive organizations.

Sustainable Entrepreneurship, Renewable Energy-Based Projects, and Digitalization Amina Omrane, Khalil Kassmi, Muhammad Wasim Akram, Ashish Khanna, Md Imtiaz Mostafiz, 2020-12-27 Sustainable Entrepreneurship is nowadays considered as a discipline at the cross roads of many others. This book describes recent cases, techniques and tools proposed for leaders, entrepreneurs and practitioners who are involved and responsible for making strategic decisions in their companies and aiming at sustainable development. This book highlights the use of new business models, methods that can be employed by organizations and researchers to save millions of dollars to enhance the economic growth as well as to resolve environmental and social issues via sustainable networks, renewable energy distribution and social green entrepreneurship. It will provide a comprehensive discussion of practical techniques like Machine Learning, Robotics, Photovoltaic solar energy in the field of renewable energy and other digital tools such as digital marketing, crowdsourcing platforms and digital currency. Meanwhile, it will enlighten the way for entrepreneurs and decision makers by helping them to learn how to grow their business. The focus will be on how to benefit from these techniques to develop sustainable and renewable energy based projects as well as digitalized new ventures. The book walks the reader through the latest emerging trends in digitalization that can support practitioners, managers, entrepreneurs and researchers to help them appreciate the application of sustainable solutions in various functional domains.

Information and Knowledge System Pierre-Emmanuel Arduin, Michel Grundstein, Camille Rosenthal-Sabroux, 2015-06-29 The purpose of this book is to question the relationships involved in decision making and the systems designed to support it: decision support systems (DSS). The focus is on how these systems are engineered to stop and think about the questions to be asked throughout the engineering process and in particular about the impact designers' choices have on these systems. This therefore involves identifying the elements of the problem of decision support systems.
