Knowledge And Reality Selected Essays:

Knowledge and Reality Colin McGinn, 2002 **Knowledge and Reality** Colin McGinn, 1999 Knowledge and Reality brings together a selection of Colin McGinn's philosophical essays from the 1970s to the 1990s whose unifying theme is the relation between the mind and the world. The essays range over a set of prominent topics in contemporary philosophy including the analysis of knowledge, the a priori necessity, possible worlds, realism, mental representation, appearance and reality, and colour. McGinn has written a new postscript to each essay placing it in its philosophical context by sketching the background against which it was written, explaining its relations to other notable work, and offering his current reflections on the topic. The volume thus traces the development of McGinn's ideas and their role in some central philosophical debates. Seen together, the essays offer a many-sided defence of realism while emphasizing the epistemological price that realism exacts.

Knowledge and Reality Thomas M. Crisp, Matthew Davidson, David Vander Laan, 2006-07-19 This volume was conceived as a Festschrift to surprise Alvin Plantinga on his 70th birthday. That original plan was not entirely successful. For one thing, the day came and went well before the work was complete. For another, the project wasn't quite a surprise. Plantinga caught wind of it though not of its details before the unveiling. The occasion was marked however by a presentation of a projected table of contents and an early draft of the cover painting by Keith Lehrer. Plantinga then saw the details and was quite taken aback that the editors and a few contributors had come to South Bend from as far as Virginia, Florida, and California to celebrate. Now we are pleased to offer the essays themselves. The collection ranges widely over metaphysics and epistemology. Its wingspan testifies to the breadth both of Plantinga's own work and of the audience that has valued it. Some of the essays deal with ontology, examining actualism, presentism, antirealism, properties, and artifacts. Several essays in epistemology raise skeptical questions, work through the implications of naturalism or internalism, and engage Plantinga's own Reidian account of warrant. Other contributions consider the bearing of philosophical ideas on the Christian faith, of split brain cases on the doctrine of the Trinity, for example, and of materialism on the afterlife. The contributors are friends, colleagues, and former students of Plantinga. The editors thank all of them for their eager participation in this project.

Selected Essays by Frank H. Knight, Volume 1 Frank H. Knight, 1999 Frank H. Knight 1885-1972 was a central figure, many say the dominant influence, in the development of the Chicago School of Economics at the University of Chicago in the 1930s and 1940s, where he taught future Nobel laureates Milton Friedman, James Buchanan, George Stigler, and many other notable scholars. It was Knight's embedded skepticism about the reach of economic knowledge that set the stage for the laissez-faire economics that matured at the University in the 1950s and 1960s. But as important as Knight's technical economic contributions were, he never strayed far from his broad philosophical interests and concern for the state of modern liberal democracy. Ross B. Emmett's selection of Knight's essays is the first to offer a comprehensive picture of the work of this notable social scientist over the span of his career. Included are not only Knight's most influential writings but also a

number of uncollected papers which have not previously been widely accessible These essays illustrate Knight s views on the central debates regarding economics social science ethics education and modern liberalism Volume 1 What is Truth in Economics contains fifteen of Knight s papers up through 1940 Volume 2 Laissez Faire Pro and Con includes fourteen of Knight s papers from 1940 through 1967 including Socialism The Nature of the Problem and The Sickness of Liberal Society These twenty nine essays together stand not only as a monument to one of economics most significant and original thinkers but will also serve as an invaluable resource for economists philosophers and political scientists interested in the development of the western liberal tradition Women, Knowledge, and Reality Ann Garry, Marilyn Pearsall, 2015-07-17 This second edition of Women Knowledge and Reality continues to exhibit the ways in which feminist philosophers enrich and challenge philosophy Essays by twenty five feminist philosophers seventeen of them new to the second edition address fundamental issues in philosophical and feminist methods metaphysics epistemology and the philosophies of science language religion and mind body This second edition expands the perspectives of women of color of postmodernism and French feminism and focuses on the most recent controversies in feminist theory and philosophy The chapters are organized by traditional fields of philosophy and include introductions which contrast the ideas of feminist thinkers with traditional philosophers The collected essays illustrate both the depth and breadth of feminist critiques and the range of contemporary feminist theoretical perspectives *Knowledge First* J. Adam Carter, Emma C. Gordon, Benjamin Jarvis, 2017-11-10 Knowledge First constitutes what is widely regarded as one of the most significant innovations in contemporary epistemology in the past 25 years Knowledge first epistemology is the idea that knowledge per se should not be analysed in terms of its constituent parts e g justification belief but rather that these and other notions should be analysed in terms of the concept of knowledge This volume features a substantive introduction and 13 original essays from leading and up and coming philosophers on the topic of knowledge first philosophy The contributors essays range from foundational issues to applications of this project to other disciplines including the philosophy of mind the philosophy of perception ethics and action theory Knowledge First Approaches in Epistemology and Mind aims to provide a relatively open ended forum for creative and original scholarship with the potential to contribute and advance debates connected with this philosophical project **Knowledge and Reality** P. Parrini, 2013-11-11 XIV The stability of a philosophical construction will depend not only upon the solidity of the blocks of the pillars and architraves that make it up but also upon the way in which all these parts are connected Of course it will not be possible to argue for every single part of a philosophical building to do so would mean to embark in a virtually endless enterprise Accordingly some of the parts of a philosophical building will have to be taken from the literature on the subject as ready made or semi finished elements while others will be argued for in the course of building This is what happened in my work too In some cases for instance in the case of epistemic relativism my concern was to illustrate theses which I believed to be sufficiently consolidated rather than to argue for them In other cases where I

was directly engaged in building the theory that I want to formulate I did exactly the opposite This is what I have tried to achieve for example for those proper architraves of my construction viz the connection between scepticism and metaphysical realism and the thesis of the nonnative value of the fundamental epistemological notions truth objectivity and rationality

The Oxford Handbook of Epistemology Paul K. Moser, 2002 Contains nineteen newly commissioned articles by top philosophers on various aspects of the theory of knowledge The articles survey the field as well as make original contributions to contemporary debates

New Issues in Epistemological Disjunctivism Casey Doyle, Joseph Milburn, Duncan Pritchard, 2019-04-29 This is the first volume dedicated solely to the topic of epistemological disjunctivism The original essays in this volume written by leading and up and coming scholars on the topic are divided into three thematic sections The first set of chapters addresses the historical background of epistemological disjunctivism It features essays on ancient epistemology Immanuel Kant J L Austin Edmund Husserl and Ludwig Wittgenstein The second section tackles a number of contemporary issues related to epistemological disjunctivism including its relationship with perceptual disjunctivism radical skepticism and reasons for belief Finally the third group of essays extends the framework of epistemological disjunctivism to other forms of knowledge such as testimonial knowledge knowledge of other minds and self knowledge

Epistemological Disjunctivism is a timely collection that engages with an increasingly important topic in philosophy It will appeal to researchers and graduate students working in epistemology philosophy of mind and philosophy of perception

Knowledge, Number and Reality Nils Kürbis, Bahram Assadian, Jonathan Nassim, 2021-12-16 Throughout his career Keith Hossack has made outstanding contributions to the theory of knowledge metaphysics and the philosophy of mathematics This collection of previously unpublished papers begins with a focus on Hossack's conception of the nature of knowledge his metaphysics of facts and his account of the relations between knowledge agents and facts Attention moves to Hossack's philosophy of mind and the nature of consciousness before turning to the notion of necessity and its interaction with a priori knowledge Hossack's views on the nature of proof logical truth conditionals and generality are discussed in depth In the final chapters questions about the identity of mathematical objects and our knowledge of them take centre stage together with questions about the necessity and generality of mathematical and logical truths

Knowledge Number and Reality represents some of the most vibrant discussions taking place in analytic philosophy today

Wilfrid Sellars and Buddhist Philosophy Jay L. Garfield, 2018-12-07 The aim of this book is to address the relevance of Wilfrid Sellars's philosophy to understanding topics in Buddhist philosophy While contemporary scholars of Buddhism often take Sellars as a touchstone for philosophical analysis and while many take Sellars's corpus as their entry into current philosophical discourse fewer contemporary philosophers have crossed the bridge in the other direction using Sellarsian ideas as a way of entering into Buddhist philosophy The essays in this volume written by both philosophers and Buddhist Studies scholars are divided into two sections organized around two of Sellars's essays that have been particularly influential in Buddhist Studies

Philosophy and the Scientific Image of Man and Empiricism and the Philosophy of Mind The chapters in Part I generally address questions concerning the two truths while those in Part II concern issues in epistemology and philosophy of mind The volume will be of interest to Sellars scholars to scholars interested in the contemporary interaction of Buddhist philosophy and Western philosophy and to scholars of Buddhist Studies

A Realist Approach for Qualitative Research Joseph A. Maxwell, 2012 This ground breaking book makes the case for adopting a realist philosophical perspective for qualitative research Joseph Maxwell argues for critically applying a realist ontology to a number of important theoretical and methodological issues This can provide a stronger justification for what qualitative researchers do he contends and significantly contribute to current theories and practices The book outlines critical realism and considers its implications for how we conceptualize meaning and culture causation and diversity The author applies critical realist ideas and approaches to the design and methods of qualitative research and presents two in depth case studies of projects he conducted describing how realist and other perspectives informed the research the methods and the conclusions

Concepts and Their Role in Knowledge Allan Gotthelf, James G. Lennox, 2014-08-01 Philosopher novelist Ayn Rand 1905 1982 is a cultural phenomenon Her books have sold more than twenty eight million copies and countless individuals speak of her writings as having significantly influenced their lives Despite her popularity Rand s philosophy of Objectivism has received little serious attention from academic philosophers Concepts and Their Role in Knowledge offers scholarly analysis of key elements of Ayn Rand s radically new approach to epistemology The four essays by contributors intimately familiar with this area of her work discuss Rand s theory of concepts including its new account of abstraction and essence and its central role in her epistemology how that view leads to a distinctive conception of the justification of knowledge her realist account of perceptual awareness and its role in the acquisition of knowledge and finally the implications of that theory for understanding the growth of scientific knowledge The volume concludes with critical commentary on the essays by distinguished philosophers with differing philosophical viewpoints and the author s responses to those commentaries This is the second book published in Ayn Rand Society Philosophical Studies which was developed in conjunction with the Ayn Rand Society to offer a fuller scholarly understanding of this highly original and influential thinker The Ayn Rand Society an affiliated group of the American Philosophical Association Eastern Division seeks to foster scholarly study by philosophers of the philosophical thought and writings of Ayn Rand

New Models of Religious Understanding Fiona Ellis, 2018 What does it mean to understand the world religiously How is such understanding to be distinguished from scientific understanding What does it have to do with religious practice transfiguring love and spiritual well being *New Models of Religious Understanding* investigates these questions to set a new and exciting agenda for philosophy of religion Featuring contributions from leading scholars in the field the volume cuts across the supposed divide between analytic and continental approaches to the subject and engages the interest of a broad range of philosophical and theological readers

The

Ideological Condition: Selected Essays on History, Race and Gender Himani Bannerji, 2020-09-25 The Ideological Condition Selected Essays on History Race and Gender is a reader comprised of many of Himani Bannerji's English writings over a long period of teaching and research in Canada and India Bannerji creates an interdisciplinary analytical method and extends the possibilities of historical materialism by predominantly drawing on Marx Gramsci and Dorothy Smith Essays here instantiate Marx's general proposition that while all ideology is a form of consciousness all forms of consciousness are not ideological Applying this insight to issues ranging from patriarchy through race class nationalism liberalism and fascism Bannerji breaks through East West binaries challenging the mystifying approaches to the constitution of the social and shows that a sustained struggle against ideological thinking is at the heart of a fundamental socialist struggle Shortlisted for the Deutscher Memorial Prize 2021

Aiming at Truth N. Unwin, 2006-11-28 This book argues that it is not obvious what we mean by saying our beliefs and assertions are truth directed Do we weaken our notion of a belief if we deal with radical scepticism without surrendering to idealism This book defends a radically new ecological model of knowledge examining what might happen if we abandoned genuine belief

Are Science And Mathematics Socially Constructed? A Mathematician Encounters Postmodern Interpretations Of Science Richard C Brown, 2009-02-19 This book is a history analysis and criticism of what the author calls postmodern interpretations of science PIS and the closely related sociology of scientific knowledge SSK This movement traces its origin to Thomas Kuhn's revolutionary work The Structure of Scientific Revolutions 1962 but is more extreme It believes that science is a social construction having little to do with nature and is determined by contextual forces such as the race class gender of the scientist laboratory politics or the needs of the military industrial complex Since the 1970s PIS has become fashionable in the humanities social sciences and ethnic or women's studies as well as in the new academic discipline of Science Technology and Society STS It has been attacked by numerous authors and the resulting conflicts led to the so called Science Wars of the 1990s While the present book is also critical of PIS it focuses on its intellectual and political origins and tries to understand why it became influential in the 1970s The book is both an intellectual and a political history It examines the thoughts of Karl Popper Karl Mannheim Ludwik Fleck Thomas Kuhn Paul Feyerabend David Bloor Steve Woolgar Steve Shapin Bruno Latour and PIS like doctrines in mathematics It also describes various philosophical contributions to PIS ranging from the Greek sophists to 20th century post structuralists and argues that the disturbed political atmosphere of the Vietnam War era was critical to the rise of PIS

Actual Consciousness Ted Honderich, 2014 What is it for you to be conscious There is no consensus in philosophy or science it has remained a mystery Ted Honderich develops a brand new theory of consciousness according to which perceptual consciousness is external to the perceiver It exists in a subjective physical world dependent on both you and the objective physical world

The Routledge Handbook of Postcolonial Social Work Tanja Kleibl, Ronald Lutz, Ndangwa Noyoo, Benjamin Bunk, Annika Dittmann, Boitumelo Seepamore, 2019-07-30 The Routledge Handbook of Postcolonial Social Work reflects on and dissects the challenging issues

confronting social work practice and education globally in the post colonial era By analysing how countries in the so called developing and developed world have navigated some of the inherited systems from the colonial era it shows how they have used them to provide relevant social work methods which are also responsive to the needs of a postcolonial setting This is an analytical and reflexive handbook that brings together different scholars from various parts of the world both North and South so as to distill ideas from scholars relating to ways that can advance social work of the South and critique social work of the North in so far as it is used as a template for social work approaches in postcolonial settings It determines whether and how approaches knowledge bases and methods of social work have been indigenised and localised in the Global South in the postcolonial era This handbook provides the reader with multiple new theoretical approaches and empirical experiences and creates a space of action for the most marginalised communities worldwide It will be of interest to researchers and practitioners as well as those in social work education

Knowledge and Experience in the Philosophy of F.H. Bradley
Thomas Stearns Eliot, 1989 T S Eliot left Harvard during his third year of study in the department of philosophy and went to England Forty six years later he authorized the publication of his doctoral dissertation Here we have a reprint of his sympathetic but not entirely uncritical study of the English idealist philosopher F H Bradley
