or not for profit or charitable organizations and social enterprises stepping in to mitigate the loss of vital public services This development also gives rise to the likelihood that third sector financial institutions such as credit unions and a possible Big Society Bank will grow in importance The performance of all these enterprises looks set to become a much more critical issue than it has been in the past The editors have gathered in this volume chapters reflecting the fact that third sector organizations are not the same as conventional businesses and are also subtly different from the public sector There is currently a dearth of knowledge and a lack of research into issues around performance in the Third Sector or Civil Society This book begins to fill a void in the knowledge base The internationally sourced contributions represent a balanced offering of academic research findings and practitioner accounts from the Third Sector together with a section devoted specifically to third sector finance institutions This book will appeal internationally to policy makers within the third sector or involved in the management of n f p and voluntary organisations as well as to those with responsibility for wider public policy scholars teaching or researching in this area and students of business and management preparing for roles in social enterprises
