Learning, Marginalization, and Improving the Quality of Education in Low-income Countries Daniel A. Wagner, Nathan M. Castillo, Suzanne Grant Lewis, 2022-02-21

Improving learning evidence and outcomes for those most in need in developing countries is at the heart of the United Nations Sustainable Development Goal on Education SDG4. This timely volume brings together contributions on current empirical research and analysis of emerging trends that focus on improving the quality of education through better policy and practice particularly for those who need improved learning at the bottom of the pyramid. LBOP. This volume brings together academic research experts, government officials and field based practitioners. National and global experts present multiple broad thematic papers ranging from the effects of migration and improving teaching to the potential of educational technologies and better metrics for understanding and financing education. In addition, local experts, practitioners and policymakers describe their own work on LBOP issues being undertaken in Kenya, India, Mexico and Ivory Coast. The contributors argue persuasively that learning equity is a moral imperative but also one that will have educational, economic and social impacts. They further outline how achieving SDG4 will take renewed and persistent effort by stakeholders to use better measurement tools to promote learning achievement among poor and marginalized children. This volume builds on the second international conference on Learning at the Bottom of the Pyramid LBOP2. It will be an indispensable resource for policymakers, researchers and government think tanks and local experts as well as any readers interested in the implementation of learning equity across the globe. In *The Talented and Gifted*, Kali loves storytelling. He used to listen closely to the wise words and advice of his grandfather. Kali works hard at school and has gained the respect of everyone he meets. The boy excels in academics and sports. One day while herding animals, Kali hears a woman shouting for help. Kali rescues her after she was bitten by a snake. As a result, Kali is given a sports scholarship and is sent to Berlin to represent his country. Another boy and two local girls are also given scholarships and the four set off for Europe where they spark interest from researchers because of their athletic talent. Doctors visit the village of Bamba to study the local foods. Will the researchers discover a source for why this village, known for breeding champions, is the home of *The Talented and Gifted*?
