, Go Green Get Lean Kate Geagan, 2009-03-17 Over the past 20 years America has been steadily marching toward a diet that is more drenched in fossil fuel than any key nutrient Experts estimate that it now takes roughly 7 to 10 calories of fossil fuel energy to bring one calorie of food energy to the American plate Not only have our eating habits turned us into an increasingly overweight society but the alarming truth is that our food choices are having as much of an impact on the planet as the cars we drive Go Green Get Lean is the perfect eating plan for our time Revealing easy to follow steps anyone can take to eat for a healthy body and planet and drop up to 9 pounds in the first 2 weeks Kate Geagan helps readers see the questionable value of convenience foods and explains why going green doesn't require a drastic vegan overhaul Because there are many nutritional benefits to be drawn from some non plant based food choices she points readers to the best selections including occasional splurges they can enjoy in good conscience In learning to make truly LEAN choices Kate offers the following straightforward formula Before eating food ask yourself Local or global What was the Energy used to bring it to my plate Include processing packaging transportation and temperature of food Animal or plant Plant foods are greener Is this Necessary Is this food critical to my health and weight goals This trailblazing work the first to offer a specific weight loss plan along with the promise of a lowered carbon footprint makes it possible for readers to help the environment and their waistlines at the same time **InfoWorld**, 1994-09-05 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects

Poole, 2020-04-17 What does climate change have to do with religion and spirituality Even though a changing environment will have a dire impact on human populations affecting everything from food supply to health to housing the vast majority of Americans do not consider climate change a moral or a religious issue Yet the damage of climate change a phenomenon to which we all contribute through our collective carbon emissions presents an unprecedented ethical problem one that touches

a foundational moral principle of Christianity Jesus s dictate to love the neighbor This care for the neighbor stretches across time as well as space We are called to care for the neighbors of the future as well as those of the present How can we connect the ethical considerations of climate change the knowledge that our actions directly or indirectly cause harm to others to our individual and collective spiritual practice Christianity in a Time of Climate Change offers a series of reflective essays that consider the Christian ethics of climate change and suggest ways to fold the neighbors of the future into our spiritual lives as an impetus to meaningful personal social and ultimately environmental transformations

Green Meat? Ryan M. Katz-Rosene,Sarah J. Martin,2020-04-16 Green Meat takes a multifaceted approach to the issues of industrialized agricultural production and its relationship to climate change It argues that one singular solution to this problem would undermine the myriad of ways that meat is consumed across regional and cultural lines Although meat may always be a global staple of the human diet it is not too late to re examine current food systems through the framework of sustainability and ecological prosperity Alternatives Journal
