Goddens Guide To Ironstone Stone And Granite Ware:

Godden's Guide to Ironstone, Stone & Granite Wares Geoffrey A. Godden, 1999-06-01 Surprisingly this is the first book to be devoted to British Ironstone China and the related stone china and granite ceramic bodies Yet they are as important in their way as the well known highly respected and well documented English creamwares or indeed bone china itself Initially the ironstone type bodies were introduced like most European ceramics to emulate rival and undersell the vast and popular importation of Oriental porcelains Not only did the ironstone manufacturers succeed in this ideal but they progressed to take over the trade develop new markets and supply the world with inexpensive but durable tableware In the middle and latter half of the nineteenth century the British potters won markets undreamed of by the pioneers in the trade The major manufacturers such as Mason and Spode produced superbly potted richly decorated ironstone or stone china table services and ornamental goods Yet perhaps more importantly the smaller firms concentrated on less expensive utilitarian objects that were shipped to all parts of the world for everyday use A large part of the world therefore would have eaten off or drunk from British ironstone type wares at this time

Ceramic Makers' Marks Erica Gibson, 2016-06-16 This book provides a catalogue of ceramic makers marks of British French German and American origin found in North American archaeological sites Consisting of nearly 350 marks from 112 different manufacturers from the mid 19th through early 20th century this catalog provides full information on the history of a mark and its variants as well as details about the manufacturer The indexes allow for searches by city country state graphic element mark type word and maker

Ceramics and Globalization Neil Ewins, 2017-05-04 Neil Ewins study of the Staffordshire potteries in a period of great global change traces how ceramics production has been affected by globalisation in both familiar and unexpected ways Although many manufacturers such as Wedgwood initially moved production to cheaper labour markets in East Asia others remained in or returned to England once it became clear that outsourcing manufacturing was affecting the brand value and customer perception of their products Neil Ewins explores the complex behaviour of the UK ceramics industry using a combination of evidence from the press trade journals ceramic objects and primary interview evidence of manufacturers retailers and a ceramic designer Ewins suggests that although the surface designs of UK ceramics invariably reflect diverse cultural and stylistic influences a notion of authenticity often still resides in the place and context in which the ceramic product was originally made Overall the book argues that UK ceramics remain culturally complex because of issues of supply and demand and ties to heritage imagined or otherwise Within a context of globalization the book highlights compelling issues which have huge ramifications on UK manufacturing futures
