

## How Busy Ant Maths supports the 2014 Primary National Curriculum for Mathematics

All of the components of Busy Ant Maths emphasise, and provide guidance on, the importance of the cyclical nature of teaching in order to best promote learning and to raise pupils' attainment.

### Planning

*Busy Ant Maths* supports teachers in planning a successful mathematics programme for their unique teaching context and ensures:

- a clear understanding of pupils' pre-requisite skills before undertaking particular tasks and learning new concepts
- considered progression from one lesson to another
- regular revisiting and extension of previous learning
- a judicious balance of objectives, and the time dedicated to each one
- the use of a consistent format and structure.

The elements of *Busy Ant Maths* that form the basis for planning can be summarised as follows:

### Long-term plans

The 2014 Primary National Curriculum for Mathematics constitutes the long-term plan for schools to follow. By closely reflecting the Programmes of Study, the *Busy Ant Maths* course embodies this long-term plan.

### Medium-term plans

The *Busy Ant Maths* Medium-term Plans show termly outlines of units of work with National Curriculum Attainment Target references, and specific lesson objectives. Using the *Busy Ant Maths* online Planning Tool via *Collins Connect*, these plans can be easily adapted to meet the specific needs of individual schools.

### Short-term plans

Individual Lesson Plans and accompanying Learning activities represent the majority of each yearly Teacher's Guide. The lessons provide short-term plans that can easily be followed closely, or used as a 'springboard' and varied to suit specific needs of particular classes. An editable 'Weekly Planning Grid' is also provided on *Collins Connect*, which individual teachers can fully adapt.

Handbook of Creativity John A. Glover, Royce R. Ronning, Cecil R. Reynolds, 2013-03-09 The motivation underlying our development of a handbook of creativity was different from what usually is described by editors of other such volumes Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference Instead this handbook was conceptualized as an attempt to provide structure and organization for a field of study that from our perspective had come to be a large scale example of a degenerating research program see Brown Chapter 1 The handbook grew out of a series of discussions that spanned several years At the heart of most of our interactions was a profound unhappiness with the state of research on creativity Our consensus was that the number of good works published on creativity each year was small and growing smaller Further we could not point to a journal text or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of research programs in creativity At the same time we were casting about for a means of honoring a dear friend E Paul Torrance Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views
