

THE LOWDOWN ON HOW TO PREVENT SEXUALLY TRANSMITTED DISEASES

Practice Abstinence

The surest way to avoid STDs is to not have sex.

This means not having vaginal, oral, or anal sex.

Have Fewer Partners

Agree to only have sex with one person who agrees to only have sex with you.

Make sure you both get tested to know for sure that neither of you has an STD. This is one of the most reliable ways to avoid STDs.

Talk With Your Partner

Talk with your sex partner(s) about STDs and staying safe before having sex.

It might be uncomfortable to start the conversation, but protecting your health is your responsibility.

CDC estimates there are **MILLIONS** of new STD infections in the United States each year.

Anyone who is sexually active can get an STD.

Some groups are more affected by STDs and their outcomes.

The Good News

STDs **ARE** preventable. There are steps you can take to keep yourself and your partner(s) healthy.

Here's How You Can Avoid Giving or Getting an STD:

Use Condoms

Using a condom correctly every time you have sex can help you avoid STDs.

Condoms reduce the risk of infection for gonorrhea, HIV, chlamydia, syphilis, and herpes. The longer or better you use them with your partner, the more likely you are to avoid STDs.

Most people say they used a condom the first time they ever had sex, but when asked about the last four weeks, how often regular condom use had a condom every time.

Get Vaccinated

The most common STD can be prevented by a vaccine.

The HPV vaccine is safe, effective, and can help you avoid HPV-related health problems like genital warts and cancer.

Who should get the HPV vaccine?

All people ages 11 to 26 should get the HPV vaccine. It's a one-time shot.

Get Tested

Many STDs don't have symptoms, but they can still cause health problems.

The only way to know for sure if you have an STD is to get tested.

If You Test Positive...

Getting an STD is not the end!

Many STDs are curable and all are treatable.

If either you or your partner is infected with an STD that can be cured, both of you need to start treatment immediately to avoid getting reinfected.
