☒ a. Mice injected with bacteria from smooth colonies died.
☐ b. Mice injected with bacteria from rough colonies died.
☐ c. Mice injected with heat-killed bacteria from smooth colonies died.
☒ d. Mice injected with a mixture of bacteria from heat-killed smooth colonies and live rough colonies died.

because geneticists have begun to explore ways to prevent and repair defective genes in all humans In this book he considers whether genetic engineering will exacerbate social injustices and or lead to a public safety issue For instance in 2012 virologists in the U S and the Netherlands genetically engineered avian bird flu to be more transmissible between mammals These scientists argued that virus transmission between mammals enables us to make vaccines to prevent pandemics They never considered what would happen if the virus accidentally escaped the laboratory Meanwhile some scientists are experimenting with designer babies altering genes to remove diseases and even programming certain traits Join the author as he considers whether scientists are playing God as well as the risks we face by altering genetics in *The New Eugenics*
