5300 trainers along with 15 530 pilots crew members and ground personnel in over 52 000 domestic accidents These statistics don t compare to the huge numbers of RAF 8th Air Force and Luftwaffe losses during the European air war but the numbers are still frightening Between 1942 1945 US aviation losses to accidents 12 400 exceeded combat losses 4500 to the Japanese For every plane shot down in the South Pacific there were three lost to accidents within the United States While memoirs of those who served histories of military and political leaders and books about combat abound very little has been written about the terrible toll of aviation training accidents during the war Beneath Haunted Waters is unique because it tells this hardly known and little appreciated story Most information on this subject is covered in official reports It appears in a casual way in many memoirs There are a few histories of the air war during World War II that mention aviation accidents during training or once the boys were in theater There has been no popular academic or comprehensive book on the subject I propose to cover this subject within the more personal story of what happened to the two Liberators that wound up in Huntington Lake and Hester Lake Usually pilots and crews of World War II aircraft were neither old enough to vote nor to drink Many had never driven a car or taken a train ride much less been in an airplane Nine months after enlistment they were flying the most technologically advanced high performance machines ever built The same could be said for their navigation equipment and radio gear But aviation had been around for only 40 years Aircraft design was still in its infancy Engines failed pilots flew into mountains navigators got lost radios broke and weather forecasts were frequently and fatally wrong
