of developing managers I've observed the barriers that unintentionally arise in the Objective Setting Process Through delivering SMART Objective Setting workshops designing and implementing Performance Management Processes and coaching leaders through the process of developing High Performance teams I have tested my theories and solutions and clients have seen increased engagement and performance This is particularly so in the area of behavioural objectives You know those behavioural issues such as poor communication or lack of judgement that negatively impact performance but are hard to articulate How do you set a tangible objective around influencing skills This book explains how to do just that and gives you the tools to diagnose what might be going on behind the behavioural performance Editorial Reviews of SMART Objective Setting for Managers I'm not typically a fan of management type books and the only other one I remember liking was Heart of Change by Kotter so this book is in good company I found that it gained momentum for me the further into it I got I reckon that's because of my own bias assumption that I know this stuff already Chapter 8 really spoke to me and I could see how the strings of the earlier chapters were pulled together here I think this book might have even convinced me to alter my approach to goal setting Paul Clements Head of Change Release Transition and Configuration Management Why was this book not written years ago As leaders we make too many assumptions and this results in frustration This book explains the dynamics of what goes on between two people and what can go wrong It highlights the learning points through stories It made me stand back and think about my approach and what can be done differently Well done Brendan O Donovan Managing Partner DFMG Solicitors
