God And The Cosmos Divine Activity In Space Time And History:

God and the Cosmos Harry Lee Poe, Jimmy H. Davis, 2012-02-16 Theologian Harry Lee Poe and chemist Jimmy H Davis argue that God's interaction with our world is a possibility affirmed equally by the Bible and the contemporary scientific record Rather than confirming that the cosmos is closed to the actions of the divine advancing scientific knowledge seems to indicate that the nature of the universe is actually open to the unique type of divine activity portrayed in the Bible Echoes of Coinherence W. Ross Hastings, 2017-07-28 This book re imagines the universe and the scientific study of it through the lens of a triune Creator three persons of irreducible identity in a perichoretic or coinherent communion It modestly proposes that Trinitarian theology and especially the coinherent natures of the Son in the incarnation provides the metaphysic or theory of everything that manifests itself in the subject matter of science The presence of the image of the triune God in humanity and of traces of this God in the non human creation are discussed highlighting ontological resonances between God and creation resonances between the being of God and his creation such as goodness immensity yet particularity intelligibility agency relationality and beauty This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science critical realism something reflected in the history of ideas in each These resonances lead to the conclusion that the disciplines of theology and science are in fact coinherent not conflicted This involves recognition of both the mutuality of these vocations and also importantly their particularity Science its own distinct guild yet finds its place ensconced within an encyclopedic theology and subject to first order credal theology **Science and Christianity** J. B. Stump, 2016-09-08 Science and Christianity is an accessible engaging introduction to topics at the intersection of science and Christian theology A philosophically orientated treatment that introduces the relationship of science to Christianity and explores to what extent the findings of science affect traditional Christian theology Addresses important theological topics in light of contemporary science including divine action the problem of natural evil and eschatology Historically oriented chapters and chapters covering methodological principles for both science and theology provide the reader with a strong foundational understanding of the issues Includes feature boxes highlighting quotations biographies of major scientists and theologians key terms and other helpful information Issues are presented as fairly and objectively as possible with strengths and weaknesses of particular interpretations fully discussed *Mapping the Origins Debate* Gerald Rau, 2012-11-14 This unique textbook by Gerald Rau surveys the six predominant models currently used to explain the origins of creation of life of species and of humans Alongside his judicious account of the debate as a whole Rau equips students with critical tools for evaluating the individual philosophies of science in play **Is the Reformation Finished?** Tim Rumsey, 2017-12 Is the Protestant Reformation finished Was it simply a passing family feud within Christianity an insignificant historical footnote with little relevance to modern life This book masterfully explains the history of the Protestant Reformation and shows that the primary issue behind the Reformation the question of spiritual authority

matters more today than it did 500 years ago When Martin Luther nailed his Ninety Five Theses to the door of that Roman Catholic church in 1517 his goal was to reform not splinter Christianity The nails that sunk into that door however quickly fractured a religious and political system that had dominated Europe for a millennium Five hundred years later the aftershocks of the contest between papal power and the authority of the Bible continue even as many claim that the Reformation is now finished In today s world where all churches and all religions are called to unite under the banner of visible unity we must not forget why the Reformers chose to separate and why they were willing to die for this choice The final battle still lies ahead The Reformation is not finished it has only just begun *On the Origin of Consciousness* Scott D. G. Ventureyra, 2018-11-29 Have you ever thought about how self consciousness self awareness originated in the universe Understanding consciousness is one of the toughest nuts to crack In recent years scientists and philosophers have attempted to provide an answer to this mystery The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything Without it reasoning would be impossible Dr Scott Ventureyra in this ground breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self consciousness He integrates philosophy theology and science in an innovative way to embark on this exploration

Roberts, 2019-01-03 Can scientific explanation ever make reference to God or the supernatural The present consensus is no indeed a naturalistic stance is usually taken to be a distinguishing feature of modern science Some would go further still maintaining that the success of scientific explanation actually provides compelling evidence that there are no supernatural entities and that true science from the very beginning was opposed to religious thinking Science without God Rethinking the History of Scientific Naturalism shows that the history of Western science presents us with a more nuanced picture Beginning with the naturalists of ancient Greece and proceeding through the middle ages the scientific revolution and into the nineteenth century the contributors examine past ideas about nature and the supernatural Ranging over different scientific disciplines and historical periods they show how past thinkers often relied upon theological ideas and presuppositions in their systematic investigations of the world In addition to providing material that contributes to a history

of nature and naturalism this collection challenges a number of widely held misconceptions about the history of scientific naturalism God as Trinity Ted Peters,1993-01-01 Peters examines the works of Karl Barth Karl Rahner Eberhard Jungel Jurgen Moltmann Catherine Mowry LaCugna and other theologians as he highlights talk about the becoming of God by process theologians sexism in trinitarian language by feminists and divine and human community by liberation theologians

The Fall and Hypertime Hud Hudson,2014 Frequently alleged irreconcilable conflicts between science and religion are instead misdescribed battles concerning negotiable philosophical assumptions conflicts between metaphysics and metaphysics Hud Hudson provides a two stage illustration of this claim with respect to the putative inconsistency between the doctrines of The Fall and Original Sin and the deliverances of contemporary science The tension in question emerges through a study of the many forms the religious doctrines have assumed over the centuries and through a review of some well established scientific lessons on the origin and history of the universe and of human persons The first stage After surveying various paths of retreat which involve reinterpreting and impoverishing Original Sin and minimizing and dehistoricizing The Fall one version of moderate realism about the doctrines is articulated critically evaluated and found both consistent with contemporary science and suitable to play a crucial role in the theist's confrontation with the Problem of Evil The second stage Recent work in the philosophy of time and in the philosophy of religion provides intriguing support for a Hypertime Hypothesis a species of multiverse hypothesis distinctive for positing a series of successive hypetimes each of which hosts a spacetime block After arguing that the Hypertime Hypothesis is a genuine epistemic possibility and critically discussing its impact on a number of debates in metaphysics and philosophy of religion Hudson reveals a strategy for unabashed extreme literalism concerning The Fall and Original Sin which nevertheless has the extraordinary and delightful feature of being thoroughly consistent with the reigning scientific orthodoxy **Confessing the Triune God** Daniel

Castelo,2014-07-21 At the heart of Christian witness is the confession of the triune God Confessing the Triune God seeks to extend a conversation on Christianity's first article by way of locating Trinitarianism in the life of the worshiping faithful It does so through an ongoing dialectic between broad and particular confessional lines Its breadth is constituted by an ongoing assessment of ecumenical consensus and scholarly debates related to Trinitarianism its repeated framing stems from and returns to the Wesleyan and Methodist family of traditions In this way Christian commitments regarding the Trinity can be depicted for their wide appeal as well as their particular logic within a specific worshiping community The work seeks to guide readers through a process of growing awareness of how the dogma of the Trinity is central to all that Christians say do and hope to be **God** Keith Ward,2013-03-01 An inspired and impassioned historical examination of humanity's search for the divine From Plato to Wittgenstein and religions from Judaism to the Hindu tradition interspersed with divine influences from Classical Greece Romantic poetry and the occasional scene from Alien God A Guide for the Perplexed charts the path of humanity's great spiritual odyssey the search for God Leading the way through this minefield is acclaimed philosopher

theologian Keith Ward blending the sublime and the eclectic in a narrative which offers wit erudition and moments of genuine pathos As a survey of the different manifestations of God through the centuries and an examination of humanity's search for the divine this is an engaging and informative book As a deeply moving testament to our endless capacity for spiritual hope it is compulsive reading for anyone interested in or embarking on the great quest for meaning A lively and very clearly written discussion summarizing and criticizing the thoughts of many significant thinkers Times Literary Supplement Wry but delightfully non ironic intelligent and clear this book is a blessing Publishers Weekly Highly informed witty and immensely accessible One of the most congenial lively and informative introductions to this field Alister McGrath Professor of Historical Theology Oxford University **The Creative Suffering of the Triune God** Gloria L. Schaab, 2007-10-18 Gloria Schaab proposes to respond to cosmic suffering with the recognition that the triune Christian God participates in the sufferings of the cosmos **God Who Stands and Stays** Carl F.
