chemical or environmental issue or simply abandonment of testing procedures Clearly improperly documented toxicity testing methods can be detrimental to their promotion and use as they open the doorway to unnecessary debate and criticism as to their raison d'être Furthermore this situation can indirectly contribute to delaying minimizing or eliminating their application thereby curtailing the important role toxicity testing plays in the overall protection and conservation of aquatic ecosystems

Laboratory Diagnosis in Neonatal Calf and Pig Diarrhoea Peter W. de Leeuw, P.A.M. Guinee, 2012-12-06 In recent years several new infectious agents have been associated with neonatal diarrhoea in both calves and pigs Furthermore important additional information has become available as regards enterotoxigenic Escherichia coli infections in both species Although still much has to be learned it is likely that in many field cases different agents act in concert Therefore an integrated approach to the problem of neonatal diarrhoea appears to be necessary particularly in the field research Such an approach requires a series of diagnostic techniques The purpose of this meeting was to bring together a limited number of scientists that are actively involved in neonatal diarrhoea research in order to discuss present knowledge and to produce proceedings containing review articles new developments and laboratory manuals of relevant diagnostic techniques x This publication constitutes a collection of scientific papers and laboratory manuals on diagnostic techniques for enteropathogenic agents in neonatal diarrhoea in calves and pigs presented and discussed during a workshop in the EEC Programme of Coordination of Agricultural Research on Protection of the Young Animal against Perinatal Diseases held at the Central Veterinary Institute Department of Virology Lelystad the Netherlands June 3-5 1980 VIRAL AGENTS ASSOCIATED WITH NEONATAL DIARRHOEA AND THEIR DETECTION BY ELECTRON MICROSCOPY M S McNulty W J Curran and J B McFerran Veterinary Research Laboratories Stormont Belfast BT4 3SD N Ireland ABSTRACT Simple techniques for diagnosis of enteric viral infections by direct electron microscopy of faeces are described
