Techniques in Thrombosis — a Manual J. Jespersen, R.M. Bertina, F. Haverkate, 2013-12-01 The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures It was the result of a unique cooperation between experts brought together by the European Concerted Action on Thrombosis and Disabilities ECAT The Concerted Action was at that time under the auspices of the Commission of the European Union The second edition like the first edition deals with diagnostic tests within the field of thrombosis However the second edition has a broader scope because it is no longer limited by the frontiers of ECAT Experts all over the world in and outside ECAT have contributed to this edition The editors are very grateful for their contributions The need for a new edition is obvious Since 1992 new assays have been introduced for research diagnosis and therapy of thrombosis for other assays improvements have been suggested while a few others became redundant The editors waived the radioimmunoassays of thromboglobulin and platelet factor 4 due to the fact that the kits required for these assays are rarely or no longer available Also the PAI 1 activity assay was waived as it is liable to many inconsistencies and to large variations A list of names and addresses of manufacturers marketing the kits and reagents has been compiled together with a list of the recommended nomenclature of quantities in thrombosis and haemostasis in order to facilitate the use of the updated version These lists have been carefully compiled by Johannes J Sidelmann PhD Department of Clinical Biochemistry in Esbjerg Denmark
