Heath Ceramics The Complexity Of Simplicity:

Heath Ceramics Amos Klausner, 2006-12-14 Publisher description The Cambridge Companion to William Morris Marcus Waithe, 2024-05-23 In his short life William Morris 1834-96 combined the roles of poet, author, painter, designer, translator, lecturer, political activist, journalist, weaver, bookmaker, and businessman. This volume draws together influential voices from different disciplines who have participated in the recent critical, political, and curatorial revival of his work with essays exploring the contemporary resonance of his exceptional legacy. As a critic of capitalism, his thinking has thrived in these years of financial crisis; as a theorist of work and craftsmanship, his legacy interacts with a more recent ethics of making that questions the values of offshored production; and as a protector of landscape and buildings, Morris's concern with what is precious strikes a chord in our age of environmental crisis. At the same time, a careful and scholarly approach observes the particularity of Morris's context in a way that confounds the false friends of hasty historical reception and reveals unexpected connections.

California Design, 1930-1965 Wendy Kaplan, 2011-09-16 The first comprehensive examination of California's mid-century modern design, generously illustrated. In 1951, designer Greta Magnusson Grossman observed that California design was not a superimposed style but an answer to present conditions. It has developed out of our own preferences for living in a modern way. California design influenced the material culture of the entire country in everything from architecture to fashion. This generously illustrated book, which accompanies a major exhibition at the Los Angeles County Museum of Art, is the first comprehensive examination of California's mid-century modern design. It begins by tracing the origins of a distinctively California modernism in the 1930s by such European migrants as Richard Neutra, Rudolph Schindler, and Kem Weber; it finds other specific design influences and innovations in solid color, commercial ceramics, inspirations from Mexico and Asia, new schools for design training, new concepts about leisure, and the conversion of wartime technologies to peacetime use exemplified by Charles and Ray Eames's plywood and fiberglass furniture. The heart of California Design is the modern California home, famously characterized by open plans conducive to outdoor living. The layouts of modernist homes by Pierre Koenig, Craig Ellwood, and Raphael Soriano, for example, were intended to blur the distinction between indoors and out. Homes were furnished with products from Heath Ceramics, Van Keppel Green, and Architectural Pottery, as well as other previously unheralded companies and designers. Many objects were designed to be multifunctional: pool and patio furniture that was equally suitable indoors; lighting that was both task and ambient; bookshelves that served as room dividers; and bathing suits that would turn into ensembles appropriate for indoor entertainment. California Design includes 350 images, most in color, of furniture, ceramics, metalwork, architecture, graphic and industrial design, film, textiles, and fashion, and ten incisive essays that trace the rise of the California design aesthetic.
