Sandermann, Alan R. Wellburn, Robert L. Heath, 2012-12-06 The idea for this book arose in 1993 after the Free State of Bavaria through its Bayrisches Staatsministerium für Landesentwicklung und Umweltfragen Bavarian Ministry of Regional Development and the Environment decided to discontinue both the Bavarian project management PBWU for forest decline research and the multidisciplinary field research on the Wank Mountain in the Alps near Garmisch Forest decline through the action of ozone and other photooxidants was a main topic of the supported research in the Alps and will be a topic of new investigations in the Bavarian Forest Many interesting results were obtained but the researchers involved have not had sufficient time to allow reliable conclusions to be drawn It was therefore decided to ask international experts for contributions in order to summarize the best available evidence of a possible link between ozone and forest decline a topic which has been studied in the USA since the late 1950s and in Europe since the early 1980s The original idea of Waldsterben as an irreversible large scale dieback of forests in Germany was soon recognized to be wrong Forschungsbeirat 1989 However the new criteria used for the official German and European damage inventories loss or yellowing of needles or leaves tree morphology indicate that persistently high percentages of damaged spruce and pine remain and there is an increasing percentage of damaged beech and oak with a high proportion of biotic disease Forschungsbeirat 1989 UN ECE 1995 Iron Age and Hardware, Iron and Industrial Reporter, 1926 Catalog of Copyright Entries Library of Congress.
