Language and Being Duane Williams, 2017-09-21 Martin Heidegger's radical and for that controversial reflections on language were not simply a passing interest in his thinking but a fundamental career long concern arguably as significant to him as his study of being This book traces the intimate connection between language and being in Heidegger's philosophy and shows how they cannot be understood apart from one another It discusses why Heidegger's undervalued philosophy of language is increasingly important how it figures in the wider context of his work and how it is to be approached and understood for our times This includes the significance to Heidegger of being the logos principle etymology phenomenology mysticism and poetry Illuminating a difficult yet highly significant area in Heidegger's thinking Williams provides an insightful and authoritative interpretation of the topic

Heidegger's Being and Time and Kierkegaard's The Sickness Unto Death as Hermeneutic to Paul's Epistles Bong-Choul Hwang, 2025-01-16 Dive into a profound exploration of human existence through the philosophical and theological insights of Heidegger Kierkegaard and St Paul This book bridges the existential concepts of Dasein and soma with the spiritual dimensions of Paul's epistles revealing the interplay between individual authenticity interdependent coexistence and the inevitability of death By examining conscience guilt and temporality of time this book offers a unique perspective on how we understand ourselves and relate to others The timeless questions posed by these thinkers can illuminate the path to finding meaning and projecting the possibility of future being beyond the confines of mortality This work is not just an academic study but an invitation to experience and interpret life through a richer philosophical and theological lens

researchers and anyone wanting to know more about Martin Heidegger **Authentic Professional Learning** Ann Webster-Wright, 2010-08-05 There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or paraprofessional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self-regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and financial matters Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decision making Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal complex and diverse process that does not lend itself to easy prescription or the realisation of others' intents *The Object as a Process* Stephan Schmidt-Wulffen, German A. Duarte, 2022-12-02 How does artistic practice lead to the production of knowledge How does in turn artistic knowledge relate to its material base How does contingent materiality guide the artist towards finding form and developing a statement This volume is dedicated to the object as a process in order to offer new insights into the ways the object broadly construed comprising digital and other non-classical objects becomes an active element in artistic practice **Authors and the World** Rebecca Braun, 2022-07-14 Authors and the World traces how four core modes of authorship have developed and inflect one another in modern Germany through a series of twenty different case studies including the work of Thomas Mann Günter Grass Anna Seghers Walter Hasenclever Felicitas Hoppe and Katja Petrowskaja and original interview material with contemporary writers Ulrike Draesner Olga Martynova and Ulrike Almut Sandig Modes of authorship are attitudes taken towards being an author that can be seen both in what an individual author does and in how a particular literary tradition or trend is perceived and mediated by others both within and beyond Pierre Bourdieu's literary field Consequently they deliberately straddle questions of literary production and reception Rebecca Braun sets out how the commemorative celebratory utopian and satirical modes interact with one another to produce a number of models of authorship that carry either foundational or otherwise normative force for society In varying combinations and with deep roots in 19th and early 20th century practices the four modes of authorship create a remarkably and at times troublingly stable German literature network that to a large degree still determines the way contemporary German-speaking authors enact their cultural significance in their writing engage with their local

circumstances and are more broadly received around the world Authors and the World provides not just a radically new approach to German literary history but a thoroughly new paradigm for thinking about literary authorship **"Becoming" a Professional** Lesley Scanlon, 2011-06-27 This book is founded on the idea that becoming is the most useful defining concept for a new professional class whose members understand that development in their working lives is an open ended lifelong process of refinement and learning In a world where being a professional is an increasingly indistinct notion and where better education and technology are challenging professional norms it is imperative that we no longer think in terms of an exclusive Anglo American knowledge rich class of workers Exploring the implications of this insight for professions including nursing teaching social work engineering and the clergy this volume aims to encourage informed debate on what it means to be a professional in this globalised 21st century The book argues that becoming a professional is a lifelong process in which individual professional identities are constructed through formal education workplace interactions and popular culture The book advocates the ongoingness of developing a professional self throughout one's professional life What emerges is a concept of becoming a professional different from the isolated rugged individualistic approach to traditional professional practice as represented in popular culture It is a book for the reflective professional **A Dictionary of Critical Theory** Ian Buchanan, 2018-02-09 Containing over 750 in depth entries this is the most wide ranging and up to date dictionary of critical theory available This authoritative guide covers the whole range of critical theory including the Frankfurt school cultural materialism cultural studies gender studies film studies literary theory hermeneutics historical materialism and socio political critical theory Entries clearly explain complex theoretical discourses such as Marxism psychoanalysis structuralism deconstruction and postmodernism There are biographies of hundreds of important figures in the field with feature entries for those who have heavily influenced areas of the discipline such as Derrida and Deleuze This new edition of the dictionary has been updated to extend coverage of diaspora race and postcolonial theory including key authors such as C L R James and Paul Gilroy and of queer and sexuality studies including notable figures such as Eve Kosofsky Sedgwick Fully revised to keep up to date with this diverse field this new edition expands the coverage to include entries such as hyperobject and transgender Entries are fully cross referenced and many contain further reading suggestions Covering all aspects of critical theory from globalization and race studies to queer theory and feminism this multidisciplinary A Z is essential for students in the humanities and social sciences **Attention Equals Life** Andrew Epstein, 2016-06-10 Poetry has long been thought of as a genre devoted to grand subjects timeless themes and sublime beauty Why then have contemporary poets turned with such intensity to documenting and capturing the everyday and mundane Drawing on insights about the nature of everyday life from philosophy history and critical theory Andrew Epstein traces the modern history of this preoccupation and considers why it is so much with us today Attention Equals Life argues that a potent hunger for everyday life explodes in the post 1945 period as a reaction to the rapid unsettling transformations of this epoch which have resulted in a culture of perilous

distraction Epstein demonstrates that poetry is an important and perhaps unlikely cultural form that has mounted a response and even a mode of resistance to a culture suffering from an acute crisis of attention In this timely and engaging study Epstein examines why a compulsion to represent the everyday becomes predominant in the decades after modernism and why it has so often sparked genre bending formal experimentation With chapters devoted to illuminating readings of a diverse group of writers including poets associated with influential movements like the New York School language poetry and conceptual writing the book considers the variety of forms contemporary poetry of everyday life has taken and analyzes how gender race and political forces all profoundly inflect the experience and the representation of the quotidian By exploring the rise of experimental realism as a poetic mode and the turn to rule governed everyday life projects Attention Equals Life offers a new way of understanding a vital strain at the heart of twentieth and twenty first century literature It not only charts the evolution of a significant concept in cultural theory and poetry but also reminds readers that the quest to pay attention to the everyday within today's frenetic world of and social media is an urgent and unending task

Deconstruction and the Work of Art Martta Heikkilä, 2021-07-29 The contemporary idea of the work of art is paradoxically both widely used and often unexamined Therefore we must re evaluate the concept before we can understand what the deconstruction of aesthetics means for thinkers like Jacques Derrida Jean Luc Nancy and Philippe Lacoue Labarthe By examining their analyses of works of visual

art and contextualizing their thinking on the matter Martta Heikkil asserts that the implications of the work of art art and the aesthetic apply not only to philosophical questions but also to a broader area Instead of the totality represented by the historical concept of Art poststructuralist thinkers introduce the idea of the radical multiplicity of art and its works From this notion arises the fundamental issue in Derrida and the poststructuralist tradition how can we speak philosophically of art which always exists as singular instances as works In Deconstruction and the Work of Art Visual Arts and Their Critique in Contemporary French Thought Heikkil shows that the deconstructionist notions of art are still influential in the discourses of contemporary art in which artworks proliferate and the concept of work is open ended and expanding This book offers an introduction to the deconstructionist theory of art and brings new perspectives to the complex undecidable relation between philosophy and art

Actological Readings in Continental Philosophy Malcolm Torry, 2023-01-12 Actological Readings in Continental Philosophy is what it says it is The book asks how we might understand the writings of a number of continental philosophers actologically that is with reality understood as action in changing patterns rather than as beings that change It also asks how the different continental philosophies might enable us to develop an actology an understanding of reality as action in changing patterns The philosophers whom we study are Immanuel Kant Friedrich Nietzsche Edmund Husserl Martin Heidegger Emmanuel Levinas Gilles Deleuze Hans Georg Gadamer Maurice Merleau Ponty Gaston Bachelard Michel Foucault and Michel Serres A whole new way of understanding reality casts new light on their philosophies and raises and answers some significant new questions

The Digital Logic of Death Steven Pustay, 2021-01-14 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched In The Digital Logic of Death Steven Pustay skillfully makes visible the immensely important but often overlooked role that moving images play in shaping our understanding of mortality This relationship he argues is made all the more urgent by the technologies of the digital age which have profoundly altered our ability to represent and contemplate death through moving images resulting in an entirely new cultural logic of death To draw out this new logic Pustay presents accessible readings of otherwise dense and difficult philosophical approaches to death such as those found in existentialism psychoanalysis and critical theory by reading them through the lens of contemporary media From art house films like Irr versible and The Fountain to blockbusters like the Matrix trilogy from television commercials for M M s to pay cable dramas like The Sopranos and Breaking Bad from first person shooters like Bioshock to indie games like LIMBO Pustay shows how moving images have shifted our understanding of death in general and our recognition of our own finiteness in particular
