

Hematology

WHAT IS HEMATOLOGY?

The study (morphology, physiology, and pathology) of blood and blood-forming organs and the diseases thereof

- Uses:
 - As part of a routine medical exam to assess overall health
 - Diagnosis (e.g., an infection, anemia, leukemia)
 - Monitoring of a condition and its treatment

HEMATOPOIESIS/HEMOPOIESIS

The formation of blood cells and platelets. In a fetus, formation starts in the yolk sac, moves to the liver and spleen, and then moves to the bone marrow. In an infant, formation occurs in bone marrow, which is present in almost all bones. In an adult, formation of blood cells (red and most white) and platelets occurs in the marrow of the proximal ends of the femur, pelvis, sacrum, vertebrae, ribs, sternum, and skull.

- **Hemopoietic growth factors:** Erythropoietin (EPO), FLT3 ligand (FLT3-L), granulocyte colony-stimulating factor (G-CSF), granulocyte-macrophage-CSF (GM-CSF), interleukin-1 (IL-1), IL-3, IL-5, IL-6, macrophage-CSF (M-CSF), stem cell factor (SCF), thrombopoietin (TPO), tumor necrosis factor (TNF), vascular endothelial growth factor (VEGF). Effects are mediated by binding receptors on cell surfaces.
- **Hemopoietic stem cell:** Pluripotent, rare (frequency is 1 per 20 million nucleated cells in bone marrow) CD34⁺CD38⁻Lin⁻ phenotype. Gives rise to more than 10⁶ mature cells after 20 cell divisions and can self-renew by asymmetric cell division.
- **Hemopoietic progenitor cell:** Multipotent.
- **Erythropoiesis:** Formation of red blood cells (RBCs); regulated by EPO, which is secreted by the kidneys in response to hypoxia (oxygen tension, the partial pressure of oxygen).
 - Stem cell → progenitor cell → colony-forming unit (CFU) granulocyte, erythrocyte, monocyte, and megakaryocyte (GEMM) (CFU_{GEMM}) → burst-forming unit (BFU) erythroid (BFU-E) (CFU_E) → proerythroblast → series of normoblasts in marrow that decrease in size, increase in hemoglobin (Hb) content, lose RNA; protein synthesis apparatus, and increase chromatin condensation → reticulocyte (nucleus extruded; nuclear DNA loss), which contains some ribosomal RNA (rRNA) and synthesizes Hb → mature erythrocyte (RBC) (red), which is a non-nucleated, bi-concave disc (i.e., cell-like).
 - Assays by Hb level, reticulocyte count, and bone marrow exam.
 - **Total erythropoiesis** assessed by the cellularity of marrow and myeloid/erythroid ratio.
 - **Effective erythropoiesis** assessed by reticulocyte count.
 - **Ineffective erythropoiesis:** 50–15% of erythroblasts die in bone marrow; increases in some chronic anemias; associated with increased unconjugated bilirubin (derived from the breakdown of Hb) and lactate dehydrogenase LDH (derived from breakdown of cells) in serum.
- **Extramedullary hematopoiesis (EH):** Formation and development of blood cells outside bone marrow in response to the failure of erythropoiesis in bone marrow.
- **Granulopoiesis:** Formation of granulocytes.
 - Stem cell → CFU → CFU granulocyte progenitor (CFU_G) → basophil
 - Stem cell → CFU → CFU granulocyte monocyte neutrophil (CFU_{GMN}) → CFU eosinophil progenitor (CFU_E) → eosinophil (acidophil)
 - Mast cell (mastocyte or basophil)
 - Stem cell → CFU → CFU → CFU granulocyte monocyte progenitor (CFU_{GMP}) → CFU-G → neutrophil
- **Lymphopoiesis:** Formation of lymphocytes and natural killer (NK) cells.
 - Stem cell → common lymphoid progenitor → B-lymphocyte (B cell)
 - Stem cell → common lymphoid progenitor → thymus → T lymphocyte (T cell)
 - Stem cell → common lymphoid progenitor → natural killer cell (NK cell)
- **Myelopoiesis:** Formation of blood marrow and all blood cells in marrow.
 - Monocyte formation
 - Stem cell → CFU → CFU → CFU → CFU-M → monocyte
- **Thrombopoiesis:** Formation of thrombocytes, or platelets, in about 10 days; regulated by TPO (95% from the liver; 50% constitutively produced and 50% produced in response to platelet destruction). As the platelet ages, it loses cell-surface sialic acid, exposing galactose residues that attach to the Achewell-Morell receptor in the liver, signaling for TPO production.
 - Stem cell → CFU → CFU megakaryocyte progenitor (CFU_M) → platelet (fragment of cytoplasm of megakaryocyte)
 - TPO binds to the c-MPL receptor on megakaryocytes and platelets, so plasma TPO is low in patients with excess platelets and high in patients with thrombocytopenia.

ORGANS OF THE LYMPHATIC SYSTEM

- **Bone marrow:** Modified connective tissue in bone cavities that is soft, fatty, and vascular.
 - **Red marrow:** Where blood cells are formed.
 - **Yellow marrow:** Mostly fat.
- **Lymph nodes:** Small, widespread organs of the lymphatic system, connected by lymphatic vessels. They filter lymph, form lymphocytes, become inflamed/enlarged with infection, disease, and injury, and are used to stage cancer.
- **Thymus gland:** Lymphoid organ behind the sternum where T cells are produced and mature; mature T cells migrate to lymph nodes throughout the body. This gland decreases in size with the onset of puberty and is replaced with fat.
 - **Thymosin:** Hormone produced by the thymus gland; stimulates T cell development.
- **Tonsils:** Pair of masses of lymphoid tissue located at the root of the tongue in the throat; M cells on the surface take up antigens (Ag) produced by pathogens and stimulate B cells and T cells; they also produce T cells.
- **Spleen:** Largest organ of the lymphatic system, located in the upper left quadrant of the abdomen. It filters blood, including old and damaged red blood cells, and produces lymphocytes.

BLOOD

Delivers oxygen, nutrients, and hormones to tissues; delivers carbon dioxide to lungs and other waste products to kidneys for removal; blood that leaves the heart returns in 20–30 seconds; there are 5–6 quarts of blood in the human body.

COMPONENTS

Red Blood Cells (RBCs)

- Also called **erythrocytes**, they are non-nucleated, bi-concave discs when mature. They contain Hb, have a 120-day lifespan, and are 6–8 µm diameter (avg).
- **Hemoglobin (Hb):** 4 polypeptide (globin) chains: 96–98% Hb-A (α₂β₂), 1.5–1.2% Hb-A₂ (α₂β₂), and 0.5–0.8% Hb-F (α₂γ₂), wherein each polypeptide chain (α, β, γ, and δ) contains an iron atom bound to protoporphyrin to form a heme; it transports oxygen from lungs to body tissues and carbon dioxide from body tissues to lungs.

White Blood Cells (WBCs)

Also called **leukocytes**, they defend the body against infection. There is ~1 WBC for every 500–700 RBCs.

GRANULOCYTES

- Also called **myelocytes**, they are immune cells containing granules that release enzymes.
- **Basophil:** Cell's granules release enzymes during an allergic reaction, asthma, and infection. It can be stained by basic dye, is phagocytic, and has a lifespan of a few hours to a few days.
- **Eosinophil (acidophil):** Cell's granules release enzymes during an allergic reaction, asthma, and an infection with parasites. It can be stained by acidic dye, is phagocytic, and has a lifespan of 8 to 12 days.
- **Neutrophil (polymorph):** Most numerous WBC; characterized by a dense, multi-lobed nucleus (2–5 lobes) and a pale cytoplasm with an irregular outline and fine azurophilic granules, which are predominantly secondary (specific) granules (see **myelocyte** below). Has a 6–50 hour lifespan.
 - These precursors, located in bone marrow, rarely occur in normal peripheral blood other than the band, stab, and juvenile forms.
- **Myeloblast:** Also called **myelomonoblast**, it is the earliest recognizable precursor; characterized by a large nucleus with fine chromatin and 2–5 nucleoli, and a cytoplasm with no granules. It varies in size, is capable of cell division, and it gives rise to promyelocytes. Bone marrow comprises less than 5% myeloblasts and it is difficult to distinguish from monoblasts, promonocytes, and monocytes (see **monocyte** below).
- **Promyelocyte:** Slightly larger than myeloblasts, can distinguish commitment to basophilic, eosinophilic, and neutrophilic lineages using electron microscopy (EM). Cytoplasm contains primary granules (of lysosomal origin) containing myeloperoxidase (MPO) and other acid hydrolases. It is capable of cell division, and gives rise to myelocytes.
- **Myelocyte:** Can distinguish morphological commitment to basophilic, eosinophilic, and neutrophilic lineages. The nuclear chromatin is more condensed, nucleoli are not visible, and the cytoplasm contains secondary (specific) granules of lysosomal origin containing lactoferrin, lysozyme, and other enzymes. It is capable of cell division and gives rise to metamyelocyte.
- **Metamyelocyte:** Non-dividing cell. The nucleus is indented or band-shaped and the cytoplasm contains primary and secondary granules.
- **Band, stab, or juvenile:** Forms of neutrophil between metamyelocyte and mature neutrophil. They are distinguishable from mature neutrophil by the absence of clear, fine filaments between nuclear lobes.
- **Functions:**
 - **Chemotaxis:** Cell is mobilized and migrates to a foreign material (e.g., bacterium, fungus, debris) or a site of inflammation by chemotactic substances released by damaged tissue, cytokines, and by the interaction of leukocyte adhesion molecules with ligands on damaged tissue.
 - **Phagocytosis:** Ingestion of bacteria, fungi, foreign debris, and dead or damaged host cells.
 - **Cling and digestion:**
 - **Oxygen-dependent:** Superoxide, hydrogen peroxide, and other activated oxygen species are generated from oxygen and reduced nicotinamide adenine dinucleotide phosphate (NADPH). Bacteria are killed when hydrogen peroxide reacts with halide and myeloperoxidase; process may also involve activated oxygen species.
 - **Oxygen-independent:** Proteins, such as cathelicin C, lysozyme (with hydrogen peroxide), or elastase (with hydrogen peroxide) kill bacteria; may also act with a decrease in pH inside a phagocytic vacuole containing lysosomal enzymes. Lactoferrin binds iron, thereby depriving bacteria of iron and generating free radicals (bacteriostatic).

cases are presented in realistic fashion using terms and abbreviations that would normally be found in a patient's medical record. Patients in these cases have drug therapy problems requiring identification and management. For each case you will be asked to develop a Patient Database, Drug Therapy Problem Worksheet, and Pharmacotherapy Care Plan using the forms provided. With *Pharmacotherapy Principles and Practice Study Guide* you will learn how to navigate through the process of applying your knowledge of pharmacotherapy to specific patient cases by organizing patient data to logically assess a patient's medication issues and formulate a sound pharmacotherapy care plan. EACH CASE INCLUDES Learning Objectives, Patient Presentation, Targeted Questions followed by hints that refer you to pages in *Pharmacotherapy Principles and Practice* Third Edition where you can find the information necessary to answer the question. Follow Up Global Perspective which highlights an issue related to the case that is important to countries outside of North America or involves selected ethnic groups or races. Case Summary. Student Workup where you are asked to review the patient case for missing information and to complete the various patient forms.

Concise Guide to Hematology Hillard M. Lazarus, Alvin H. Schmaier, 2018-11-15. This text provides a comprehensive overview of the essential concepts and malignancies of hematology. Now in its second edition, the book reviews every major hematologic disorder and disease entity in thorough detail from incidence and prevalence to patient and treatment related issues. Formatted in an organized and easy to read outline style to facilitate rapid learning and information processing, the book allows readers to easily locate topics of immediate interest without wading through entire sections to obtain the desired data. Written by a diverse range of experts in the field. *Concise Guide to Hematology* Second Edition is a valuable resource for clinicians, residents, trainees, and entry level fellows who work in or are just entering the field of hematology.

Pharmacotherapy Principles and Practice Study Guide Michael D. Katz, Kathryn R. Matthias, Marie A. Chisholm-Burns, 2010-12-17. A case-based companion study guide to *Pharmacotherapy Principles and Practice* 2e. Learn how to apply your knowledge to actual patient situations. *Pharmacotherapy Principles and Practice Study Guide* uses 98 cases to help you learn how to apply pharmacotherapeutic concepts to specific patient situations. Each case is presented in a consistent manner similar to what you would see in a clinical setting and focuses on one primary topic or problem. Patients discussed in these cases will have drug therapy problems requiring identification and management. For each case you will be asked to develop a Patient Database, Drug Therapy Problem Worksheet, and Pharmacotherapy Care Plan using the forms provided. These forms are adapted from those originally developed by the American Society of Health System Pharmacists Clinical Skills program. Each case includes Learning Objectives, Patient Presentation, Targeted Questions followed by a hint that refers you to pages in *Pharmacotherapy Principles and Practice* 2e where you can find the information to answer the question. Follow up Global Perspective which highlights an issue related to the case that is important to countries outside of North America or involve different ethnic groups or races. Case Summary.

Critical Care Study Guide

Gerard J. Criner, Rodger E. Barnette, Gilbert E. D'Alonzo, 2010-06-27 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up to date clinical information. An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago, new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines, a comprehensive multidisciplinary approach presenting the information is essential, similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses, we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome, an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU, neurosurgical emergencies, acute coronary syndromes, cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU, and nursing care of the ICU patient. **Board of Registry Study Guide for Clinical Laboratory Certification Examinations**

Pediatric Board Study Guide Osama Naga, 2025-01-18 The second edition of this text has proved to be a very successful pediatric study guide helping many pediatricians around the world to study pediatrics in a very easy simplified way. Even the most complex subjects are condensed into very straight forward and easy to remember information blocks. This book not only prepares students to pass their exams but also prepares pediatricians for general pediatric encounters emphasizing all new updates from the American Academy of Pediatrics and American Board of Pediatrics. It has proved very popular among new pediatricians and new pediatric residents worldwide. In the last 3 years the AAP and ABP have released a lot of updates such as management of fever in well appearing infants, COVID 19, asthma management, and new vaccine guidelines from the CDC. The pediatric board exam always includes new diseases which are included in each chapter as well as new questions and answers that must be added to the last minute review chapter as well as other questions to be edited to follow the new recommendations and guidelines in pediatrics. New pictures and better quality illustrations are also included. Pediatric residents and fellows preparing for the board examination, pediatricians and pediatric subspecialists preparing for certification maintenance will find *Pediatric Board Study Guide A Last Minute Review* 3rd edition easy to use and comprehensive making it the ideal resource and study tool. *Study Guide to Accompany Rosdahl & Kowalski's Textbook of Basic Nursing* Lazette Nowicki, Caroline Bunker Rosdahl, Eileen Klein, Mary T. Kowalski, 2002-11-21 This excellent study guide helps LPN/LVN students get the most out of the *Textbook of Basic Nursing Eighth Edition*. This concise learning tool allows

students to review all the key material from the Eighth Edition and features a self study CD ROM they can use to help prepare for class or examinations

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Hematology Specialist Study Guide free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Hematology Specialist Study Guide free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Hematology Specialist Study Guide free PDF files is

convenient, it's important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but it's essential to be cautious and verify the authenticity of the source before downloading Hematology Specialist Study Guide. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether it's classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Hematology Specialist Study Guide any PDF files. With these platforms, the world of PDF downloads is just a click away.
