

Henry Moore Writings and Conversations

Edited by Alan Wilkinson

A piece of stone can have a hole through it & not be weakened — if the hole is of a studied size, shape & direction. On the principle of the arch, it can remain just as strong.

The first hole made through a piece of stone is a revelation. The hole connects one side to the other, making it immediately more three-dimensional.

A hole can in itself have as much shape-meaning as a solid mass. It is space shape — the negative of the solid.

Sculpture in air is possible, where the stone contains only the hole which is the intended & considered form.

The mystery of the hole — the mysterious fascination of caves in hill sides & cliffs.

Primitivism and Twentieth-Century Art Jack Flam, Miriam Deutch, 2003-03-27 This is a much needed important collection a goldmine of sources for scholars and students The texts articulate the key Primitivist aesthetic discourses of the period offering crucial insight into the complex and always changing nexus between culture politics and representation Because of the breadth of the materials covered and the controversies they raise this anthology is one of the all too rare volumes that not only will provide reference materials for years to come but also will feature centrally in classroom discussions Suzanne Preston Blier author of *African Vodun Art Psychology and Power* For almost a century art historians have fretted about the notion of primitivism in the arts This comprehensive in both senses of the word anthology is a peerless source of the history of responses to works categorized as primitive In its range the book touches upon all the troubling questions formal anthropological political historical that have bedeviled the study of the arts of Oceania Africa and North and South America and provides the grounds at last for intelligent pursuit of keener distinctions I regard this book as a superb contribution to the study of Modern art in fact indispensable Dore Ashton author of *Noguchi East and West* An extraordinarily useful and complete collection of primary documents many translated for the first time into English and almost all unlikely to be encountered elsewhere without serious effort Its five sections each with a lively and scholarly introduction reveal the diverse views of artists and writers on primitive art from Matisse Picasso and Fry to many far less known and sometimes surprising figures The book also uncovers the politics and aesthetics of the major museum exhibitions that gained acceptance for art that had been both reviled and mythologized Recent texts included are all germane This book will be invaluable for any college course on the topic Shelly Errington author of *The Death of Authentic Primitive Art and Other Tales of Progress* An exceptionally valuable anthology of seventy documents most heretofore unavailable in English on the ongoing controversies surrounding Primitivism and Modern art Insightfully chosen and annotated the collection is brilliantly introduced by Jack Flam's essay on the historical progression contexts and cultural complexities of more than one hundred years ideas about Primitivism Rich timely illuminating Herbert M Cole author of *Icons Ideals and Power in the Art of Africa* **The Fran and Ray Stark Collection of 20th-century Sculpture at the J. the age of the Earth second to find the point of emergence of human beings and third to ponder the age of art Maria Stavriniaki considers the inseparability of these accounts of temporality from the disruptive forces of modernity She asks what a history of modernity and its art would look like if considered through these three interwoven inventions of the longue durée Transfixed by Prehistory attempts to articulate such a history which turns out to be more complex than an inevitable march of progress leading up to the Anthropocene Rather it is a history of stupor defamiliarization regressive acceleration and incessant invention since the new was also found in the deep sediments of the Earth Composed of as much speed as slowness as much change as deep time as much confidence as skepticism and doubt modernity is a complex phenomenon that needs to be rethought Stavriniaki focuses on this intrinsic tension through major artistic practices Cézanne Matisse De Chirico Ernst Picasso Dubuffet Smithson Morris and contemporary artists such as Pierre Huyghe and Thomas Hirschhorn philosophical discourses Bataille Blumenberg and Jüngel and the human sciences This groundbreaking book will attract readers interested in the intersections of art history anthropology psychoanalysis mythology geology and archaeology **Art Journal**, 1960 **Gordon Bunshaft and SOM** Nicholas Adams, 2019-10-11 This nuanced portrait of Gordon Bunshaft and his work for the architecture firm SOM explores his role in defining the built aesthetic of corporate America
