The Final Exam covers material from the entire quarter, but will be more heavily focused (~70%) on topics covered after Midterm 2. Use the review sheets from Midterms 1 & 2 to study the earlier material. The exam is 90 multiple-choice questions, worth 180 points total. Make sure to review the Hardy-Weinberg equations, phylogenetic trees, and watch any videos that I posted on CCLE.

### Animal Diversity - Chapter 44 & Sections 35.1, 37.3, 40.3, 42.1, 42.2

- When did the Cambrian explosion occur? How did this affect the diversity of animals on earth?  
545 million years ago. Allowed occupation of new niches
- What are the key traits in animals? Are animals a monophyletic group?  
eukaryotes, heterotrophs, mobile at one point in life
- How is cephalization related to nervous system development? (Figures 35.2 and 35.3 shown in lecture) How is symmetry related to cephalization? What are the adaptive advantages of cephalization?  
brainssssssssssssss
- What are the sensory receptors we discussed and how are each beneficial? (Figures 36.6, 36.11, 36.12, 36.13) What is the role of pheromones in animal communication? (Figs 38.14, 38.15, 38.16)  
sensory stuff and smell and recognizing other animals and communication, etc.
- What are the different ways that animals feed?  
filter feeding, carnivore, grass
- What are the characteristics of Porifera? How are porifera similar to/different from the choanoflagellates?  
porifera - sponge, body full of pores . choanoflagellates aren't related to porifera
- Where on the phylogenetic tree did tissues evolve? Which animals are diploblastic and triploblastic? What is the fate of the different developmental tissue layers in animals?  
tissues evolved right after sponges. All animals triploblastic except cnidarians (ctenophores and acoels), which are diploblastic. Each layer develops into endoderm, ectoderm, mesoderm, allows complex muscle tissue used for movement
- What are the characteristics of Cnidarians? How do they move and reproduce? What is the role of the cnidocytes? In what ways are cnidarians colonial? What symbiotic interactions do cnidarians have with other organisms?  
radial symmetry, diploblastic, asexual reproduction, move by hydrostatic pressure, form colonies like coral reefs, symbiosis with photoautotrophs
- How are Ctenophores similar and different to cnidarians? What role did Mnemiopsis, a ctenophore introduced to the Black Sea, have on the ecology of that region?  
mostly similar, except ctenophores have 8 rows of cilia to help them move. Mnemiopsis destroyed lots of native organisms there and dominated.
- Why is the hydrostatic skeleton important for movement in some groups of animals? (Figure 37.15 a & b)

Niemi, 2014-05-01 If you're charged with helping educators achieve the vision of the new science standards this is the professional development resource you need. This book is chock full of activities and useful advice for guiding teachers and administrators as they put the standards into practice in the classroom. Written by three experts in professional development for science teachers. Introducing Teachers and Administrators to the NGSS Introduces the vocabulary structure and conceptual shifts of the NGSS. Explores the three dimensions of the Framework: science and engineering practices, crosscutting concepts, and disciplinary core ideas, and how they're integrated in the NGSS. Provides classroom case studies of instructional approaches for students challenged by traditional science teaching. Covers curricular decisions involving course mapping, designing essential questions, and performance assessments, and using the NGSS to plan units of instruction. Examines the connections between the NGSS and the Common Core State Standards. Offers advice for getting past common professional development sticking points and finding further resources. Given the widespread changes in today's education landscape, teachers and administrators may feel overwhelmed by the prospect of putting the new standards into practice. If you're a science specialist, curriculum coordinator, or instructional coach who provides professional development, you will find this collection immensely helpful for heading off initiative fatigue, whether in an individual school or throughout a district.      *Encyclopedia of Computer Science and Technology* Jack Belzer, Albert G. **Landscape Ecology and Water Management** Mehtab Singh, R.B. Singh, M.I. Hassan, 2014-05-22 The over-exploitation of important earth resources such as land and water has led to a number of environment-related problems the world over. At the same time, land use change caused by various human activities has led to extinction of many plant and animal habitats and species. In this context, the relevance of biodiversity for human survival is becoming a major international political issue as scientific evidence builds on the global health implications of biodiversity loss. These issues are closely linked with the issue of climate change as many of the health risks due to climate change are associated with rapid degradation of biodiversity. This present work focuses on holistic natural resource-based spatio-temporal planning, development, and management and considers them as essential to save the degraded ecosystem for sustainable resource management. Contributions are compiled in two volumes: 1. Climate Change and Biodiversity and 2. Landscape Ecology and Water Management.
