Year Cornelia F. Mutel,2010-03-15 In June 2008 the rivers of eastern Iowa rose above their banks to create floods of epic proportions their amazing size flowing in places at a rate nearly double that of the previous record flood and the rapidity of

their rise ruined farmlands and displaced thousands of residents and hundreds of businesses In Cedar Rapids the waters inundated more than nine square miles of the downtown area in Iowa City where the flood was also the most destructive in history the University of Iowa's arts campus was destroyed By providing a solid base of scientific and technical information presented with unusual clarity and a wealth of supporting illustrations the contributors to this far reaching book many of whom dealt firsthand with the 2008 floods provide a detailed roadmap of the causes and effects of future devastating floods The twenty five essays fall naturally into four sections Rising Rivers Spreading Waters begins by comparing the 2008 floods with the midwestern floods of 1993 moves on to trace community responses to the 2008 floods and ends by illuminating techniques for forecasting floods and determining their size and frequency Why Here Why Now searches for possible causes of the 2008 floods and of flooding in general annual crops and urban landscapes inflows into and releases from reservoirs and climate change Flood Damages Flood Costs Flood Benefits considers the complex mix of flood costs and effects emphasizing damages to cities and farmlands as well as potential benefits to natural communities and archaeological sites Looking Back Looking Forward lays out approaches to managing the floods of the future that are sure to come While the book draws most of its examples from one particular region it explains flooding throughout a much larger region the midwestern Corn Belt and thus its sobering yet energizing lessons apply well beyond eastern Iowa By examining the relationships among rivers floodplains weather and modern society by stressing matters of science and fact rather than social or policy issues and by addressing multiple environmental problems and benefits A Watershed Year informs and educates all those who experienced the 2008 floods and all those concerned with the larger causes of flooding
