From up to 100 feet away you can control all the basic systems found on modern industrial robots. And, you can load your own programs into HERO 1 from a computer through the built-in RS-232C port on the Remote Control.

the companionate needs of their users as a way to ease growing pressures on home life The Intimate Life of Computers is a vital contribution to feminist media history highlighting how the emergence of personal computing dovetailed with changing gender roles and other social and cultural shifts Eschewing the emphasis on technologies and institutions typically foregrounded in personal computer histories Hilu uncovers the surprising ways that domesticity and family life guided the earlier stages of our all pervasive digital culture

Field and Service Robotics Alexander Zelinsky,2012-12-06 Joe Engelberger the pioneer of the robotics industry wrote in his 1989 book *Robotics in Service* that the inspiration to write his book came as a reaction to an industry sponsored forecast study of robot applications which predicted that in 1995 applications of robotics outside factories the traditional domain of industrial robots would amount to less than 1% of total sales Engelberger believed that this forecast was very wrong and instead predicted that the non industrial class of robot applications would become the largest class Engelbergers prediction has yet to come to pass However he did correctly foresee the growth in non traditional applications of robots Robots are now beginning to march from the factories and into field and service applications This book presents a selection of papers from the first major international conference dedicated to field and service applications of robotics This selection includes papers from the leading research laboratories in the world together with papers from companies that are building and selling new and innovative robotic technology It describes interesting aspects of robots in the field ranging from mining agriculture construction cargo handling subsea operations removal of landmines to terrestrial exploration It also covers a diverse range of service applications such as cleaning propagating plants and aiding the elderly and handicapped and gives considerable attention to the technology required to realise robust reliable and safe robots
