

The background of the book cover is a complex, abstract collage. It features various financial data visualizations, including line graphs with upward and downward arrows, bar charts, and circular patterns resembling pie charts or radar charts. The color palette is dominated by warm tones like orange, red, and yellow, with some cooler blue and green accents. The overall effect is one of dynamic, high-tech financial analysis.

financial problems and the last chapter in this section of the book also serves as an introduction to model risk. The third part is devoted to the usage of Matlab introducing the software package by describing the basic functions applied for financial engineering. The programming is approached from an object oriented perspective with examples to propose a framework for calibration, hedging and the adjoint method for calculating Greeks in a Libor market model. Source code used for producing the results and analysing the models is provided on the author's dedicated website <http://www.mathworks.de/matlabcentral/fileexchange/authors/246981>.

Hedge Funds François-Serge Lhabitant, 2009-08-20. An excellent and comprehensive source of information on hedge funds. From a quantitative view, Lhabitant has done it once again by meticulously looking at the important topics in the hedge fund industry. This book has a tremendous wealth of information and is a valuable addition to the hedge fund literature. In addition, it will benefit institutional investors, high net worth individuals, academics and anyone interested in learning more about this fascinating and often mysterious world of privately managed money. Written by one of the most respected practitioners and academics in the area of hedge funds, Greg N. Gregoriou, Professor of finance and research coordinator in the School of Business and Economics at Plattsburgh State University of New York. This is a landmark book on quantitative approaches to hedge funds. All those with a stake in building hedge fund portfolios will highly profit from this exhaustive guide. A must read for all those involved in hedge fund investing. Pascal Botteron, Ph.D., Head of Hedge Fund Product Development, Pictet Asset Management.

François-Serge Lhabitant's second book will prove to be a bestseller too, just like *Hedge Funds: Myths and Limits*. He actually manages to make quantitative analysis approachable even for those less gifted with numbers. This book, like its predecessor, includes an unprecedented mix of common sense and sophisticated technique. A fantastic guide to the nuts and bolts of hedge fund analysis and a must for every serious investor. Barbara Rupp, Bee, Head of Alternative Fund Investment Group, HSBC Private Bank, Switzerland. An excellent book providing deep insights into the complex quantitative analysis of hedge funds in the most lucid and intuitive manner. A must have supplement to Lhabitant's first book dealing with the mystical and fascinating world of hedge funds. Highly recommended. Vikas Agarwal, Assistant Professor of Finance, J. Mack Robinson College of Business, Georgia State University.

Lhabitant has done it again. Whereas most books on hedge funds are nothing more than glorified marketing brochures, Lhabitant's new book tells it how it is in reality. Accessible and understandable but at the same time thorough and critical. Harry M. Kat, Ph.D., Professor of Risk Management and Director, Alternative Investment Research Centre, Cass Business School, City University.

Lhabitant's latest work on hedge funds yet again delivers on some ambitious promises. Successfully bridging theory and practice in a highly accessible manner, those searching for a thorough yet unintimidating introduction to the quantitative methods of hedge fund analysis will not be disappointed. Christopher L. Culp, Ph.D., Adjunct Professor of Finance, Graduate School of Business, The University of Chicago and Principal, Chicago Partners LLC.
