Bowen, Andreas Fett, Michael G. Hinchey, 2011-04-06 1 In a number of recent presentations most notably at FME 96 one of the foremost scientists in the field of formal methods C A R Hoare has highlighted the fact that formal methods are not the only technique for producing reliable software This seems to have caused some controversy not least amongst formal methods practitioners How can one of the founding fathers of formal methods seemingly denounce the field of research after over a quarter of a century of support This is a question that has been posed recently by some formal methods skeptics However Prof Hoare has not abandoned formal methods He is reiterating 2 albeit more radically his 1987 view that more than one tool and notation will be required in the practical industrial development of large scale complex computer systems and not all of these tools and notations will be or even need be formal in nature Formal methods are not a solution but rather one of a selection of techniques that have proven to be useful in the development of reliable complex systems and to result in hardware and software systems that can be produced on time and within a budget while satisfying the stated requirements After almost three decades the time has come to view formal methods in the context of overall industrial scale system development and their relationship to other techniques and methods We should no longer consider the issue of whether we are pro formal or anti formal but rather the degree of formality if any that we need to support in system development This is a goal of ZUM 98 the 11th International Conference of Z Users held for the first time within continental Europe in the city of Berlin Germany Extended Reality Lucio Tommaso De Paolis, Pasquale Arpaia, Marco Sacco, 2022-08-27 This two volume proceedings LNCS 13445 and 13446 constitutes the refereed proceedings of the 9th International Conference on Augmented Reality Virtual Reality and Computer Graphics XR Salento 2022 held in Lecce Italy July 6-8 2022 Due to COVID 19 pandemic the conference was held as a hybrid conference The 42 full and 16 short papers were carefully reviewed and selected from 84 submissions The papers discuss key issues approaches ideas open problems innovative applications and trends in virtual reality augmented reality mixed reality applications in cultural heritage in medicine in education and in industry Elbow

Oliveira, Pamela Zave, 2003-06-29 FME 2001 is the tenth in a series of meetings organized every eighteen months by Formal Methods Europe FME an independent association whose aim is to stimulate the use of and research on formal methods for software development It follows four VDM Europe Symposia four other Formal Methods Europe Symposia and the 1999 World Congress on Formal Methods in the Development of Computing Systems These meetings have been notably successful in bringing together a community of users researchers and developers of precise mathematical methods for software development FME 2001 took place in Berlin Germany and was organized by the Computer Science Department of the Humboldt University at Berlin The theme of the symposium was Formal Methods for Increasing Software Productivity This theme recognizes that formal methods have the potential to do more for industrial software development than enhance software quality they can also increase productivity at many different points in the software life cycle The importance of the theme is borne out by the many contributed papers showing how formal methods can make software development more efficient There is an emphasis on tools that find errors automatically or with relatively little human effort There is also an emphasis on the use of formal methods

to assist with critical labor intensive tasks such as program design and test case generation

Design and Analysis of Cross-Over Trials, Second Edition Byron Jones, Michael G.
