Moral García, 2019-01-15 Nueva edición de Medicina Transfusional y perioperatoria en la que predomina el enfoque eminentemente práctico y el requerimiento de presentar un contenido que se adapte a las necesidades formativas y de actualización de los profesionales que trabajan en esta área. En la nueva edición se reorganiza el índice de contenidos eliminando alguno de los capítulos más generalistas de la primera edición e introduciendo capítulos nuevos que abordan temas prácticos y novedosos dentro de la medicina transfusional. Uno de los objetivos prioritarios de este manual es presentar un índice ajustado a las necesidades de aprendizaje de los profesionales en todas las áreas vinculadas con la medicina transfusional: hemostasia, transfusión sanguínea y fluidoterapia. Los capítulos presentan una estructura homogénea y un enfoque más moderno que incluir además objetivos de aprendizaje en todos ellos para resaltar aquella información más relevante a la que ha de estar atento el especialista. El Doctor Juan Vicente Llau, director de esta obra, ha orientado los contenidos de la misma para que sea de utilidad a todos aquellos profesionales involucrados en el proceso asistencial perioperatorio, haciendo hincapié en aquellos aspectos relacionados con la medicina transfusional.
