Levinson, Sarah Cutfield, Michael J. Dunn, N. J. Enfield, Sérgio Meira, 2018-07-19 The definitive guide to demonstratives which play a key role in language acquisition and use Outside-In □ Inside-Out Costantino Maeder, Olga Fischer, William J.

Herlofsky, 2005-02-28 This fourth volume of the Iconicity series is like its predecessors devoted to the study of iconicity in language and literature in all its forms Many of the papers turn the notion of iconicity inside out some suggesting that less is more others focus on the cognitive factors inside the brain that are important for the iconic phenomena that are produced in the outside world In addition this volume includes a paper related to iconicity in music and its interaction with language Other papers range from the theoretical issues involved in the evolution of language to those that offer many inside out claims such as claiming that nouns are derived from pronouns and as such should more properly be called pro pronouns Also this volume includes perhaps the first English language analysis of the iconic aspects of sound symbolism in a prayer from the Koran This is a truly interdisciplinary collection that should turn some of the notions of iconicity in language and literature outside in and inside out Case Studies of Linguistic Representations of Motion Yo Matsumoto, 2025-02-17 How

languages describe spatial motion events has been a hotly discussed topic in recent years in cognitive linguistics and linguistic typology This two volume book provides new descriptions and proposals on this fascinating topic based on a large scale experimental study of motion event descriptions in almost 20 languages across the globe as part of a research project conducted by NINJAL The chapters are based on papers presented at international conferences most at NINJAL international

symposium held in January 2019 some at International Cognitive Linguistics Conferences in 2017 and 2019 This volume provides valuable descriptions of familiar and unfamiliar languages as well as insightful discussions of controversial issues based on those descriptions This book would interest students in linguistics and cognitive science in Asia Pacific Europe and North America Methods in Cognitive Linguistics Monica Gonzalez-Marquez, 2007 Methods in Cognitive Linguistics is an introduction to empirical methodology for language researchers Intended as a handbook to exploring the empirical dimension of the theoretical questions raised by Cognitive Linguistics the volume presents guidelines for employing methods from a variety of intersecting disciplines laying out different ways of gathering empirical evidence The book is divided into five sections Methods and Motivations provides the reader with the preliminary background in scientific methodology and statistics The sections on Corpus and Discourse Analysis and Sign Language and Gesture describe different ways of investigating usage data Behavioral Research describes methods for exploring mental representation simulation semantics child language development and the relationships between space and language and eye movements and cognition Lastly Neural Approaches introduces the reader to ERP research and to the computational modeling of language **Grounding** Frank Brisard, 2012-08-28 This compilation of invited contributions gathering an international collection of cognitive and functional linguists offers an outline of original empirical work carried out in grounding theory Grounding is a central notion in cognitive grammar that addresses the linking of semantic content to contextual factors that constitute the subjective ground or situation of speech The volume illustrates a growing concern with the application of cognitive grammar to constructions establishing deixis and reference It proposes a double focus on nominal and clausal grounding as well as on ways of integrating analyses across these domains **Fillers, Pauses and Placeholders** Nino Amiridze, Boyd H. Davis, Margaret MacLagan, 2010 Fillers are items that speakers insert in spontaneous speech as a repair strategy Types of fillers include hesitation markers and placeholders Both are used to fill pauses that arise during planning problems or in lexical retrieval failure However while hesitation markers may not bear any resemblance to lexical items they replace placeholders typically share some morphosyntactic properties with the target form Additionally fillers can function as a pragmatic tool in order to replace lexical items that the speaker wants to avoid mentioning for some reason The present volume is the first collection on the topic of fillers and will be a useful reference work for future investigations on the topic It consists of typological surveys and in depth studies exploring the form and use of fillers across languages and sections of different populations including cognitively impaired speakers The volume will be interesting to typologists and linguists working in discourse studies *Manual of Deixis in Romance Languages* Konstanze Jungbluth, Federica Da Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years It is crucial for a number of different subdisciplines pragmatics semantics cognitive and contrastive linguistics to name just a few The subject is of particular interest to experts and students philosophers teachers philologists and psychologists interested in the study of

their language or in comparing linguistic structures The different deictic structures not only the items themselves but also the oppositions between them reflect the fact that neither the notions of space time person nor our use of them are identical cross culturally This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties This volume will provide an overview of the field focusing on Romance languages but also reaching beyond this perspective Chapters on diachronic developments language change comparisons with other non European languages and on interfaces with neighboring fields of interest are also included The editors and authors hope that readers regardless of their familiarity with Romance languages will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world Understanding Pragmatics Gunter Senft,2014-01-21 Understanding Pragmatics takes an interdisciplinary approach to provide an accessible introduction to linguistic pragmatics This book discusses how the meaning of utterances can only be understood in relation to overall cultural social and interpersonal contexts as well as to culture specific conventions and the speech events in which they are embedded From a cross linguistic and cross cultural perspective this book debates the core issues of pragmatics such as speech act theory conversational implicature deixis gesture interaction strategies ritual communication phatic communion linguistic relativity ethnography of speaking ethnomethodology conversation analysis languages and social classes and linguistic ideologies incorporates examples from a broad variety of different languages and cultures takes an innovative and transdisciplinary view of the field showing linguistic pragmatics has its predecessor in other disciplines such as philosophy psychology ethology ethnology sociology and the political sciences Written by an experienced teacher and researcher this introductory textbook is essential reading for all students studying pragmatics *Distance in Language* Anastasia Meermann,Barbara Sonnenhauser,2015-06-18 The conceptual metaphor of distance plays a crucial role in current perceptions of the world and humans various interactions within it It hardly seems possible to conceptualize space and time emotional involvement in events and relationships with other people in terms other than distance As a consequence this primarily spatial concept figures prominently in the verbal expression of these abstract notions and is thus highly relevant for the analysis of linguistic phenomena In recent **Space and Time in aṣ-Ṣānī' Arabic** Letizia Cerqueglini,2022-08-01 What is the relationship between spatial and temporal representations in language and cognition What is the role of culture in this relationship I enter this discussion by offering a community based cross generational study on the community of speakers of a ni Arabic members of a Negev Desert Bedouin tribe in Israel The book presents the results of ten years of fieldwork the linguistic and cognitive profiles of three generations and first hand narration of a century of history from nomadism to sedentarism between conservation resilience and change Linguistic and cognitive representations change with lifestyle culture and relationships with nature and landscape Language changes more rapidly than cognitive structures and the relationship between spatial and temporal representations is complex and multifaceted *Essays on Fiction and Perspective*

Göran Rossholm, 2004 The book is the result of a conference about the interrelated concepts of fiction and perspective in Stockholm 2001 The concepts of fiction and perspective have played a number of crucial roles in the Humanities during the last fifty years in particular in the intersection between linguistics the aesthetic disciplines and philosophy The writers in this anthology discuss some of the most debated questions in this context such as different conceptions of point of view in narrative fiction historical counterfactual fiction the relationship between fact and fiction in historiography how to understand and analyze statements about an individual's belief perspective and how everyday discourse is anchored in perspective views of the world

Constructions in Cognitive Contexts Franziska Günther, 2016-11-07 In what ways are language cognition and perception interrelated Do they influence each other This book casts a fresh light on these questions by putting individual speakers cognitive contexts i.e. their usage preferences and entrenched patterns of linguistic knowledge into the focus of investigation It presents findings from original experimental research on spatial language use which indicate that these individual specific factors indeed play a central role in determining whether or not differences in the current and/or habitual linguistic behaviour of speakers of German and English are systematically correlated with differences in non linguistic behaviour visual attention allocation to and memory for spatial referent scenes These findings form the basis of a new speaker focused usage based model of linguistic relativity which defines language perception cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities

Cognitive Stylistics Elena Semino, Jonathan Culpeper, 2002-11-05 This book represents the state of the art in cognitive stylistics a rapidly expanding field at the interface between linguistics literary studies and cognitive science The twelve chapters combine linguistic analysis with insights from cognitive psychology and cognitive linguistics in order to arrive at innovative accounts of a range of literary and textual phenomena The chapters cover a variety of literary texts periods and genres including poetry fictional and non fictional narratives and plays Some of the chapters provide new approaches to phenomena that have a long tradition in literary and linguistic studies such as humour characterisation figurative language and metre others focus on phenomena that have not yet received adequate attention such as split selves phenomena mind style and spatial language This book is relevant to students and scholars in a wide range of areas within linguistics literary studies and cognitive science

Special Indefinites in Sentence and Discourse Sofiana Lindemann, 2020-03-09 Das vorliegende Buch untersucht die semantischen und diskurs pragmatischen Eigenschaften indefiniter Nominalphrasen Dabei wird der Zusammenhang zwischen den folgenden zwei Faktoren untersucht i) der referenziellen Form markierte indefinite Nominalphrasen vs unmarkierte indefinite Nominalphrasen und ii) dem diskursstrukturierenden Potential Durch eine sprachvergleichende Studie mit Schwerpunkt auf Englisch Deutsch und Rumänisch wird die Analyse der Funktionen unterschiedlicher indefiniten Nominalphrasen empirisch gestützt und weiterentwickelt Damit wird die Arbeit zu einem besseren Verständnis von Textstruktur den kognitiven Grundlagen von Textproduktion und Textverständnis sowie den

allgemeinen Prinzipien der Kommunikation zwischen Gesprächsteilnehmern beitragen

Children's Discourse Maya Hickmann, 2002-11-21 This comparative study explores two central questions in the study of first language acquisition What is the relative impact of structural and functional determinants What is universal versus language specific during development Maya Hickmann addresses these questions in three domains of child language reference to entities the representation of space and uses of temporal aspectual markings She provides a thorough review of different theoretical approaches to language acquisition and a wide range of developmental research as well as examining all three domains in English French German and Chinese narratives Hickmann's findings concern the rhythm of acquisition the interplay among different factors syntactic semantic pragmatic determining children's uses and universal versus variable aspects of acquisition Her conclusions stress the importance of relating sentence and discourse determinants of acquisition in a crosslinguistic perspective Children's Discourse will be welcomed by those working in psychology and language related disciplines interested in first language acquisition

Between Grammar and Lexicon Ellen Contini-Morava, Y. Tobin, 2000 The essays in this volume explore the relationship between lexical and grammatical categories calling into question the strict dichotomy between the two that is sometimes assumed

Toward a Typology of European Languages Johannes Bechert, Giuliano Bernini, Claude Buridant, 2011-04-20 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics

Routledge Dictionary of Language and Linguistics Hadumod Bussmann, 2006-02-20 The Routledge Dictionary of Language and Linguistics is a unique reference work for students and teachers of linguistics The highly regarded second edition of the *Lexikon der Sprachwissenschaft* by Hadumod Bussmann has been specifically adapted by a team of over thirty specialist linguists to form the most comprehensive and up to date work of its kind in the English language In over 2 500 entries the Dictionary provides an exhaustive survey of the key terminology and languages of more than 30 subdisciplines of linguistics With its term based approach and emphasis on clear analysis it complements perfectly Routledge's established range of reference material in the field of linguistics
