the very definition of force particularly to accommodate targeted extrajudicial executions and cyber operations Finally the new edition provides detailed coverage of the concept of self defense reflecting recent interpretations of the International Court of Justice and the ongoing controversies surrounding its definition and interpretation

Theorising Comparative History for the Ancient Mediterranean Stephen Harrison,Dylan James,2025-08-26 Theorising Comparative History for the Ancient Mediterranean examines how soft comparative history can illuminate the ancient Mediterranean world This approach employs alternative periods and settings to prompt new understandings of antiquity but differs from a side by side hard comparison This volume represents the first attempt to theorise the methodology and scrutinise its value for studying the ancient world The book s ten chapters examine a cross section of ancient cultures Greece Rome Egypt India Afghanistan China and range across political social economic cultural intellectual and military history demonstrating the versatility of the approach Contributions draw from a variety of comparative settings e g Spanish America contemporary sub Saharan Africa Early Modern Europe the Antebellum American South and demonstrate that there are myriad comparative paths to prompt rethinking about antiquity Each contributor reflects on their own individual practice and the introduction meditates on the strengths limitations and commonalities across these chapters The volume thus offers a blueprint for how scholars in various fields can utilise comparative history

Undressed Toronto Dale Barbour,2021-10-01 Undressed Toronto looks at the life of the swimming hole and considers how Toronto turned boys skinny dipping into comforting anti modernist folk figures By digging into the vibrant social life of these spaces Barbour challenges narratives that pollution and industrialization in the nineteenth century destroyed the relationship between Torontonians and their rivers and waterfront Instead we find that these areas were co opted and transformed into recreation spaces often with the acceptance of indulgent city officials While we take the beach for granted today it was a novel form of public space in the nineteenth century and Torontonians had to decide how it would work in their city To create a public beach bathing needed to be transformed from the predominantly nude male privilege that it had been in the mid nineteenth century into an activity

that women and men could participate in together That transformation required negotiating and establishing rules for how people would dress and behave when they bathed and setting aside or creating distinct environments for bathing Undressed Toronto challenges assumptions about class the urban environment and the presentation of the naked body It explores anxieties about modernity and masculinity and the weight of nostalgia in public perceptions and municipal regulation of public bathing in five Toronto environments that showcase distinct moments in the transition from vernacular bathing to the public beach the city's central waterfront Toronto Island the Don River the Humber River and Sunnyside Beach on Toronto's western shoreline *The Right to Privacy in Employment* Marta Otto, 2016-11-03 At the beginning of the twenty first century the term privacy gained new prominence around the world but in the legal arena it is still a concept in disarray Enclosing it within legal frameworks seems to be a particularly difficult task in the employment context where encroachments upon privacy are not only potentially more frequent but also and most importantly qualitatively different from those taking place in other areas of modern society This book suggests that these problems can only be addressed by the development of a holistic approach to its protection an approach that addresses the issue of not only contemporary regulation but also the conceptualization adjudication and common public perception of employees privacy The book draws on a comprehensive analysis of the conceptual as well as regulatory convergences and divergences between European American and Canadian models of privacy protection to reconsider the conceptual and normative foundations of the contemporary paradigm of employees privacy and to elucidate the pillars of a holistic approach to the protection of right to privacy in employment *Political Economy for Human Rights* Manuel Couret Branco, 2019-06-05 Over time there has been a miscommunication between mainstream economics and human rights that has paved the way to a justificatory ideology that validates the submission of human rights to the logic of market capitalism This book shows how the discourse of mainstream economics is intrinsically opposed to the strengthening of human rights and outlines the principles upon which a human rights based political economy can be built Considering a variety of recognized human rights such as the right to water and sanitation the right to social security the right to work cultural freedom and democracy this book describes how mainstream economics theory conflicts with these rights and explores alternative modes of thinking that incorporate human rights concerns into economics Moreover the book also reflects on the teaching of political economy for human rights It sets out that a political economy favourable to human rights must be pluralist interdisciplinary participatory de commodified non utilitarian and non consequentialist The author proposes that it must not only assume the performative character of economics but also and especially its transformative purpose *Political Economy for Human Rights* will offer students academics activists and policy makers useful tools to understand some of the main contradictions of contemporary societies and new paths leading to a more just and fraternal world It will also be of great interest to the general public concerned with human rights and economic issues **Tackling Precarious Work** Stuart C. The Routledge History of Emotions in the Modern World Katie Barclay, Peter N. Stearns, 2022-08-09

The Routledge History of Emotions in the Modern World brings together a diverse array of scholars to offer an overview of the current and emerging scholarship of emotions in the modern world. Across thirty-six chapters, this work enters the field of emotion from a range of angles. Named emotions (love, anger, fear) highlight how particular categories have been deployed to make sense of feeling and their evolution over time. Geographical perspectives provide access to the historiographies of regions that are less well covered by English language sources, opening up global perspectives and new literatures. Key thematic sections are designed to intersect with critical historiographies, demonstrating the value of an emotions perspective to a range of areas. Topical sections direct attention to the role of emotions in relations of power, to intimate lives and histories of place as products of exchanges across groups and as deployed by new technologies and media. The concepts of globalisation and modernity run through the volume, acting as foils for comparison and analytical tools. The Routledge History of Emotions in the Modern World is the perfect resource for all students and scholars interested in the history of emotions across the world from 1700.
