Manual On Meat Inspection For Developing Countries:

Manual on Meat Inspection for Developing Countries Drago Carl Herenda, P. G. Chambers, Food and Agriculture Organization of the United Nations, 1994-01-01 *The Technology of Making Cheese from Camel Milk (Camelus Dromedarius)* J.-P. Ramet, Food and Agriculture Organization of the United Nations, 2001-01-01 Research has shown that the camel is the most efficient domestic animal for converting vegetative matter into work milk and meat Camel milk is already used for human consumption in its fresh or fermented forms or as butter but only rarely as cheese Camel milk is more technically difficult to process than milk from other domestic animals and some researchers have even claimed that camel milk cheese would be impossible to produce However if normal cheese making procedures are adapted to camel milk's particular characteristics satisfactory cheeses can be made The technology of making cheese from camel milk describes the composition of camel milk compares it with other milks and explains how it can be used to make cheese Ostrich Production Systems M. M. Shanawany, John Dingle, 1999 **Livestock Keeping in Urban Areas** Hans Schiere, Rein van der Hoek, 2001-01-01 Livestock play an important but variable role in both rural and urban societies At the request and with the support of the Japanese Government FAO has compiled experiences of livestock keeping from different parts of the world categorized by production systems to make it easier for interested people to select ideas for their own conditions This document presents a sample of such technologies intended for livestock keeping in urban and peri urban areas It describes the livestock production system in traditional sectors and identifies constraints Suggestions for improving production in the livestock sector are given and a literature list is included for further reference **Good Practices in Planning and Management of Integrated Commercial Poultry Production in South Asia** R. Prabakaran, 2003-01-01 This publication reviews all aspects of poultry production in South Asia including layer production for eggs and broilers for meat Information is given on feeding and nutrition housing and general husbandry as well as on flock health Regional specificity always exists but this type of production also shows the many similarities in other parts of the world with regard to potential and constraints Control of contagious bovine pleuropneumonia - A policy for coordinated actions Food and Agriculture Organization of the United Nations, 2019-03-27 Contagious bovine pleuropneumonia CBPP is an insidious disease that lingers in herds causing significant morbidity and mortality The policies to address the control and management of CBPP are in disarray at both the national and international levels There has not been significant improvement in the efficacies of available vaccines or diagnostic assays for several decades Classic strategies of mass vaccination and strict movement control that once were perceived as successful in rolling back the disease have largely fallen due to high costs concerns of declining impact and growing public resistance Officially treatment with antibiotics is discouraged or prohibited yet their use is widespread CBPP is by all means an enigmatic disease whose control probably requires a new paradigm or out of the box thinking and executing approach The purpose of this document is to provide an evidence based policy for the implementation

of sound control of CBPP by all stakeholders at all levels global regional and national It describes a road map to CBPP control that is cognizant of the situation on the ground While not being prescriptive the document includes examples of combinations of interventions and control measures that should offer the opportunity to improve impact and hence offer better livelihoods to livestock producers

PROBIOTICS IN ANIMAL NUTRITION Food and Agriculture Organization of the United Nations,2018-08-22 This document presents a unique and exhaustive review of the state of knowledge on the use of probiotics in diverse livestock production systems and their impact on animal productivity It focuses specifically on definitions production mechanisms of action applications effects safety and potential public health risks of probiotics In addition the labelling of probiotic products and global regulatory status of probiotics in animal feed is also covered This publication will inform those that are interested in identifying and designing interventions for increasing animal productivity It would also give an impetus to the development of new probiotics having consistent long term effects that could possibly be used in feed in place of antibiotic growth promoters

Food Safety in Low and Middle Income Countries Delia Grace,Bassirou Bonfoh,Hung Nguyen-Viet,Barbara Häsler,2024-02-23 Foodborne diseases FBD are an important externality of agriculture and food systems but only recently have they risen up the development agenda as the result of growing awareness of the health and economic burdens of FBD and how they relate to food systems with a focus on low income and middle income countries LMIC particularly African nations The health burden of FBD is comparable with that of malaria and over 90% falls on people in LMIC with an economic burden of more than US 100 million per year FBD have many other less well estimated effects on nutrition gender equity and the environment While understanding of food safety in domestic markets of LMICs has advanced greatly risk management is in its infancy This Research Topic will bring together leading regional perspectives on food safety in LMICs

Qualitative risk assessment for African swine fever virus introduction Rozstalnyy, A., Roche, X., TagoPacheco, D., Kamata, A., BeltranAlcrudo, D., Khomenko, S., Lockhart, C., Urdaz, J., Gioia, G., Gonzalez Serrano, A., VonDobschuetz, S., Dhingra, M., Sumption, K.,2022-02-28 Following the re introduction of the African swine fever virus ASFV in the Americas after 40 years of absence FAO conducted a qualitative risk assessment for the likelihood of entry of ASF from the Dominican Republic and Haiti to unaffected countries and territories of the Americas and the likelihood of exposure to susceptible animal populations should the disease be introduced In addition the potential economic and social impact of ASFV spreading across the continent was assessed The risk assessment covers the period of December 2021 to February 2022 and considered six risk pathways of introduction and spread The methodology information used and results of the risk assessment and economic impact assessment are available in this publication along with recommendations for prevention and control of ASFV introduction and spread in the region In addition the publication compiles information collected from 35 countries territories in the Americas through a questionnaire and presents evidence on the complex swine pork value chains in the region retrieved from various sources

Village Chicken Production Systems in Rural Africa Aichi J. Kitalyi, Food and Agriculture Organization of the United Nations, 1998-01-01 The poultry production systems of Africa are mainly based on the scavenging indigenous chickens found in virtually all villages and households in rural Africa These systems are characterized by low output per bird Nevertheless over 70 percent of the poultry products and

20 percent of animal protein intake in most African countries come from this sector Therefore increased rural poultry production would result in a positive impact on household food security both in increased dietary intake and in income generation This study coincided with the World Food Summit held at FAO Rome from 13 to 17 November 1996 where delegations committed their governments and civil society to a global attack on food insecurity and poverty Poultry like other short cycle animal stock is viewed by the FAO Special Programme for Food Security SPFS as a crucial element in the struggle for sustained food production and poverty alleviation The guidelines provided in this study are particularly pertinent to those countries participating in the SPFS where village chicken production will have a substantial impact on increased household food security and gender equity Foreword
