

Math 302: Solutions to Homework

Steven Miller

December 14, 2010

Abstract

Below are detailed solutions to the homework problems from Math 302: Complex Analysis (Williams College, Fall 2010, Professor Steven J. Miller, sjm1@williams.edu). The course homepage is

[http://www.williams.edu/Mathematics/
sjmiller/public_html/302](http://www.williams.edu/Mathematics/sjmiller/public_html/302)

and the textbook is *Complex Analysis* by Stein and Shakarchi (ISBN 13: 978-0-691-11385-2). Note to students: it's nice to include the statement of the problems, but I leave that up to you. I am only skimming the solutions. I will occasionally add some comments or mention alternate solutions. If you find an error in these notes, let me know for extra credit.

Sacco,Fausto Saleri,2006-10-19 This book provides the mathematical foundations of numerical methods and demonstrates their performance on examples exercises and real life applications This is done using the MATLAB software environment which allows an easy implementation and testing of the algorithms for any specific class of problems The book is addressed to students in Engineering Mathematics Physics and Computer Sciences

In the second edition of this extremely popular textbook on numerical analysis the readability of pictures tables and program headings has been improved Several changes in the chapters on iterative methods and on polynomial approximation have also been

Modeling and Optimization of Interdependent Energy Infrastructures Wei Wei,Jianhui Wang,2019-10-22 This book opens up new ways to develop

mathematical models and optimization methods for interdependent energy infrastructures ranging from the electricity network natural gas network district heating network and electrified transportation network The authors provide methods to help analyze design and operate the integrated energy system more efficiently and reliably and constitute a foundational basis for decision support tools for the next generation energy network Chapters present new operation models of the

coupled energy infrastructure and the application of new methodologies including convex optimization robust optimization and equilibrium constrained optimization Four appendices provide students and researchers with helpful tutorials on advanced optimization methods Basics of Linear and Conic Programs Formulation Tricks in Integer Programming Basics of Robust Optimization Equilibrium Problems This book provides theoretical foundation and technical applications for energy system integration and the the interdisciplinary research presented will be useful to readers in many fields including electrical engineering civil engineering and industrial engineering

Teaching K-6 Mathematics Douglas K. Brumbaugh, 2014-04-08 This developmentally sound research based practical text speaks directly to preservice elementary mathematics students about the multitude of ways they can help their future students learn to see the power beauty necessity and usefulness of mathematics in the world Part 1 deals with guiding principles that permeate the text while Parts 2 11 deal with the specific NCTM Standards for grades K 6 Teaching K 6 Mathematics is aligned with the current NCTM Curriculum and Evaluation Standards for School Mathematics integrates content and methodology emphasizes use of technology as a teaching learning tool stresses problem solving provides basic information on current research in mathematics education focuses on identification of error patterns and analysis uses a down to earth friendly writing style that engages the student rather than prescribing what to do and includes many activities and exercises including games tricks and amusements that can be used in the classroom to increase student interest in mathematics Features Technology is integral throughout the text Students are expected to perform Internet searches investigate new sites appropriate for elementary students sample new software that could be used in the classroom and develop ways to blend calculators into the curriculum Manipulatives are considered essential for students to learn elementary mathematics concepts Cuisenaire rods base 10 blocks chips number lines and geoboards are all part of the manipulative landscape that is created in this text Careful attention is given to blending rote work developmental activities fun application technology manipulatives assessment and planning so that prospective teachers become accustomed to using varied approaches and decision making as a curriculum is determined Tricks Activities and Games TAG provide a wealth of ideas to attract students to learning mathematics

Expertise in Mathematics Instruction Yeping Li, Gabriele Kaiser, 2010-12-15 Accumulated research findings in past decades have led to the common knowledge that teachers professional knowledge is essential to effective classroom instruction However there is still very limited understanding about the nature of teachers expertise in mathematics instruction Expertise in Mathematics

Instruction addresses this need clearly and concisely In particular it examines all aspects of emphases employed to characterize the nature of expertise in mathematics instruction from both researchers and practitioners perspectives Moreover with research contributions from both the East and the West this book also examines ideas pertinent to fostering and demonstrating expertise in mathematics instruction within different system contexts This book will raise questions and

issues for mathematics education researchers to guide a critical examination of what can be learned from other education systems Expertise in Mathematics Instruction builds on its theoretical and methodological approach with contributions from international experts in the field Additionally a review of related research from mathematics education serves as an introduction to the new research in both Eastern and Western settings Concluding this resource is a reflection on the benefits of this international collaboration and possible research directions for the future The final chapter cohesively joins traditional and current research for action Expertise in Mathematics Instruction is of interest to researchers in mathematics education mathematics teacher educators and mathematics educators
