*Women and False Choice: the Truth About Sexism* Muna Jawhary (PhD), 2014-10-21 This book invites us to abandon our gender identity and look deeper into who we truly are Cultural ideals that see women and men as fundamentally different manifest into a physical reality of sex differentiated behaviour be it in cognitive abilities psychological traits or even dispositions We know from epigenetic studies that there is no separation between mind and environment our perceptions of environmental signals filtered through cultural beliefs translate into a corresponding behaviour in order to maintain harmony between mind body and environment Social cultures the world over still see women as suited for care and service and men as suited for work outside the home As women make life career choices they are constrained by cultural ideas images and symbols that create the nurturance imperative in their psyche Women mistake this learnt nurturing behaviour of putting others interests before theirs for natural instinct and make choices that are not in line with their authentic self Women in other words unknowingly make false choices This is only half the story of sexism in our societies The other and more toxic half is that in order to fulfill the gender agenda of women are care givers and men are providers girls are brought up to be feminine only and boys are brought up to be masculine only Inevitably any aspects of the self that are thought to belong to the opposite sex are repressed which gives us a sense of lack and feelings of inadequacy and results in a disconnection from the heart and alienation from the true self The book also shows how our sexist thoughts manifest in a sex biased reality in the workplace Neuroplasticity and epigenetic laws are used to suggest ways of radically changing the work environment to one that is equally supportive of womens and mens success The new work environment and work practices can profoundly change how businesses operate in the world allowing them to become more adept at generating profit in todays overly competitive globalized markets
