Alcuin's Recreational Mathematics Marcel Danesi, 2024-11-01 *Propositiones ad acuendos juvenes* Problems to Sharpen the Young is a ninth century book written by medieval teacher and scholar Alcuin of York Today it has become one of the foundational texts in what is commonly called recreational mathematics The book has been translated in many languages and analysed from various mathematical angles and perspectives from contemporary arithmetic and geometry to the nature of sequences It is not only a collection of ingenious and challenging puzzles but the core ideas collected in this book have become major themes and branches of mathematics Here Marcel Danesi revisits all fifty three problems in Alcuin's original text providing detailed solutions and analyses Alcuin's Recreational Mathematics examines the problems in the *Propositiones* in easy to follow language extracting from them the notions and techniques that today constitute basic mathematics Each chapter discusses Alcuin's problems more broadly and ends with ten exploratory puzzles based on Alcuin's original problems and related themes Answers and detailed solutions are included at the back Alcuin's Recreational Mathematics demonstrates how Alcuin's *Propositiones* puts basic mathematical thinking on display via ingenious problems that often require outside of the box thinking constituting an original and imaginative investigation of mathematics in its essence
