Traditional Chinese Non-Pharmacological Therapy for Neuro-musculoskeletal Disorders Min Fang, Jing Xian Li, Yan-Qing Wang, 2023-10-18

Brain and Spinal Tumors of Childhood David A. Walker, Giorgio Perilongo, Roger E. Taylor, Ian F. Pollack, 2020-11-22 This second edition comes at a time of a paradigm shift in understanding of the molecular pathology and neuroscience of brain and spinal tumors of childhood and their mechanisms of growth within the developing brain. Excellent collaborative translational networks of researchers are starting to drive change in clinical practice through the need to test many ideas in trials and scientific initiatives. This text reflects the growing concern to understand the impact of the tumour and its treatment upon the full functioning of the child's developing brain and to integrate the judgments of the risks of acquiring brain damage with the risk of death and the consequences for the quality of life for those who survive. Information on the principles of treatment has been thoroughly updated. A chapter also records the extraordinary work done by advocates. All medical and allied professionals involved in any aspect of the clinical care of these patients will find this book an invaluable resource.

Physiotherapy and Occupational Therapy for People with Cerebral Palsy Karen Dodd, Christine Imms, Nicholas F. Taylor, 2010-03-08 This book is a practical resource for physiotherapists and occupational therapists who support people with cerebral palsy, helping them to solve the problems with movement and other impairments that so often accompany cerebral palsy so that they can be more active and better able to participate in roles such as study work, recreation and relationships. The first chapters provide the background to the clinical reasoning approach that informs the whole text as well as an overview of therapeutic interventions. The subsequent chapters present clinical situations that therapists will encounter in the course of their work with individuals with cerebral palsy across the lifespan. Each chapter describes a case in detail, including the reasoning behind assessment and treatment choices, interventions and outcomes. The themes emphasized throughout the book are the use of the clinical reasoning approach of the intervention process model, the International Classification of Functioning, Disability and Health as a framework to help therapists inform patient and family decision making, family-centred approaches in developing and implementing therapeutic strategies and multidisciplinary team work.

Physiotherapy for Children Teresa Pountney, 2007-09-13 A comprehensive clinical manual and reference on paediatric physiotherapy which examines all of the theoretical and clinical aspects of physiotherapy provision for children and young adults, including Neurology, Cardio-respiratory, Musculoskeletal, Oncology and palliative care, Mental health, Acquired brain injury. Dr Teresa Pountney heads up a team of experienced practitioners who cover a range of conditions from those experienced by the typically developing child to those with disabilities and diseases. The changing needs of children with long-term conditions are described as well as methods of service delivery to enable children and families to benefit as much as possible from their treatment. The different settings in which physiotherapy is provided for children, school, home and hospital, is described in addition to strategies and legislation relating to this. Strong emphasis on evidence-based practice. Case studies illustrate practical applications of concepts and techniques and offer clinical reasoning behind decision making.

Outcome measures discussed in depth over 14 different assessments are reviewed Up to date most recent research and newest legislation taken into account
