several years there has been increasing concern from regulators and the environmental community. There has been a quest for more information on the composition, treatment systems and chemicals discharge characteristics, disposal options and fate and effects of the produced water. As so often happens, much of this information exists in the forms of reports and internal research papers. This symposium and publication was intended to make this information available both for open discussion at the conference and for peer review before publication. *Publish!*, 1996 **Electrical Manufacturing**, 1955
