

The diagram illustrates the greenhouse effect. At the top, a bright orange circle labeled 'Sun' emits numerous rays of light. These rays, labeled 'Incoming solar radiation', travel downwards towards a blue and green globe labeled 'Earth'. On the left side of the globe, some rays are shown being reflected away from the surface and atmosphere, labeled 'Reflection (some of the incoming radiation is reflected by Earth's surface and the atmosphere back out to Space)'. On the right side, more rays are shown hitting the surface, labeled 'Absorption (most radiation is absorbed by the Earth's surface and warms it)'. From the right side of the globe, some rays are shown escaping into the space above, labeled 'Some heat passes out into Space'. On the far right, a text block explains that 'Most heat is absorbed and re-emitted by greenhouse gas molecules, further warming Earth', with lines pointing to the atmosphere.
