Hunt]. , *Principia Intellegentia: The Principals Governing Human and Machine Intelligence* Roger Kingdon, 2009-07-14 Principia Intellegentia makes the case for considering the phenomenon of intelligence in humans to be entirely bound up with their individual ability to learn It does this by setting out a high level description of how humans learn and then showing how this description for many aspects of the human condition In addition Principia Intellegentia makes the case for applying this same description to the design of learning algorithms for automated computing machines thereby addressing the greatest intellectual challenge of our age the quest for artificial intelligence This book is a scientific monograph that describes original contributions to a wide variety of fields including neuroscience psychology sociology artificial intelligence and the philosophy of science However it has been written in a style that makes it accessible to the intelligent non expert such that it may be classified as popular science This combination invites comparison with great works of mass appeal such as *The Origin of species* *The Golden Bough* and *The Structure of Scientific Revolutions* *High Luminosity Large Hadron Collider, The: New Machine For Illuminating The Mysteries Of The Universe (Second Edition)* Lucio Rossi, Oliver Bruning, 2024-02-06 This book introduces the physics and technology of the High Luminosity Large Hadron Collider LHC highlighting the most recent modifications that shaped the final configuration which is now in the advanced stages of its construction This new High Luminosity configuration of the LHC is the major accelerator project of this decade and will give new life to the LHC after its first fifteen years of operation allowing for more precise measurements of the Higgs Boson and extending the mass limit reach for new particles The LHC is such a highly optimized machine that upgrading it requires breakthroughs in many areas Unsurprisingly the High Luminosity LHC required a long R D period to bring into life an innovative accelerator magnet based on Nb3Sn and capable of generating fields in the 11 12 T range as well as many other new accelerator technologies such as superconducting compact RF crab cavities advanced collimation concepts a novel powering technology based on high temperature superconducting links and others The book is a self consistent series of papers which addresses all technology and design issues Each paper can be read separately as well The first few papers provide a summary of the whole project the physics motivation and the accelerator challenges Altogether this book brings the reader to the heart of the technologies that will also be key for the next generation of hadron colliders This book is an essential reference for physicists and engineers in the field of hadron colliders and LHC related issues and can also be read by postgraduate students *Princess of the Blood Mages* Jennifer Haskin, Secrets from Fale's past haunt her and visions of the future might hold the key to her legacy Having vivid premonitions that come true is unusual but for Fale it's part of her routine once she turns eighteen She has no idea why When one of those premonitions allows her to save Keron the guy she loves their destiny is sealed and their lives are in great danger She suspects it has something to do
