streams They first illustrated the problem to geomorphologists and geographers Later Chang in his *Fluvial Processes in River Engineering* provided a basis for engineers showing this group of professionals how to deal with rivers and how to understand them Since then more informative studies have been published Many of the authors started to combine fluvial geomorphology knowledge and river engineering needs such as *Tools in Fluvial Geomorphology* by G Mathias Kondolf and Herv Pi gay or focused more on river engineering tasks such as *Stream Restoration in Dynamic Fluvial Systems Scientific Approaches* by Andrew Simon Sean Bennett and Janine Castro Finally Luna Leopold summarized river and stream morphologies in the beautiful *A view of the river* It appears that we continue to explore this subject in the right direction We better understand rivers and streams and as engineers and fluvial geomorphologists we can establish tools to help bring rivers alive However there is still a hunger for more scientific tools that we could use to further understand rivers and to support the development of healthy streams and rivers with high biodiversity in the present world which has started to face water scarcity

always shaped by local actors and concerns
