Going Fast With Light:

Quantum God, Fractal Jesus: How Isaac Newton Redefined God Without Really Meaning to, And Why We Really Don't Get God Andrew Fletcher, 2009-06-22 There may be just two great questions in life why am I here and why is there suffering In seeking answers to those questions believers and skeptics alike have reduced God and the character and our understanding of God into neat pointless little boxes into which neither God nor the universe fit In seeking resolution can it be found in science nature and the universe itself Does the universe hold clues to the nature of God and can it point in the direction of solving both the question of life s meaning and purpose and the existence of evil and suffering This is a beautifully and powerfully written book of science and faith seamlessly woven together not so much to provide answers as to break believers and skeptics out of their metaphysical theological and scientific ruts More Conversations with a Near-Death Experiencer Diane Goble, 2010-09-14 Diane Goble received emails from people all over the world 140 countries who visited her web site A Near Death Experience Beyond the Veil net from 1996 to 2008 This second book contains some of their conversations questions and debates about religion spirituality and beliefs plus a few relevant quotes and stories they passed on This book will open your mind and connect you to your soul I didn t just almost die I drowned I surrendered to the raging river and found myself out of my body looking down at the scene below I traveled to another dimension accompanied by a beautiful loving Being of Light and was given information to bring back to help humanity with the evolution of consciousness as we become Divine Humans Specifically the message I brought back is that we don t die The body dies but the essence of who we are continues We are eternal spiritual beings having temporary human experiences in physical worlds as part of our spiritual journey returning to the Source of our being As we learn to live without fear of death we become more loving and compassionate toward each other all sentient beings and this beautiful planet Over the 40 years since my NDE I ve become a deeply spiritual person I believe all religions have some truth but none have all the truth My answers to your questions are from my heart to open yours to Unconditional Love Namaste Islands of Space John Campbell, 2011-01-24 As Earth s faster than light spaceship hung in the void between galaxies Arcot Wade Morey and Fuller could see below them like a vast shining horizon the mass of stars that formed their own island universe Morey worked a moment with his slide rule then said We made good time Twenty nine light years in ten seconds Yet you had it on at only half power *Supreme Court*, 1917 **Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma** Mohammad H. Tamdgidi, 2020-01-20 In this major new study in the sociology of scientific knowledge social theorist Mohammad H Tamdgidi reports having unriddled the so called quantum enigma This book opens the lid of the Schrödinger s Cat box of the quantum enigma after decades and finds something both odd and familiar Not only the cat is both alive and dead it has morphed into an elephant in the room in whose interpretation Einstein Bohr Bohm and others were each both right and wrong because the enigma has acquired both localized and spread out features whose unriddling

requires both physics and sociology amid both transdisciplinary and transcultural contexts The book offers in a transdisciplinary and transcultural sociology of self knowledge framework a relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In Unriddling the Quantum Enigma the first volume of the series commonly titled Liberating Sociology From Newtonian toward Quantum Imaginations sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary scientists and scholars in the field This study is the first in the monograph series Tayyebbeh Series in East West Research and Translation of Human Architecture Journal of the Sociology of Self Knowledge XIII 2020 published by OKCIR Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics OKCIR is dedicated to exploring in a simultaneously world historical and self reflective framework the human search for a just global society It aims to develop new conceptual methodological theoretical historical practical pedagogical inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world history and her his selves constitute one another Reviews Mohammad H Tamdgidi s Liberating Sociology From Newtonian Toward Quantum Imaginations Volume 1 Unriddling the Quantum Enigma hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science namely many practitioners allegiance consciously or otherwise to persisting conceptions of science that

get in the way of scientific and other forms of theoretical advancement Newtonianism has achieved the status of an idol and its methodology a fetish the consequence of which is an ongoing failure to think through important problems of uncertainty indeterminacy multivariation multidisciplinary and false dilemmas of individual agency versus structure among many others Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering in effect a call for its teleological suspension thinking beyond disciplinarity through drawing upon and communicating with the resources of quantum theory not as a fetish but instead as an opening for other possibilities of social including human understanding The implications are far reaching as they offer as the main title attests liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things social This is exciting work A triumph The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done Professor Lewis R Gordon Honorary President of the Global Center for Advanced Studies and author of *Disciplinary Decadence Living Thought* in *Trying Times* Routledge Paradigm 2006 and *Freedom Justice and Decolonization* Routledge forthcoming 2020 Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of time and space Mohammad H Tamdgidi has produced a tour de force in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non dualistic non reductionist transcultural transdisciplinary post Einsteinian quantum concept of TimeSpace Tamdgidi goes beyond previous efforts done by titans of social theory such as Immanuel Wallerstein and Kyriakos Kontopoulos This book is a quantum leap in the social sciences at large Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews This book is a masterpiece in social theory for a 21st century decolonial social science A must read Professor Ramon Grosfoguel University of California at Berkeley Tamdgidi's *Liberating Sociology* succeeds in adding physical structures to the breadth of the world changing vision of C Wright Mills the man who mentored me at Columbia Relativity theory and quantum mechanics can help us to understand the human universe no less than the physical universe Just as my *Creating Life Before Death* challenges bureaucracy's conformist orientation so does *Liberating Sociology* liberate the infinite possibilities inherent in us Given our isolation in the Coronavirus era we have time to follow Tamdgidi in his journey into the depth of inner space where few men have gone before It is there that we can gain emotional strength just as Churchill Roosevelt and Mandela empowered themselves That personal development was needed to address not only their own personal problems but also the mammoth problems of their societies We must learn to do the same Bernard Phillips Emeritus Sociology Professor Boston University

Artificial Intelligence (AI) Harvey Cappel, 2023-11-09 A couple of reviews from my first book *True Story I Swear It Maybe* The best read ever When I want to laugh or cry I just go to the story that will give me the emotion I am looking for I love it and I have always loved your since of humor Entertaining and offbeat view of life Easy and funny read about author's life

experiences Reminds me of the late Justin Wilson This book is all random thoughts in one book and it really works I wish there were more books like this in the world

Easy-Gaited Horses Lee Ziegler, 2025-05-01 Enjoy a comfortable long distance ride on a well trained gaited horse and you ll be surprised at how easygoing these handsome animals can be But unique challenges can arise when horse owners more familiar with the standard walk trot and canter try to train these complex and multigearred horses to gait correctly Author Lee Ziegler guides riders through the finer points of developing and maintaining these extra gaits using humane training methods that stress patience and good horsemanship

Judaism, Physics and God Rabbi David W. Nelson, PhD, 2011-11-22 Hear the Voices of Ancient Wisdom in the Modern Language of Science Ancient traditions whose only claim to authenticity is that they are old run the risk of becoming old fashioned But if an ancient tradition can claim to be not only ancient but also timeless and contemporary it has a far greater chance of convincing each new young generation of its value Such a claim requires that each generation s retelling use the new metaphors of the new generation from Chapter 1 In our era we often feel that we can either speak about God or think scientifically about the world but never both at the same time But what if we reconciled the two How could the basic scientific truths of how the natural world came to be shape our understanding of our own spiritual search for meaning In this provocative fusion of religion and science Rabbi David Nelson examines the great theories of modern physics to find new ways for contemporary people to express their spiritual beliefs and thoughts Nelson explores cosmology quantum mechanics chaos theory relativity and string theory in clear non technical terms and recasts the traditional views of our ancestors in language that can be understood in a world in which space flight atom smashing and black holes are common features of our metaphorical landscape Judaism Physics and God reframes Judaism so that it is in harmony with the conquests of modern scientific thinking and introduces fascinating new ways to understand your relationship with God in context of some of the most exciting scientific ideas of the contemporary world

Fast Handling Technique Frank Bethwaite, 2013-05-12 From the author of the bestselling High Performance Sailing and

Higher Performance Sailing comes the first scientific analysis of what makes fast sailors fast Eschewing the idea that luck or innate talent are the keys to success Frank Bethwaite shows how knowledge truly is power Making use of video cameras aligned to GPS read outs to track the fastest racers he meticulously analyses what winners do and how they do it to show the rest of us how to get the best out of a racing craft Frank Bethwaite's previous books were groundbreaking bibles that applied scientific theories to how sails and hulls interact with wind and water to influence boat speed But whilst they applied scientific theories to boat construction they didn't apply science to practical boat handling This book fills that gap and then goes further Budding racers of all levels will welcome this unique book as a godsend It will inform instruct and enable them to employ the techniques and timing of the most successful racers and make racing more competitive for participants and more exciting for those of us watching

The Act in Context Steven C. Hayes, 2015-10-16 The Canonical Papers of Steven C Hayes is a compilation of his most pivotal articles written from 1982-2012 Through these selected papers Hayes again revisits the theoretical struggles between behavioral and cognitive behavior theories taking us from the 1980s into present day discussing the breakthroughs and follies Using this as a focus point he discusses the tradition of behavior analysis and its difficulties in addressing human language and cognition Moving forward into the 90s he chronicles the changes in a behavioral approach that emerge from a contextual perspective on human cognition and lays out the foundation for a contextual behavioral science approach that he argues is more likely to lead to an understanding of human action and an alleviation of human suffering Although the articles have previously been published they have been edited and compiled ensure this branch of research is clear to the modern audience The compilation was chosen by Dr Hayes to enhance his vision for a functional contextual approach to complex human behavior

Captured! (Volume 2 of 2) (EasyRead Super Large 18pt Edition) , *Challenging Modern Physics* Al Kelly, 2005 Newton's Laws held for 300 years until Einstein developed the special theory of relativity in 1905 Experiments done since then show anomalies in that theory This book starts with a description of the special theory of relativity It is shown that Einstein was not the first to derive the famous equation $E=mc^2$ which has become synonymous with his name Next experimental evidence that cannot be explained by special relativity is given In the light of this evidence the two basic postulates of the special theory of relativity on the behaviour of light are shown to be untenable A new theory universal relativity is developed which conforms to the experimental evidence The movement of a conductor near a pole of a magnet and the movement of that pole near the conductor does not always give the same result It has been claimed that this contradicts relativity theory Experiments described in this book show that it is not special relativity but another basic law of physics that is contradicted Faraday's Law The Big Bang theory of the beginning of the universe is questioned and an alternative proposed The source of much of the mysterious missing dark matter that has been sought for decades by astronomers is located An explanation of the shapes of some galaxies is proffered This book presents an alternative to Einstein's special theory of relativity solves many problems left unanswered by special relativity

gives a better fit to many phenomena and experimental data and is more philosophically appealing It is recommended to all people interested in fundamental issues of physics and cosmology Professor Andre Assis Brazil The book treats its subject properly not just as an impersonal set of equations but rather as a developing saga full of human triumph and failure One learns from both experimental results and simple logical argument that all is not well with modern physics Dr Neal Graneau Oxford University U K Irish engineer solves the dark secrets of space Sunday Times U K Einstein got relativity theory wrong Bangkok Post Thailand Clifford Harold R.
