Golden Arches East Golden Arches East:

Golden Arches East James L. Watson, 2006-03-13 McDonald's restaurants are found in over 100 countries serving tens of millions of people each day. What are the cultural implications of this phenomenal success? The widely read and widely acclaimed *Golden Arches East* argues that McDonald's has largely become divorced from its American roots and become a local institution for an entire generation of affluent consumers in Hong Kong, Beijing, Taipei, Seoul, and Tokyo. In the second edition, James L. Watson also covers recent attacks on the fast food chain as a symbol of American imperialism and the company's role in the obesity controversy currently raging in the U.S. food industry, bringing the story of East Asian franchises into the twenty-first century. Praise for the First Edition: *Golden Arches East* is a fascinating study that explores issues of globalization by focusing on the role of McDonald's in five Asian economies and concludes that in many countries McDonald's has been absorbed by local communities and become assimilated so that it is no longer thought of as a foreign restaurant and in some ways no longer functions as one. Nicholas Kristof, New York Times Book Review. This is an important book because it shows accurately and with subtlety how transnational culture emerges. It must be read by anyone interested in globalization. It is concise enough to be used for courses in anthropology and Asian studies. Joseph Bosco, China Journal. The strength of this book is that the contributors contextualize not just the food side of McDonald's but the social and cultural activity on which this culture is embedded. These are culturally rich stories from the anthropology of everyday life. Paul Noguchi, Journal of Asian Studies. Here is the rare academic study that belongs in every library. Library Journal. *Golden Arches East* James L. Watson, 1997. **Fleet Management and Logistics** Teodor G. Crainic, Gilbert Laporte, 1998-06-30. TEODOR GABRIEL CRAINIC, DIRECTOR. The Centre for Research on Transportation (C.R.T.) was founded in 1971 by the Université de Montréal. From 1988 on, it is jointly managed by the Université de Montréal and its affiliated schools, the École des Hautes Études Commerciales and École Polytechnique. Professors, students, and researchers from many institutions in the Montréal area join forces at the C.R.T. to analyze transportation logistics and telecommunication systems from a multidisciplinary perspective. The C.R.T. pursues three major complementary objectives: training of high-level specialists, the advancement of knowledge and technology, the transfer of technology towards industry and the public sector. Its main field of expertise is the development of quantitative and computer-based models and methods for the analysis of urban, regional, and intercity transportation networks as well as telecommunication systems. This applies to the study of passenger and commodity flows as well as to the socioeconomic aspects of transportation policy, regulation, economics. The twenty-fifth anniversary of the C.R.T. offered the opportunity to evaluate past accomplishments and to identify future trends and challenges. Five colloquia were thus organized on major research and application themes that also reflected our main research areas. They gathered together internationally renowned researchers who linked recent scientific and technological advances to modeling and methodological challenges waiting to be tackled, particularly concerning new problems and applica-

tions and the increasingly widespread use of new technologies The McDonaldization of Society 6 George Ritzer, 2011 As one of the most noteworthy and popular sociology books of all time The McDonaldization of Society 6 demonstrates the power of the sociological imagination to 21st century undergraduates in a way that few other books have This engaging work of social criticism is praised for sparking debate in and out of the classroom and for allowing students to read in depth on a small number of fascinating topics and it vividly demonstrates the relevance of Weber's discussion of rationalization the basis of McDonaldization to the everyday life of today's student New and Retained Features Links a large number of social phenomena to McDonaldization some which are directly impacted by the principles of the fast food chain and others where the effect is more tenuous A new final chapter 10 on The DeMcDonaldization of Society examines the processes of deMcDonaldization and concludes that while it is occurring on the surface McDonaldization is alive and well for example in the structures that underlie Web 2.0 Many new and updated examples are from the digital world keeping the text ultimately relevant for the contemporary student reader Addresses the advantages of McDonaldization then focuses on the problems and dangers it poses and looks at efforts to deal with those challenges Examines the link between McDonaldization and globalization Challenges the reader to rethink McDonaldization as part of the structure of society and to act to reverse the trend towards it *Middle Class Shanghai* Cheng Li, 2021-05-11 The United States may be headed toward a disastrous conflict with China unless Washington updates its understanding of contemporary Chinese society After four decades of engagement the United States and China now appear to be locked on a collision course that has already fomented a trade war seems likely to produce a new cold war and could even result in dangerous military conflict The current deterioration of the bilateral relationship is the culmination of years of disputes disillusionment disappointment and distrust between the two countries Washington has legitimate concerns about Beijing's excessive domestic political control and aggressive foreign policy stances just as Chinese leaders believe the United States still has futile designs on blocking their country's inevitable rise to great power status Cheng Li's *Middle Class Shanghai* argues that American policymakers must not lose sight of the expansive dynamism and diversity in present day China The caricature of the PRC as a monolithic Communist apparatus set on exporting its ideology and development model is simplistic and misguided Drawing on empirical research in the realms of higher education avant garde art architecture and law this unique study highlights the strong constructive impact of bilateral exchanges Combining eclectic human stories with striking new data analysis this book addresses the possibility that the development of China's class structure and cosmopolitan culture exemplified and led by Shanghai could provide a force for reshaping U.S.-China engagement Both countries should build upon the deep cultural and educational exchanges that have bound them together for decades The author concludes that U.S. policymakers should neither underestimate the role and strength of the Chinese middle class nor ostracize or alienate this force with policies that push it toward jingoistic nationalism to the detriment of both countries and the global community With its unique focus this book will enlighten

policymakers scholars business leaders and anyone interested in China and its increasingly fraught relations with the United States

Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke

Lloyd,2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this Content INTRODUCTION by Arma an Teke Lloyd PART A
