**The Politics of Neighborhood Governance in China** Jianfeng Wang, 2008-03 For the nearly three decades of coexistence between economic liberalization and political authoritarianism China remains as an anomaly to the liberal mantra of our time This book explores a segment of the China Paradox the state society interaction channeled by the Residents Committee Being the largest urban neighborhood organization the committee deserves study because of its controversial status between ordinary residents it claims to represent and the authoritarian state The committee enters the discourse as a directly congruent example of the same paradox that the whole China displays when it is endowed with important yet tension changed statutory functions ranging from social control to service provision and neighborhood self governance How and under what conditions does the committee carry out its functions What can be learned about changing state society relations from the dynamics of neighborhood politics in China This book draws its analytical framework on the theoretical models of state penetration civil disobedience corporatism and synergy as well as on the practices of American Cuban and Japanese neighborhood organizations and the Chinese Rural Villagers Committee Four distinctive Residents Committees in Tianjin City are studied in detail and their functions are identified and explained primarily through their structural connections with the lowest state organ in cities the street office and residents including other neighborhood organizations and activists The book reveals multiple possibilities of Chinese social political transformation Among them emerges a promising trend of state society cooperation which is realigning and accommodating political authoritarianism and economic openness into a seemingly

sustainable pattern of development at the urban grassroots Referred to as an amphibian organization spanning public private division the committee highlights the limits of the state society antithesis in the study of political transformation The observed patterns of neighborhood politics also raise caution against the universal applicability of the liberal norm of civil society to countries like China with distinctive conditions from which the original norm is present and constructed

*In Search of China's Development Model* S. Philip Hsu, Yu-Shan Wu, Suisheng Zhao, 2012-05-23 This book examines the development model that has driven China s economic success and looks at how it differs from the Washington Consensus China s Development Model CDM is examined with a view to answering a central question given China s peculiar matrix of a socialist party state juxtaposed with economic internationalization and marketization what are the underlying dynamics and the distinctive features of the economic and political legal social dimensions of the CDM and how do we properly characterize their interrelations The chapters further analyse to what extent and under what circumstances is China s development model sustainable and to what degree is it readily applicable to other developing countries Based on their findings in this volume

the authors conclude that the defining feature of the CDM's economic dimension is Janus faced state led growth and the political legal social dimension of the CDM is best characterized as adaptive post totalitarianism The contributors illustrate that the CDM's parameters are shown to be much less sustainable than the CDM's outcome in developmental performance and the extent to which the CDM can be applied to other late developers is subject to more qualifications than its sustainability
