Collaborative Planning and Urban Regeneration John McCarthy,2016-05-13 Approaches to urban regeneration have changed dramatically throughout Europe and the USA over recent decades drawing on notions of public private partnership growth coalitions and local spatial alliances In this engaging book John McCarthy provides critical consideration of such theories in terms of their application to practice He shows how these notions are used to explain the nature and underlying processes of urban development and to further objectives for urban regeneration To test their applicability he examines the case of Dundee including the role of the Dundee Partnership a model for many aspects of partnership working The resulting conclusions suggest ways in which the practice of urban regeneration can be improved in terms of inclusion equity and sustainability **De-coding New Regionalism** James W. Scott,2016-05-13 Bringing together comparative case studies from

Greg Young,2016-04-08 Planning is described as being increasingly sidelined by the impacts of neo liberal restructuring At

the same time culture is nowadays seen as the world's key intellectual resource possessing new creative weight in sociological economic and environmental terms This book argues that in the light of this cultural turn there is the opportunity to re position planning and proposes an original practical and robust system of culturisation Culturisation is defined as the ethical critical and reflexive integration of culture into planning and potentially other areas such as public administration corporate strategy and development thinking Cultural theory planning theory global governance policy and recent innovative culturised practices are all explored to this end The new theoretical and practical approach put forward shows how deeper richer and more relevant ideas about culture can be utilized in planning and is illustrated with international examples and two major case studies detailing new vistas for a refurbished planning

Overcoming Fragmentation in Southeast

Europe Panayiotis Getimis,2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration

society alliances are analysed The book reveals that existing civil society structures are hybrids that can oscillate between networks and organisations Moreover they establish informal governance spaces with state actors outside the institutional channels provided by government The emergence of oscillating structures and the informalisation of horizontal governance represent new challenges for local decision making processes Co operation and action oriented approaches in housing seemingly need to be based on a more detailed understanding of the complex interfaces which go far beyond the conventional ideal of partnerships and participation between sectors
