The Venus Blueprint Richard Merrick, 2012-05-22 In 2010 Richard Merrick took a family trip to Scotland s Rosslyn chapel the enigmatic fifteenth century temple made famous by Dan Brown s The Da Vinci Code Little did he know he was about to embark upon an intellectual and personal journey that would lead to the discovery of a real life lost symbol one that reveals the connection between the world s most sacred temples and opens up a treasure trove of lost science and ancient secrets The symbol he discovers the Venus Blueprint is based on that planet s orbital pattern which takes the shape of a five pointed star when seen from Earth As Merrick digs deeper he realizes the Venus Blueprint was an integral part of the design template of some of the most significant religious architecture around the world including St Peter s Basilica in the Vatican the Roman Pantheon the Greek Parthenon the Temple of Jerusalem and the Great Pyramid of Giza as well as many buildings designed by the secretive Freemason society Upon further examination Merrick is astounded to discover that temples designed using the Venus Blueprint are endowed with extraordinary acoustics that when supplied with the right tones and frequencies are capable of

harmonizing with Earth's resonant frequencies and evoking altered states of consciousness. He then proposes a fascinating idea: Could it be that the ancients used these harmonics to enhance entheogenically induced visions to commune with the divine and liberate the gods within? Supported by an impressive array of historical research and scientific analysis, *The Venus Blueprint* offers compelling evidence of an ancient lost culture that was both spiritually and scientifically advanced. **Music in the Human Experience** Donald A. Hodges, Gary E. McPherson, 2025-06-16 *Music in the Human Experience* An Introduction to Music Psychology Third Edition explores the ways in which we make sense of music and how we respond to it cognitively, physically, and emotionally. Written by musicians for musicians while incorporating findings from biology, anthropology, sociology, physics, philosophy, and education, the text presents musical experiences as widely varied and hugely complex affairs. How did human beings come to be musical creatures? Why do people have emotional responses to music? In *Music in the Human Experience*, the authors seek to understand and explain these musical phenomena that lie at the core of what it means to be human. New to the Third Edition: New co-author Gary E. McPherson. Fresh discussions on in-demand topics: social justice in music, fitness for musicians, constructivism, and more. Increased recognition of non-Western music and musical experiences. A digital overhaul of the accompanying multimedia tutorials now available via www.musicinthehumanexperience.com. Refined and updated content throughout. **The Publishers Weekly**, 2003 *Im Banne der Mathematik* Rik Verhulst, 2019-04-03 Dieses Buch wendet sich an interessierte Laien sowie professionelle Mathematiker und spricht zahlreiche Aspekte dieser Wissenschaft an. Das Werk zeigt insbesondere, wie die Mathematik aufgebaut ist und wie sie arbeitet. Beispiele aus der Praxis werden dabei ebenso besprochen wie die allgemeine Rolle der Mathematik in Kultur und Kunst in der Natur und im täglichen Leben. Hierbei reicht die Bandbreite der behandelten Themen von Sprachbildung über Anwendungen in antiken wie auch modernen Kulturen und den Goldenen Schnitt bis hin zu mathematischen Kuriositäten. Dieses Buch vermittelt einen verständlichen Einblick in das faszinierende Panorama der Mathematik und hebt ihre Bedeutung in der Menschheitsgeschichte hervor. Dabei werden nur die grundlegenden Begriffe der Schulmathematik vorausgesetzt, um jedem Leser Zugang zur spannenden Welt der Mathematik zu ermöglichen. Zahlreiche Beispiele und Abbildungen veranschaulichen den Text. **Shadow Catchers** Martin Barnes, 2010 At the dawn of photography, various image makers explored camera-less techniques, and today there are a number of artists who continue to challenge the belief that a camera is necessary to create a photograph. *Shadow Catchers* presents the work of five leading practitioners: Pierre Cordier, Susan Derges, Adam Fuss, Garry Fabian Miller, and Floris Neuss, who by casting shadows on light-sensitive paper or by chemically manipulating its surface capture the presence of objects, figures, or glowing light. The results are powerful images, often with surreal effects and symbolic content. This is the first book to gather together the exciting works of these key contemporary artists, revealing the technical processes and creative practices involved in their art. In an age of mass-produced imagery, *Shadow Catchers* offers hand-crafted photographs that are both haunting and thought-provoking. **Harmonograf** Anthony
