## **Hospital Sterilization Hospital Sterilization:**

*Hospital Sterilization* Nagaraja Prem Anand, 2011 Hospital infection is one of the major causes of morbidity and mortality following any procedure on the human body in the hospital. Infection arises primarily because of lack of knowledge by the hospital staff about sterilization. Today majority of super specialty hospitals import very expensive sterilizing equipment. However very little effort is made to train the people who run these machines. We must understand that the machine is as clever or as dumb as the person behind it. Unfortunately in spite of so many advances in health care and so many advances in medical education many countries do not have a single recognized training program to train sterilization technicians. This is our effort in that direction to come up with a formal training program to train technicians in this vital area of health care delivery system. This book shall benefit technologists and Central Sterile Supplies Department CSSD staff as well as medical students and hospital administrators to understand the intricacies and workings of a successful CSSD unit and contribute to hospital infection control in a large way. *Sterilization Technology for the Health Care Facility* Marimargaret Reichert, Jack H. Midwest **The Sterilization Movement and Global Fertility in the Twentieth Century**

This book takes an historical look at the sterilization movement in post World War II America, a revolution in modern contraceptive behavior. Focusing on leaders of the sterilization movement from the 1930s through the turn of the century, this book explores the historic linkages between environment, civil liberties, eugenics, population control, sex education, marriage counseling and birth control movements in the 20th century United States.
