Hospitality To Strangers Empathy And The Physician Patient Relationship:

Hospitality to Strangers Dorothy M. Owens,1999 In an era of transition and tension in American health care Dorothy M Owens offers a model of empathic communication that benefits both patients and physicians Drawing from concepts in the domains of psychology and theology she constructs a model of empathy that is ethical and reciprocal An integrated model of empathy recognizes the physical psychological spiritual and social nature of human beings Empathy is a clinically useful time effective communication skill that can be taught in medical and pastoral education Dr Owens s unique approach to empathy is applicable to other professional and personal relationships as well

Hospitality to Strangers Dorothy Maddox Owens,1996 *Gregory of Nyssa and the Concept of Divine Persons* Lucian Turcescu,2005-02-17 The concept of personhood is central to a wide range of contemporary issues ranging from reproductive rights to the death penalty and euthanasia We may think that the concept of person is a modern development In fact however this idea does not originate with our discovery of human rights consciousness and individuality In this study Lucian Turcescu shows that the fourth century theologian Gregory of Nyssa developed a very sophisticated concept of the person in the context of his attempts to clarify the paradox of the Trinity a single God comprising three distinct persons Turcescu offers the first in depth analysis of Gregory s writings about the divine persons He shows that Gregory understood personhood as characterized by uniqueness relationality and freedom He reasoned that the three persons of the Trinity have distinctive properties that make them individuals that is capable of being enumerated and circumscribed But this idea of individuation inherited from the neo Platonists falls short of expressing a clear notion of personal uniqueness By itself it would suggest that a person is merely a collection of properties Gregory s great contribution was to perceive the importance of relationality to personhood The three divine persons know and love each other are in communion with each other and freely act together in their common will This understanding argues Turcescu adds up to a concept of personal uniqueness much like our modern one Turcescu s work not only contributes to our knowledge of the history of Trinitarian theology but can be helpful to theologians who are dealing with issues in contemporary ethics

The Ethos of Medicine in Postmodern America Arnold R. Eiser,2013-12-24 Has postmodern American culture so altered the terrain of medical care that moral confusion and deflated morale multiply faster than both technological advancements and ethical resolutions The Ethos of Medicine in Postmodern America is an attempt to examine this question with reference to the cultural touchstones of our postmodern era consumerism computerization corporatization and destruction of meta narratives The cultural insights of postmodern thinkers such as Foucault Deleuze and Guattari Lyotard Baudrillard Bauman and Levinas help elucidate the changes in healthcare delivery that are occurring early in the twenty first century Although only Foucault among this group actually focused his critique on medical care itself their combined analysis provides a valuable perspective for gaining understanding of contemporary changes in healthcare delivery It is often difficult to envision what is happening in the psychosocial cultural dynamic of an epoch as you

experience it Therefore it is useful to have a technique for refracting those observations through the lens of another system of thought The prism of postmodern thought offers such a device with which to view the eclipse of changing medical practice Any professional practice is always thoroughly embedded in the social and cultural matrix of its society and the medical profession in America is no exception In drawing upon the insights of key Continental thinkers such as American scholars this book does not necessarily endorse the views of postmodernism but trusts that much can be learned from their insight Furthermore its analysis is informed by empirical information from health services research and the sociology of medicine Arnold R Eiser develops a new understanding of healthcare delivery in the twenty first century and suggests positive developments that might be nurtured to avoid the barren Silicon Cage of corporate bureaucratized medical practice Central to this analysis are current healthcare issues such as the patient centered medical home clinical practice guidelines and electronic health records This interdisciplinary examination reveals insights valuable to anyone working in postmodern thought medical sociology bioethics or health services research

Paul in Israel's Story John L. Meech, 2006-08-10 It is commonplace that postmodern thought has problematized the concept of the self This poses a particularly sharp problem for Christian theologians for whom the idea of the person as a Christian self must be central In this book John Meech addresses this problem by means of a theological hermeneutics that brings together cutting edge scholarship in biblical interpretation and constructive theology The book comprises three major parts In the first Meech reflects on St Paul's construal of Christian identity in light of what has become known as the new paradigm in Pauline studies This movement identified with N T Wright James Dunn and Terence Donaldson stresses the communal aspects of Paul's thought and his narrative understanding of the self In the second part Meech offers a pivotal analysis of Rudolf Bultmann's phenomenology of the self and its impact on his demythologizing interpretation of Paul's writings In the third part Meech engages Paul Ricoeur's late work *Oneself as Another* as a guide to the postmodern problem of selfhood and as a heuristic resource for interpreting Paul's writings He does not restrict himself to a textual treatment of Ricoeur's work on selfhood and narrative nor does he stop at an abstract reflection on its significance for theology Instead he explores in considerable detail the contributions and implications of Ricoeur's later writings for biblical hermeneutics and theology Investigating the unthematized hints about community presupposed in Ricoeur's work Meech reconfigures his ontology of the self as an

ontology of the self in community Finally he correlates Paul's communal understanding of the I with this ontology articulating a self that is constituted in community but not reduced to a mere locus of community He argues that the community posited in his study can be understood as the community of the living and dead in Christ

The Ethics of Animal Experimentation Donna Yarri, 2005-08-18 The ethical treatment of animals has become an issue of serious moral concern Many people are challenging long held assumptions about animals and raising questions about their status and treatment What is the relationship between humans and animals Do animals have moral standing Do we have direct or indirect duties to animals Does human benefit always outweigh animal suffering The use of animals for experimentation raises all of these questions in a particularly insistent way Donna Yarri gives an overview of the current state of the discussion and presents an argument for significantly restricted animal experimentation Pointing to the similarities between humans and animals she argues that the actual differences are differences of degree rather than kind Animal cognition and animal sentience together are the basis for the claim that experimental animals do have rights Examining arguments in the disciplines of ethology philosophy science and theology Yarri makes a case for placing substantial restrictions on animal experimentation Grounding her examination in Christian theology she formulates a more humane approach to animal experimentation She concludes with a concrete burden benefit analysis that can serve as the foundation for informed decision making The Ethics of Animal Experimentation serves as both a handbook of animal rights theory and a practical guide to navigating the complexities of animal experimentation As animal experimentation features in an increasing number of scientific endeavors it is an ethical issue that requires our immediate attention Yarri's unique contribution forges a path toward an ethical practice of animal experimentation

The Bonds of Freedom Rebekah L. Miles, 2001-08-23 In this constructive study Miles proposes a new feminist theological ethic drawing together the contributions of Reinhold Niebuhr Sharon Welch and Rosemary Ruether Seeking to critically reappropriate the Christian realism articulated by Niebuhr she reinterprets solutions to problems emergent from his theology Miles presents feminist Christian realism as an alternative that can reclaim a positive interpretation of divine transcendence and human self

transcendence while maintaining newer emphases on human boundedness and divine immanence Theologians and ethicists will find her critical reassessment of the three authors distinctive and her challenging proposal for a positive creative transformation a significant contribution to the development of feminist ethics
